SPARK PLUGS

Autolite®

COPPER CORE

- Copper-glass seal bonds insulator, terminal post center electrode together; assures full required voltage at spark gap; gas-tight seal (100% leak proof)
- Multi-rib insulator reduces danger of "flash-over"
- One-piece terminal post adds strength
- Resistor reduces radio frequency interference (RFI) and electrode erosion
- Cold-formed steel shell precision rolled threads
- Full copper core electrode provides better performance in all conditions

XTREME SPORT

- Engineered to meet or exceed OE designs and withstand the extreme operating temperatures experienced during a powersports engine's combustion
- Iridium-enhanced 0.6mm finewire design for improved ignitability, faster fuel combustion and a more focused ignition versus standard plugs
- Up to 26 percent quicker starts compared to that of standard plugs and as much as 21 percent less hydrocarbon emissions than standard plugs, which promotes better fuel efficiency and horsepower

RACING CABLE

Designed to deliver maximum spark energy for today's extreme performance applications.

- High performance red silicone outer shell for maximum heat resistance and durability
- High quality ceramic resistor (5k ohm) enhances protection against RFI (radio frequency interference) which can disrupt electronic ignition performance and lead to misfire
- Molded cap design keeps water out, giving you the confidence needed to win races
- Solid copper wire strand inner core
- Resistor covers in either straight or 90 (degree) configurations
- Fits most applications for watercraft, snowmobiles, motorcycles and carts
- In-line wire connector provides a hassle free watertight connection – sold separately

SPARK PLUG INDEXING WASHER KITS

Indexed spark plugs align the open end of the electrode toward the intake port. The hottest flame meets the new fuel charge for a performance gain, increases fuel mileage and plug life. This is a speed secret car racers have used for years. You simply mark the electrode side of the plug with a magic marker on the porcelain. You then shim the plugs with the washers to align the electrodes toward the intake ports.

2 Cylinder	8 washers	**14-1106**	**$7.50**
3 Cylinder	12 washers	**14-1107**	**$8.50**

EXHAUST VALVE SPRINGS FOR POLARIS

Polaris exhaust valves open with cylinder pressure. As you go up in elevation, cylinder pressures are reduced causing exhaust valves to open later than they should or in some cases not at all. This can cause poor and inconsistent top end horsepower. Changing to lighter exhaust valve springs allows the exhaust valves to open at the proper time maintaining proper top end horsepower and running consistency. SOLD EACH (Order 2 per engine).

PERFORMANCE EXHAUST MANIFOLDS AND TURBO OUTLETS

241-01550

241-01604

241-01525

Great bolt on performance gains for your snowmobile. Available for many of the popular Arctic Cat and Ski Models with gains up to 12-13 horsepower. All manifolds fit simply replace the stock one for the horse-power gains. No jetting for efi controllers required, we just recommend using premium pump fuel. (except 2007 M1000 Arctic Cats in which we recommend the use of the BMP adjustable pressure regulator 241-0170 set at 47-48psi).

PERFORMANCE SINGLE PIPES

241-01302

Increased back pressure provides your machine with much quicker throttle response for boondocking and more horsepower for long pulls up the mountain. These pipes use all of the stock mounting locations and fit right into the stock muffler or the BMP lightweight mufflers. They are ceramic coated silver and polished. Fuel maps can be downloaded for free at www.bikemanperformance.com.

BIKEMAN PERFORMANCE

2 STROKE PERFORMANCE MUFFLERS

POWDER LITE

- The muffler that took the snowmobile industry by storm
- All BMP mufflers are developed on a Superflow Dyno
- Guaranteed to produce at least the same HP as stock
- In many cases a 2-3 HP gain is achieved
- Polaris 600 and Ski-Doo 1000 models see a 4-5 HP gain
- Stock mounting and outlet locations for easy installation
- Most applications are about 10 lbs lighter than stock
- Some applications are as much as 18 lbs lighter than stock
- All mechanical baffle design will never require packing

POWDER LITE MUNCHIE MUFFLER

- Same great performance and sound as our standard Powder Lite mufflers
- All stainless steel latch components to keep your grub secure
- Fold out handle for stability while you gnarl down your toasty eats

FULL VELOCITY

- Up to 16 lbs lighter than stock
- Deep throaty rumble is quieter than Powder Lite mufflers
- Mechanical baffles, never require rebuilding or repacking.
- Steel construction with black high temp coating
- Developed on the dyno and field tested to assure highest HP

*FULL VELOCITY STAINLESS STEEL

- 9-13 lbs less than stock
- Stainless steel construction optimum durability
- Ceramic coated for appearance and added heat retention
- Internal packing greatly reduces under hood temps
- Slightly louder than stock but very trail friendly
- The quietest and coolest running BMP muffler available

BIKEMAN PERFORMANCE

4 STROKE PERFORMANCE MUFFLERS

POWDER LITE
- Replaces stock mufflers that are heavy and restrictive
- Lightweight design offers a deep throaty rumble
- Free flowing design for maximum airflow and HP
- Increases HP on Arctic 1100 Turbo models by 12 HP. With Bikeman high flow turbo outlet the gain is 22 HP
- Ceramic coated silver and polished for a quality appearance

FULL VELOCITY
- Quieter and larger than Powder Lite mufflers
- Still about half the weight and size of OEM mufflers
- Deep, throaty, rumbling tone is notably different than stock
- Ceramic coated silver and polished for a quality appearance

BMP PREMIUM SERIES
- 9-13 lbs less than stock
- Stainless steel construction optimum durability
- Ceramic coated for appearance and added heat retention
- Internal packing greatly reduces under hood temps
- Slightly louder than stock but very trail friendly
- The quietest and coolest running BMP muffler available

Ultra-Light Polished Stainless

- Same Performance and Quality Standards Straightline is known for
- Corrosion free for life / Mirror Like Finish
- Installation is simple and there are zero jetting and fuel programming requirements
- Produces a mid-level volume Designed for off trail / Mountain / Race applications

Ceramic Coated

- Designed for today's noise conscious environments
- Produces a low deeper tone, with keeping peak and mid-range volumes similar to stock
- No modifications necessary / No jetting or fuel programming requirements
- Guaranteed not to lose power, some applications produce a 1-2hp increase

Carbon Fiber / Stainless

- Lightest Muffler on the market / Proven Carbon Fiber technology!

- Hush Boxx silencers produce a modified sound that will comply with the J2567 standard and industry standard of 88db or less.
- Addresses the noise concern in many parts of the U.S., Canada, and Scandinavia, Hush Boxx will allow users to have a silencer that won't offend communities and will comply with most jurisdictions.
- Durable steel welded construction.
- 2000 degree black Ceramic finish. (Skinz is a certified applicator)
- CFM flow rates to match OEM flow rates for modern fuel injected engines. Does not alter or diminish horsepower.
- Offered for newer, current models.
- Significant weight reduction – approx. 7-10 lbs over OEM depending on model.
- Easy installation, all parts included.

FAT DADDY SINGLE PIPES

NEW

- All pipes are ceramic coated
- Up to 10 hp gains depending on model
- Y-Pipe included with Fat Daddy Single Pipes
- No chassis modifications needed
- Pipe requires premium 91+ octane fuel
- `12-17 models require WPS# 132-9112 DynoJet PCV fuel controller
- `18-20 models require WPS# 241-95905 SpeedWerx ECU Re-Flash

ADJUSTABLE PIPE FEATURES

- Allows you adjust your exhaust pipe to better suite your riding conditions and/or elevation
- The pipe comes with two removable stinger inserts one for 0-5000' riding and one for 5000' + riding
- The advantage to this is that if you ride in both low and high elevation ranges you will not need to have two pipes to have the best of both worlds
- You can change from ride to ride or on that same ride to ensure you are getting maximum horsepower and performance
- The stingers swap out with just a few exhaust springs
- You can still use your stock muffler for stock-like sound or a SPEEDWERX lightweight muffler for better sound and additional weight loss
- Ceramic Coated Fat Daddy Single Pipe, 2 Stinger Inserts, Black Painted Y-Pipe and all necessary mounting hardware

Adjustable Elevation System

MUFFLERS

- Made in the USA
- SPEEDWERX always has performance on their minds. Their mufflers will either perform same as or better than the stock system.

STANDARD LIGHTWEIGHT

- Cut anywhere from 3 to 12 pounds depending on model
- Designed to reduce weight while keeping sound levels as low as possible
- More bark than stock units but not too obnoxious. In other words, they won't blow you off your seat.
- Some models are even quieter than stock
- `10-20 800 Arctic Cat mufflers are 4-6 decibels quieter than OEM @ 4000 RPM

- Designed to utilize the stock outlet location and require no major chassis modification for installation.
- Made from mild steel and ceramic coated or stainless steel and come with installation instructions if needed.

COMPETITION L2 SERIES

- Designed to be lighter and louder that our standard lightweight muffler
- 8-15 pound weight savings
- Select mufflers are made from 304 Stainless Steel

COMPETITION L2 SERIES ADJUSTABLE

- New for the 2019-20 season
- Stainless Steel design is even lighter than the steel version
- Allows the back pressure to be adjusted for better acceleration and throttle response to put you out in front of the competition!

UNIVERSAL PIPE BANDING KITS

Banding the center section of the pipe reduces harmonic vibrations, which lead to premature pipe failure. As an added bonus, pipe ringing sounds are deadened. These banding kits can be used as a replacement for the SLP factory installed bands or as an addition to other brand pipes.

Metric Dimension Explanation 30 x 62 x 10 R

30 = Denotes 30 millimeter inside seal dimension (measure shaft for exact dimension)
62 = Denotes 62 millimeter outside seal dimension
10 = Denotes 10 millimeter seal width
NOTE: manufacturers imprint size on most metric seals

CYLINDER SLEEVES

- Sleeves are constructed of an alloy of carbon chrome, and molydenum of 200 brinell hardness
- This construction insures ease of installation, trouble free boring and dependable long engine life
- Sleeves are all centerless ground for perfect roundness to one-half thousandth of an inch or less
- All sleeves include porting

***CYLINDER IDENTIFICATION:**

AC - Original cylinder bore is alloy-chrome plated, nikasil or electrofused. The cylinder must be bored to accept the new cylinder sleeve.

CS - Original block has a cast-in sleeve liner in the cylinder. The cylinder must be bored out to accept the new cylinder sleeve. The cast-in liner will be bored completely out of the cylinder. Do not try to push out the cast-in liner, cylinder damage may be the result.

CI - Original block has a cast-in iron liner in the cylinder. The cylinder must be bored to accept the new cylinder sleeve. When using a 1/16" wall sleeve, the cast-in liner will not be completely removed. The sleeve is designed to insert into the iron lined cylinder.

RS - Original block has a replacement sleeve. Heat the cylinder to remove the sleeve. Reheat the cylinder to install the new cylinder sleeve.

The SP1™ line of Hyperdryve® pistons are made from a space-age aluminum alloy which maintains its high tensile strength up to 700°F (380°C), 50% higher than a conventional cast piston. The high temperature resistance significantly improves fatigue strength and impact toughness, which means that we will keep you riding longer and harder than the competition.

The new alloy, combined with our already existing techniques of anodizing the crowns, machine smoothed heads, and MOS2 coated skirts for smoother startups and break-ins, meets the demands for today's high performance engines.

Our pistons are designed and manufactured to OEM specifications. Please see your service manual or contact your local authorized OEM dealer for piston to cylinder-wall clearance, ring end gap, and installation instructions.

SP1 ONE™ PRODUCTS

HYPERDRYVE®

PISTON KIT

The images below show two cast aluminum pistons that have been magnified to 1,000 nanometers. Both were soaked for 100 hours at 600° F (316°C) to simulate operating conditions. It's easy to see that the conventional aluminum alloy's particles coarsen significantly. Our new aluminum alloy still maintains twice the hardness of the conventional alloys.

CONVENTIONAL CAST PISTON

HYPERDRYVE PISTON

We are proud to bring you the next step in the evolution of performance powersports pistons.

OEM STYLE PISTON KITS

Includes: 1 piston, 1 ring set, 1 wrist pin and 2 circlips

- Engineered to provide the best possible path for combustion chamber heat transfer to the cylinder walls
- All pistons, rings, pins and circlips are manufactured to OEM specifications
- All individual components are interchangeable with original parts
- Piston weight compatible with original piston

T-MOLY SERIES PISTON KITS

- T-Molly Series offers a number of performance benefits. See below

T-MOLY SERIES

MACHINED SMOOTH HEADS

A machined smooth piston crown should reflect combustion heat while reducing carbon buildup and protecting the top of the piston. Some tests have shown that a machined smooth head can increase HP and fuel economy by up to 6%.

HARD ANODIZED CROWNS

Pistons that are not anodized have a hardness of HRB 60, while pistons that are anodized have a hardness of HRB 105. This makes anodized pistons 75% stronger than non-anodized pistons.

Anodizing:

- Increases heat resistance
- Minimizes piston expansion and contraction
- Reduces the coefficient of friction

MOS2 (Teflon-Molybdenum coating)

MOS2 is composed of sub-micron sized particles of solid lubricant and resin blends of solvents. The coating is rolled on, so it provides 10 times the bond strength of spray on coatings.

MOS2 Coating:

- Draws heat through piston walls and out the bottom
- Reduces heat and friction, for added power and longevity
- Helps eliminate cold seizures, and increases durability

HYPEREUTECTIC CAST

Is a piston with increased silicon content. The end result is a piston that has an increased hardness, is more resistant to wear, and has an increased ability to withstand higher cylinder temperatures, pressure, and detonation.

Hypereutectic Casting:

- Helps reduce expansion from heat
- Makes piston more durable and resistant to wear
- Allows piston to run tighter clearances

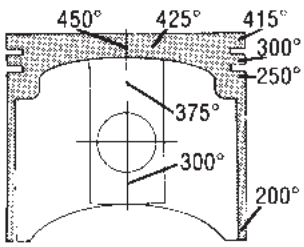
WHY USE Wiseco Performance Products ?



FORGED
Interwoven grain structure for superior strength

CAST

CAST

FORGED

1. **FORGED**
   All Wiseco Pistons are forged from high silicon, low expansion aluminum which offers superior strength, reduced weight, improved heat transfer, and longer life.
2. **ADVANCED MANUFACTURING TECHNIQUES**
   Diamond turned finish from one of the many CNC computer controlled turning centers guarantees you a perfect finish with no size variation. Wiseco pistons can be installed in any of today's cylinder bore compositions (cast iron, chrome, nikasil and boron composite) with confidence.
3. **OVERSIZE OPTIONS**
   Wiseco's wide range of oversize pistons increase the life of cast iron lined cylinders. With the availability of replacement cylinder sleeves, chrome, nikasil and boron composite cylinders can be resleeved to accept Wiseco's oversizes.
4. **COMPUTERIZED**
   Wiseco's state-of-the-art computerized manufacturing facility is dedicated to supplying both the high-perfomance racer and recreational enthusiast with the finest forged piston available.
5. **EASY AVAILABILITY**
   WPS Distribution centers combined with Wiseco's extensive inventory selection provides you with easy access one of the largest powersports suppliers of pistons and top end rebuild kits in today's marketplace.

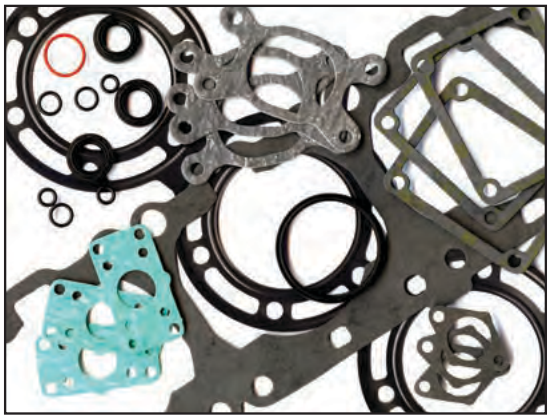
HIGH PERFORMANCE ENGINE GASKETS

- Manufacture with the highest quality gaskets for the two cycle engine industry in its modern computer controlled facilitates in the USA
- Extensive range of high tech materials provide unmatched reliability and performance for the demanding needs of today's power plants
- Sold in 38 countries on six continents. This exposure to varying fuels and climates is the ultimate field test
- The performance oil seals have a high chromium content stainless steel alloy springs for maximum performance and corrosion resistance

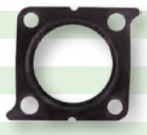


FULL GASKET SETS WITH OIL SEALS

Contain all gaskets necessary for professional engine rebuilding, including high performance oil seals
Designed for complete engine rebuilding.

FULL TOP SETS WITHOUT OIL SEALS

Contain high performance head and base gaskets plus intake and exhaust gaskets.
Designed for cylinder rebuild and piston replacement.



ALL GASKET SETS ARE FOR THE NUMBER OF CYLINDERS LISTED

BULLY DOG
MAKING EVERY RIDE A BULLY!

POWERSPORTS GT

Powersport GT offers Tuning, monitoring and data logging features for Skidoo® / BRP Snowmobiles and UTVs and Polaris® and UTVs and Snowmobiles.

The Powersports GT provides horsepower gains through impressive pre-set tunes. The programmer also features monitoring functions read directly from the PCM providing real time feed back on an extensive list of parameters. The GT comes with a Data-logging function allowing the riders to record parameters and play back the data. Mount provided for easy installation.

- Horsepower gains up to 4HP (depending on application)
- Tuning also available through Bully Dog Tuning Dealers
- Monitoring capabilities – choose from up to 12 available parameters

- Read and Erase Diagnostic Trouble Codes (DTCs)
- Data Logging – Record up to 20 minutes of parameters and play back
- Easy Installation (10-20 Minutes)
- Mounting option included

FUEL AND TIMING PRODUCTS
By DYNOJET

Power Commander V (PCV) and Power Commander Fuel Control (PCFC) are EFI tuning products that allow us to create custom fuel maps for most popular SLP engine combinations. These products are cutting edge technology, allowing fuel maps to be created with pinpoint accuracy. This results in improved throttle response, top end performance and fuel economy. They plug into the stock ECU and add or subtract fuel from the stock ECU settings. The fuel maps are based on throttle position verses RPM with input points at ten different throttle positions and in 250 RPM increments. For the experienced tuner, these controllers come with a computer link cable and software for custom mapping capabilities. Customers will choose to run either the PCV or PCFC based on desired features, see below.

POWER COMMANDER FUEL CONTROL

The Power Commander Fuel Control (PCFC) system allows customers a low cost alternative to the Power Commander V (PCV). All of the same fuel maps that are available from Starting Line Products for the PCV can be used in the PCFC as well. The PCFC cannot be outfitted with optional accessories such as Autotune, Wideband 2 and the LCD display and the PCFC does not have ignition timing control capabilities like some of the PCV models. Lower cost and simplicity are benefits of the PCFC. The PCFC does have end user custom fuel mapping capabilities similar to the PCV by plugging into your laptop or PC with the included computer link cable.

POWER COMMANDER V (PCV) FUEL SYSTEM CONTROLLER

This EFI controller is the latest technology, giving you full EFI tuning capability for your fuel injected snowmobile. It allows a fuel map to be built with input points at nine different throttle positions and in 250 RPM increments. This provides much more adjustability than other boxes on the market, allowing SLP to create fuel maps that optimize performance and fuel economy for specific combinations. SLP's fuel maps can be preprogrammed into the controller for true plug and play capability. For the experienced tuner, the controller comes with a computer link cable and software for custom mapping capabilities. No wiring modifications required (OEM style connectors are supplied) and no permanent changes are made to your stock system.

SLP's goal with the Power Commander (PC V) is to design and provide maps for the most popular SLP combinations. By doing this, customers will be able to bolt these parts on, download the map into their PC V fuel controller and ride without having to do any fuel tuning on their own.

Due to the technical nature of the PCV fuel controllers, all warranty claims must be processed directly with Dynojet Call (800) 992-4993 for return authorization.

AUTO TUNE By DYNOJET

Auto Tune is another helpful tuning aid. Allows user to program a target O2 map into the module based on throttle position and RPM. When connected and turned on, fueling will self adjust to achieve the target O2 numbers as you ride. We have found the best results are achieved when running at a constant throttle position (the use of a throttle stop is beneficial to keep the throttle position constant). In some areas manual tuning is still mandatory due to other systems that are in place. SLP has initial O2 map recommendations for you to start with. Please inquire for more detailed information specific to your model.

POD-300 DISPLAY By DYNOJET

The POD-300 is an accessory display for Dynojet devices that support DJ-CAN; including the popular Power Commander V, Autotune, WideBand 2, and CMD. Simply connect the included CAN cable and you're ready to go; there's no need to tap power or deal with other messy connections. Need to adjust your tune in the field, or datalog the supported channels to further refine your tune? No problem, with the POD-300 you're just a few clicks away from taking advantage of the many features with it's easy to use menu system.

FEATURES

- Real time fuel adjustments
- Display channels real time: RPM, TP, Map Position (When using map switch), duty cycle, fuel changes, ignition changes and wideband air/fuel ratio - (W/WB2 or AutoTune connected)
- Weather resistant for use in all conditions.
- Log channels saved to internal memory and can be viewed / analyzed with DynoJet's Powercore Software
- High contrast display, viewable in direct sunlight.

WIDEBAND 2 WITH POD-300 DISPLAY By DYNOJET

This wideband O2 gauge is an extremely accurate and capable unit. Complete with it's own POD-300 Digital Display, it makes precision fuel injection tuning easy. It allows the user to monitor and record O2, throttle position, RPM, and one other 0 to 5 volt analog input such as manifold air pressure, boost pressure, etc. It can be used as a stand alone unit or connected to a Power Commander V (PCV). When connected to a PCV, the injector duty cycle and percent of change can also be monitored and recorded. If desired, with the use of a CAN to CAN cable (PN 70-134) this Wideband 2 can be used as an Autotune unit (refer to the Autotune description below). It has the ability to test the sensor condition at any elevation to ensure the data you are receiving is accurate. This unit is extremely beneficial for precision fuel injection tuning.

"BLOW HOLE" HOT AIR ELIMINATOR

MTNTK PERFORMANCE

The current trend in mountain machines has been to make them smaller and more compact thus limiting the amount of area that can be used for vent surfaces. Deep snow and extreme conditions also put enormous loads on the motor which helps raise the under hood temps shortening belt life and reduces performance. The Blow Hole helps remove that heat via a high output fan.

59-59925

12-18650

- Active venting system expels hot air even at low ground speeds or when snow is covering vents as opposed to traditional passive venting
- Pulls approximately 140 CFM of air through the hood and clutch area
- Prolongs belt life and helps keep clutches cooler
- Heavy duty welded aluminum design is rugged yet lightweight
- Air is removed from the clutch housing and fan installation does not inhibit or otherwise interfere with belt changes
- Radiated hear from engine is absorbed by the cool incoming air instead of air intake/ box thus keeping intake air temps down
- Gives engine a crisper and more consistent feel and makes more power when subjected to heavy powder and hillclimbing
- Belt dust and other fine debris is essentially vacuumed out of under hood area helping to keep clutches and engine compartment cleaner
- Also makes an excellent goggle defogger
- Factory connectors allows true plug and play install and allows for quick disconnect for troubleshooting and working on snowmobile
- Mounting location is clutch side knee panel

MAX FLOW™ TECHNOLOGY

This kit features SLP's all new Max Flow™ air vent technology. This new technology utilizes injection molding to encapsulate either our Flow-Rite™ material or our new highly durable stainless steel mesh (depending on the application) to provide the maximum air flow through the chassis while keeping snow out. This injection molding process allows us to produce vents that more readily shed the snow, and are more durable. These vents are unmatched in quality and appearance.

FOR ARCTIC CAT PROCLIMB & PROCROSS

- These vents provide hot air escape from the chassis for cooler underhood temperatures which helps to maintain higher horsepower. Sold as a kit, includes one right and one left side vent
- Will also fit 2014-18 Yamaha Viper RTX, LTX, XTX, STX, MTX

CLEAN AIR INTAKE SYSTEMS

Designed to save weight, add HP and reduce under hood heat by opening up under hood space and increasing airflow throughout the engine compartments. These kits pull in a combination of under hood air and cold outside air. This greatly reduces engine bog due to snow plugging in the OEM intake screens. All kits property mount the intake sensors for correct tuning without rejetting or remapping the fuel system.

SKINZ PROTECTIVE GEAR

INTAKE VENT COVERS FOR SKI-DOO XM&XS

- Adding to the Bret Rasmussen product line are new Ski Doo XM/XS intake air vent covers. These framed, durable gorilla mesh vent covers protect the vulnerable thin intake mesh found on the sides of the hood on the Ski Doo XM/XS machines. During aggressive riding or backcountry riding, these lightweight mesh intakes become ripped or punctured allowing debris or large items to be ingested into the motor. These new gorilla mesh vent covers install easily over the existing intake areas protecting this vital area and still allowing plenty of air into the machine.
- All parts and hardware included for complete installation.
- A low cost solution to a potential high priced problem.

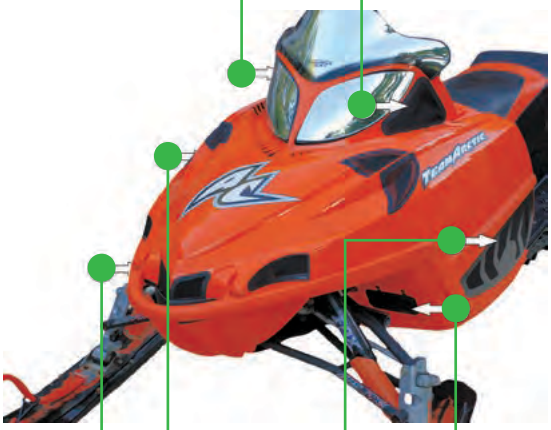
PATENT PENDING

Straightline performance has an exciting new line of vents from Frogzskin. These vents have been proven to help remove excess heat from under the hood increasing horsepower and belt life. Their patent pending design utilizes the latest technology in Micro-Fiber materials. Vents provide you with easy economical protection that looks great!



- Material is woven to specific quality standards allowing maximum air-flow and hydrophobic characteristics to repel water and snow
- Highly water-resistant
- Industrial grade adhesive is tested in excess of -40°
- Designed to be an easy peel and stick application
- Works with plastic OEM vents to protect from fine powder snow and debris
- Patent Pending design produces a thin low profile vent, which eliminates snow build-up on or around vents
- No unsightly rivets, screws, snaps or bulky frames
- Universal kits can be used in multiple locations in combination with multiple sizes to maximize cooling and air flow
- Model specific nose vent kits allow air-flow to reduce power robbing under-hood heat from building up all while keeping out snow and debris
- Nose vent kits virtually eliminate heavy snow and ice build up in the nose and belly pan area

MOTOTASSINARI

VFORCE3 BY MOTO TASSINARI

REED VALVES

- Patent pending snap together cage design with symmetric reed petals
- Patent pending reed tip shape accelerates the air mixture over the reed tips
- Dramatic horsepower increase
- Additional RPMs
- Higher efficiency (improved economy)
- Longer reed petal life

1 year warranty.
Process direct with Moto Tassinari,
4 Technology Dr. West Lebanon, NH 03784

See next page for replacement petals and gaskets not listed

System includes all necessary components for one engine
Replacement petals sold 4/pk (order one per cylinder)

CARBON TECH REED PETALS

- High strength carbon fiber petals for stock cages
- Works well for many turbo applications
- Medium tension improves power delivery in the mid-range and is best suited for overall power delivery of the engine
- High tension improves power delivery in the upper rpm range and is best suited for maximum delivery of the engine
- Sold per Set - Order 1 per engine

REED SPACER KIT

- Increased performance and throttle response
- Gains up to 3HP on some models from low to upper mid-range
- Ski-Doo big twins respond well to reed spacers
- Cleans up low speed burble on engines with restricted intake tracts
- Reduced airbox to carb clearance eliminates air leaks around intake boots

DEEP WELL FLOAT BOWL NUTS

- Designed to store more fuel around the main jet
- Helps eliminate lean conditions due to fuel starvation
- NOTE: Due to engine placement on some Ski Doo models, only 59-39004 will fit. The inside bore is deeper in the 59-39003 because it does not have an external bottom bore like the stock float bowl nut

OIL TANK SLEEVE

This part reshapes the oil reservoir opening back to round to stop leaks. Makes tightening and removing oil cap easier. Oil cap will no longer pop off reservoir threads with sleeve installed which eliminates a potential fire hazard and potential failure. Designed to fit OEM oil caps and reservoirs

- Fits Ski Doo models: XP's '08-11, Rev '03-08, ZX '03 and older, CK, F, and S chassis, Arctic Cat models: M-series and Crossfire, Polaris models: any with 1.75" opening.

OIL SLEEVE

- Designed to stop oil from leaking out of the oil cap
- Easy fix for warped oil reservoir necks
- Easily installs in place
- Slight heating of the neck may be required for installation, DO NOT use open flame
- Fits most models including Arctic Cat M-series, Crossfire, and Sno Pro models
- Also fits Polaris Pro, Rush, Edge, Evolved, and Aggressive chassis
- Will also fit Ski Doo XP, Rev, ZX, CK, F, and S chassis

FUEL PICKUP FILTERS

- OEM replacement in-tank fuel pickup filters for many Arctic Cat models
- Helps prevent engine damage when running out of fuel
- When submerged, the pickups flow fuel through as normal. If there is a shortage of fuel where the pickup is, it will shut preventing air from entering the fuel system
- 141-01801 have a single 5/16" fitting
- 141-01802 has a bleed hole and a single 5/16" fitting
- 141-01803 has a 90° flow through design
- Approximately 3" in diameter and 2" tall

FUEL PUMPS AND PARTS

NEW

Replacement fuel pumps and kit components are designed to meet or exceed OEM specifications, and feature upgrades that improve on the OEM design. Upgraded polymers, brushes, and commutators insure long life and durability in multiple fuel blends. Each Quantum fuel pump and installation kit is backed by a lifetime free replacement warranty.

- OEM or better performance Polished corrosion-resistant case to help minimize seizing during non-operation
- Specifically designed for quiet operation Drop-in replacement
- Gradient density fuel strainer for superior contaminant filtration
- Patented check valve technology
- Compatible with modern ethanol infused gasoline
- Items marked with @ are Walbro brand genuine Arctic Cat replacement pump with limited warranty

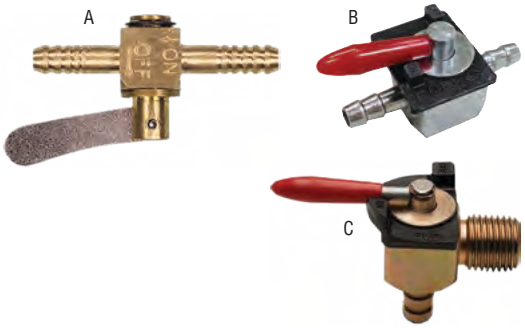
THERMOPLASTIC IN-LINE FUEL SHUT-OFF VALVE

FEATURES:



- Economical
- Easy one hand operation
- Small, lightweight
- Used with 1/4" I.D. hose

A unique shut-off valve that provides quick, positive on-off control of flow through flexible plastic tubing. the small size of the valve makes it ideal for use in compact space. When the valve is in the closed position, an orange band is clearly visible, eliminating operator error. The same shut-off valve can be used for either pressure or vacuum applications. Eliminates the possibility of flooding of snowmobile engines when towing on a trailer.

LOW PERMIATION FUEL LINE

- Certified to meet permeation emission standards of 15g/M2/day
- On emission controlled vehicles, check with local and state agencies to determine suitability
- Robust multi-layer design and construction
- Fluoropolymer liner compatible with higher ethanol blend gasoline up to 100%
- Highly flexible, easy to install and offers excellent fitting retention
- Resistant to swelling, hardening and cracking caused by hydrocarbon-based fluids
- Ozone and UV light resistant
- Wide temperature range from -20F to 165F (-28.9C to 73.9°C)
- Yellow color for easy identification
- Recommended to use Stepless Clamp, WPS# 57-20084 for 1/4" and 57-20075 for 5/16"

Warning: Not for use with fuel injected engines

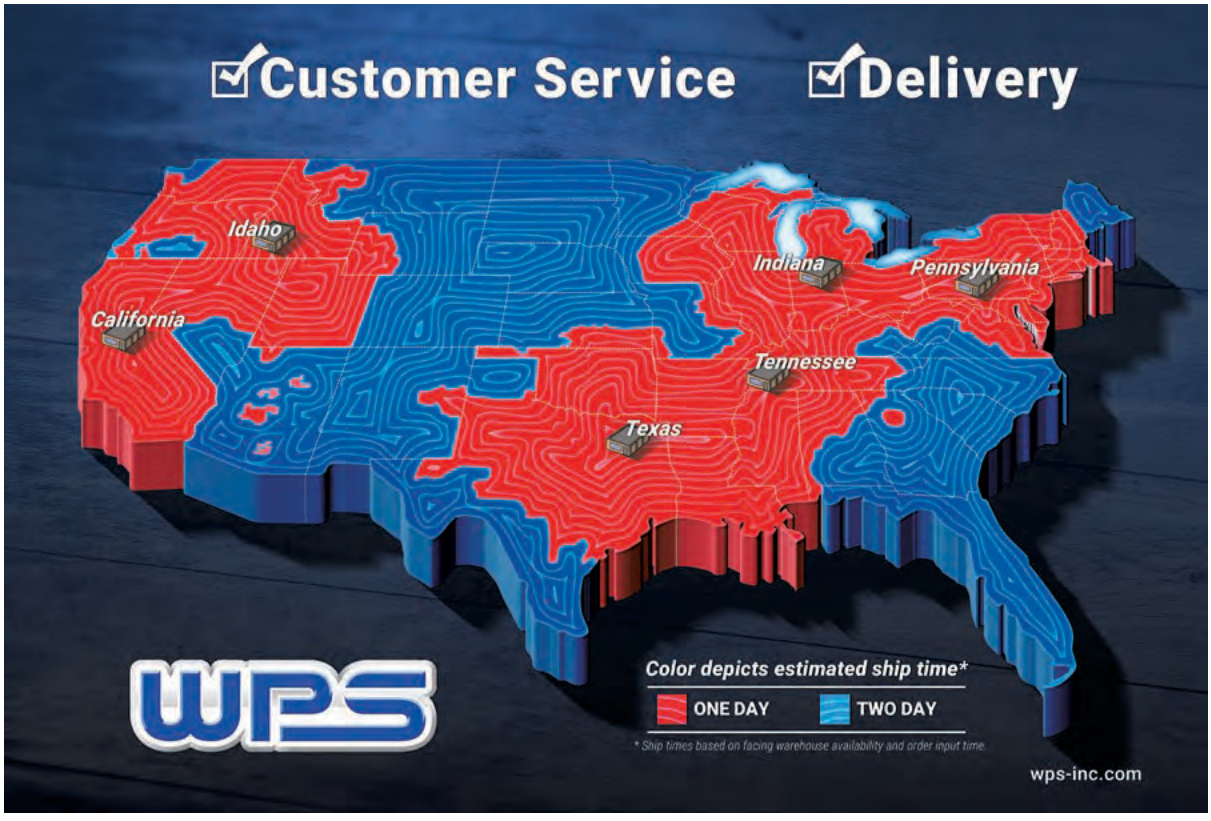
POWERBLOC 80 CALIBRATED CLUTCHES

CVTech AAB



The Powerbloc 80 is the latest driver pulley designed by CVTech. This pulley as been developed to offer an alternative to snowmobilers who want maximum performance and are tired of wasting time and money on maintenance of their original pulley. Available in calibrated only, the Powerbloc 80 stands apart by:

- Its capacity to transmit the engine's full power
- A service life better than the competition
- User satisfaction
- Designed for strength
- A simple design which has 50% less parts than the competition
- Assured reliability
- 15% to 20% lighter than the other pulleys on the market
- Good ventilation
- Uncompromised performances, exploiting engines to their maximum capabilities
- Maintenance free

THE 94C DUSTER

Simplicity at its finest

- Ribbed cover and matching pucks fit any 94C Duster clutch
- Ribbed cover and pucks are standard on universal Duster clutch sold below
- Allows more horsepower and load without movable face rotation
- Increased clutch capability allows economical replacement on more models

The "Duster" is the best clutch yet for any snowmobile application.
When you compare the Comet Duster to any other clutch with the overall features of cost, weight, simplicity, ease of maintenance, endurance and performance, no other clutch can compare. Universal clutch 211493 comes standard with the ribbed cover. On 440cc or larger machines that will be used to pull cargo sleds or ridden in deep powder snow, order ribbed cover plate and matching pucks separately.

Description	WPS#	List
Ribbed Cover Universal 30MM 1:10 flush tapered bore. Adjusts to belts 1-3/16 through 1-1/2 wide. Comes with spacer installed for 1-1/4 belt. Contains six 211477 pucks and 205583 orange spring.	**211493**	**$261.95**
Since the majority of older snowmobiles, including those with Spirit, Kohler, CCW, JLO, Hirth, Tohatsu, Kawasaki, Sachs, Fuji, etc., usually have 30MM 1:10 tapered crankshafts, this is the most popular Duster clutch. For models that have other crankshaft designs or specific requirements such as ring		
May also work on Honda Odyssey 350		
1" Straight bore with 1/4" keyway. For 1 3/16" wide belts, contains six 206514 pucks and 205858 pink spring. Often used on early models of Ski-Daddler, Sno Pony, etc. This bore size and calibration is for 4-cycle engines such as Tecumseh, Kohler, Briggs & Stratton, Honda, Kawasaki, Wisconsin Robin.	**206095**	**$261.95**
Fits Honda Odyssey 250	**209234**	**$314.95**

SPRING SHIMS

NOTE: "Bottoming out" of a spring coil upon coil even once will hasten it's deterioration. This will decrease the original spring rate causing a loss in rpm and performance. Avoid using 3 shims if the "bottoming out" condition should result.

- Fits 102C, 108C, 108EXP, and 108 4-PRO clutches.
- Helps raise the engagement rate.
- 1 washer raises engagement 100 rpm. Use 1, 2, or 3 washers.

* Cam arms will not always be stamped with the name they are called because they are often made from another cam arm.

** Actual gram weights of arms may vary from weights listed herein which are only Comet arm weight objectives. Certified part weights would cause arms to be significantly more expensive. The variance may occasionally exceed 2 grams per arm and is a result of greater or lesser arm density.

H5 ALLOY PRIMARY CLUTCH SPRINGS

- Most OEM springs lose their spring rate over time and goes unnoticed reducing your engine rpms and performance
- These H5 alloy springs are high quality springs with the same performance of titanium springs at a fraction of the cost
- No rate loss over time which maintains efficient clutching for a better performing and more consistent spring
- New material has a 30,000 to 40,000 PSI higher tensile strength than standard chrome-silicone springs
- Powder coated finish with part # and rate printed on spring
- Direct OEM replacement and custom spring rates for turbo, nitrous, big bore applications
- Used by Tucker Hibbert for over 15 years

2016+ ARCTIC CAT TEAM PRIMARY CLUTCH SPRING ADAPTOR

This spring cup adaptor is designed to allow you to run your older style primary springs on the new Team clutches. It is necessary to keep proper spring alignment when using the old style springs in the new Team clutch. Note these new clutches have different load heights compared to the old clutches. Using this adaptor with your old springs will change the rate of your spring slightly.

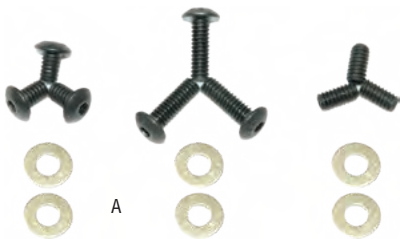
10 SERIES PROFILE ADJUSTABLE WEIGHTS

All of our machined weights are adjustable to about 2-3 grams heavier on the tip with adjustment kit (440-90901) and come heat treated and Black Oxide coated to prevent wear and corrosion. We offer 3 different profiles of weights that all maintain the same curve profile as the Polaris 10 series style weights.



- Bushings installed in weights
- Fit Polaris p-85, Arctic Cat, and Comet clutches.
- Sold in sets of 3
- Tip of weight is adjustable to change tip weight 2-3 grams

Hammerhead (heavy tip) weights provide the most aggressive shift. They work great on big torque twin cylinder engines.

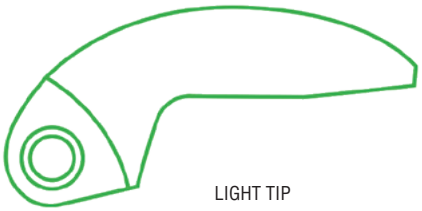
SPEEDWERX
STRAIGHT-UP USA HORSEPOWER



3 SERIES AGGRESSIVE PROFILE ADJUSTABLE MACHINED WEIGHTS

These weights are adjustable by about 2-3 more grams on the tip. They come heat treated and have a Black Oxide coating on them to prevent wear and corrosion. These weights will act 4-6 grams heavier than what they weigh on a gram scale. The curve and profile of the weight's offer a much more aggressive upshift, and quicker RPM response, they work great on high torque applications.

- Bushings installed in weights
- Fit Polaris p-85, Arctic Cat, and Comet clutches
- Sold in sets of 3

SPIDER SHIM KITS

Drive clutch belt to sheave clearance is extremely important. It should be set at a maximum of .020" with a new belt. Too much belt to sheave clearance will cause poor clutch performance. This shim kit allows you to adjust your belt to sheave clearance for optimum clutch performance.

AXYS STAGE KITS NEW

AXYS 800

The Blue series weights are designed with a lower engagement than our red profile but still with an aggressive shift profile in mind.

- The advanced profile weights offer the industry's lightest fly weights with a uniquely aggressive ramp.
- Lighter fly weights results in less rotating mass in the clutch allowing for a more responsive and nimble ride.
- Each weight has 20g adjust-ability using the .85g and 1.7g magnets included.
- Axys stage 1 kit contains: weights, primary spring, bushings, and magnets.
- Axys stage 2 kit contains: weights, primary spring, secondary spring, helix, bushings, and magnets.

The Red series weights are designed for turbo kits with a fast spool idea and with an aggressive shift profile in mind.

- The advanced profile weights offer the industry's lightest fly weights with a uniquely aggressive ramp.
- These weights are designed to run 15-20% lighter then anyone in the industry while still maintaining peak RPM.
- Lighter fly weights results in less rotating mass in the clutch allowing for a more responsive and nimble ride.
- Each weight has 20g adjust-ability using the .85g and 1.7g magnets included.
- Axys stage 3 kit contains: weights, primary spring, secondary spring, helix, bushings, and magnets

TEAM® TIED SECONDARY CLUTCH

The TEAM® Tied Secondary clutch is an improvement from the TSS-04 because the moveable sheave opens axially to the stationary sheave without rotational movement. This translates to no scrubbing motion on the belt face.

Additionally, all torque is transmitted through the helix, making clutch tuning much more precise. This clutch was developed using the extensive testing and design resources of TEAM Industries, Inc., and is sure to help you achieve the performance you've been looking for.

Features:

- More efficient than non-tied designs
- Longer Belt Life
- 16-18º higher helix angles than TSS-04
- Eliminates engine reverse clunk
- Backshifts faster than the TSS-04

Capacity:

- 350+ Horsepower

Applications:

- Snowmobiles - Arctic Cat, Polaris, Ski-Doo, Yamaha
- Sandrails
- Dune Buggies
- Custom Bikes / Trikes

TWIN TRAX™ HELIXES
FOR TEAM® TIED CLUTCH

- Twin Trax™ helix produce a quick up-shift and improve back-shift for excellent throttle response
- The dual-angle option helix offers fine-tuning for changing conditions.
- The unique components are available in a variety of multi angles for almost any application.
- If you don't see the angles you want, we can cut a custom helix just for you.

TEAM® BOSS CVT RAPID RESPONSE DRIVEN CLUTCH HELIXES

The area of the driven shaft on which the clutch slides/moves is polished for improved performance and increased bearing life. The shaft itself is larger diameter than traditional shafts

The TEAM® BOSS Rapid Response driven clutch is equally impressive in its design and focus on quality, featuring machined sheaves that mount directly to the machined-matched driven shaft.

On the BOSS system, the movable sheave (the sheave that moves to allow the belt to move lower into the clutch) slides on the driven shaft, rather than on a separate steel post that's built into traditional driven clutches. The result: a 0.25-lb. weight reduction and quicker acceleration.

HIGH TENSILE STEEL SECONDARY CLUTCH SPRINGS

Secondary springs control shift rate. Fine-tune your TEAM® Rapid Reaction or TEAM® TIED secondary clutch with our High Tensile Steel springs manufactured to the most exacting specifications. We suggest using Delrin washer kit #30-930650. It's a good idea to install fresh springs every year.

We recommend using Delrin Washer kit #30-930651. Slippery Delrin washers go on top of the spring where it sits in the spider.

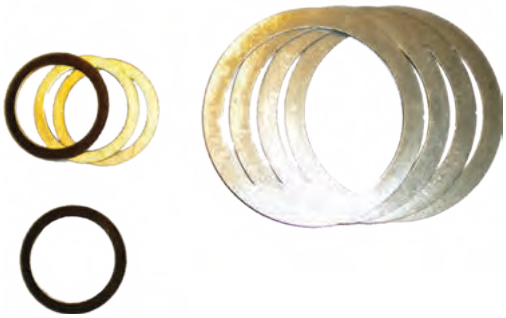
FLOATING DRIVEN BELT DEFLECTION ADJUSTER



- It serves two purposes, first you can use it to set the belt deflection without using the factory shims.
- So it's much easier and precise.
- Secondly it allows the driven clutch to float on the shaft to keep the clutches aligned properly all the time.
- This greatly reduces the chances of blowing a belt.

DAYCO

XTX BELTS (XTREME TORQUE) SNOWMOBILE BELT

Specially-formulated high temperature Neoprene with the highest level of Aramid (Kevlar product) available that delivers track-churning performance for the most aggressive riders. This innovative break-through design features deeper cogs on top and rounded cogs on the bottom for ultimate flexibility and long belt life.

- Quicker, more consistent throttle response at mid-high speed/ acceleration
- Greater secondary acceleration at high RPMs
- Reduction in slippage during the highest levels of torque
- Increased horsepower capacity
- Better performance during deceleration (more responsive engine braking)
- Tested and proven reliable at well over 12,000 RPMs
- Cooler running than the leading competitors

This race-tested Dayco XTX belt gives Extreme riders the best out-of-the-hole acceleration, throttle response and durability, for the ride of a lifetime-every time!

Recommended for engines ranging from 800cc & above

BRAKE PADS

For photos of brake pads see pages 1113-1115

SPI continues to offer the best in aftermarket performance brake pads. When looking for brake pads, a big thing to remember is the coefficient of friction rating for that pad. This is a 2 letter rating system (see graph below). The first letter is the cold temp coefficient rating and the second letter is the hot temp coefficient. The higher the letters, the higher the coefficient of friction.
SPI Semi-Metallic brake pads and shoes are composed of a Non-Asbestos, Semi-Metallic Carbon Kevlar aramid fiber from DuPont and have a DOT rating of “FF”.
Our Full-Metal pads contain Copper, Carbon, Tin, Lead and other metallic elements and have a DOT rating of “FG”.

Rating	Coefficient of Friction (C.F.) at 250°F and 600°F	Comments	General Applications
EE	0.25-0.35 both temps	0.25% fade possible at 600°F	This pad is not recommended for performance applications as it shows poor C.F. in both cold and hot temps.
FE	0.35-0.45 at 250°F 0.25-0.35 at 600°F	2-44% fade possible at 600°F	This pad is not recommended for performance applications. Though it shows better C.F. in cold temperatures and has a high possibility of brake fade at warm temps.
FF	0.44-0.45 both temps SPI SEMI-METALIC	0-22% fade possible at 600°F	This pad is well suited for most conditions. It has minimal fade at high temperatures and is good for performance applications.
FG	0.44-0.45 at 250°F 0.45-0.50 at 600°F SPI FULL-METALIC	Fade very rare	This pad is great for most conditions as it is softer than HH rated pad and will bed quicker on worn discs. This rating is good for performance applications.
GG	0.45-0.50 both temps	Fading very rare	This pad is great for most conditions as it is softer than HH rated pad and will bed quicker on worn discs. This rating is good for performance applications.
HH	0.55-0.65	Carbon/carbon only. O.K. up to 3000°F where it glows	Ideal for high performance motorcycles and race track use. Inefficient in normal and cold operating conditions as they fail to reach a good operating temperature.

NO-SPILL®

GAS CANS

- Our slogan is true. Simply press the button to pour. It's intuitive. This is the easiest gas can to use on the market - it's not even close. A gas can should be easy to use
- We used simple physics to develop a nozzle that automatically stops the fuel flow when the target tank is full. Just hold the button down. Simple
- Our patented nozzles flow up to twice as fast as other nozzles. No gurgling or interrupted flow. When filling up large equipment how long do you want to hold a 40 lb. 5 gallon tank?
- Double wide view stripes on both the front and back of our smaller cans. Now you know your fuel level from across the yard or garage. No guessing and no extra trips to the gas pump. Every gas can should have view stripes. No-Spill is the only can with them
- Our cans have the thickest skins. A robust 70-100% thicker than most cans. This costs much more to make, but you get what you pay for
- Three handles on each can. Finger handles on each nozzle, and a finger slot on the bottom of each can (rear handle on the 5 gal.). Your hands share the weight and are in a comfortable position to pour with accuracy. Our design makes it easier to hold. The top handle is for carrying

HEAVY DUTY GREASE

End result of years of research and a brand new technology. This is the only grease we've found that completely recovers after being extremely overheated. It's virtually wash-out proof (goes off the chart for high speed bearings) and lasts up to four times longer than conventional lithium grease. Fortified with an extreme pressure additive package, it exceeds OEM "Lube for Life" specifications.

WATER WETTER

- Unique agent for cooling systems that doubles the wetting ability of water
- Rust and corrosion protection allows for use of straight water in racing or reduced antifreeze levels in warm climates
- Improves heat transfer and reduces cylinder head temperature
- May allow more spark advance for increase power and efficiency
- Use one bottle for most passenger cars and light trucks, treats 3 to 5 gallons or 13.2 to 15.9 liters. Vehicles with larger cooling systems should use two bottles. Small cooling systems should use 1oz (3 to 4 capfuls) per quart
- Compatible with new or used antifreeze (including DEX-COOL™ and long-life versions) to improve the heat transfer of ethylene and propylene glycol systems
- Satisfies ASTM D2570 and ASTM D1384 corrosion tests for glycol-based antifreezes

Description		WPS#	List

S-4M 4-CYCLE LUBRICATION

Made using highly refined petroleum oils designed specifically for snowmobile engines. It utilizes a unique blend of specific additives and polymer systems that resist high shock loads, high temperatures, shearing and eliminates deposits. S-4M formula also includes our proprietary MPZ® additive that provides the highest degree of anti-wear and anti-friction for superior component life and engine performance.
Recommended for use in air cooled or liquid cooled snowmobile 4-cycle engines commonly found in Arctic Cat®, Polaris®, Ski-Doo®, Yamaha® and other snowmobile applications.

S-4SR 100% SYNTHETIC 4-CYCLE LUBRICATION

S-4SR Snowmobile 4-cycle oil with NASCAR® proven technology is a 100% synthetic formula designed for high stressed 4-cycle racing engines in the most severe conditions. S-4SR is an MPZ® fortified formula that offers the ultimate in viscosity control, anti-friction, anti-wear and improved power output. It is formulated to reduce engine temperature and wear from high load conditions. A selective additive system and polymer chemistry also provides anti-oxidation, anti-foam, and anti-rust features to keep engines protected. S-4SR offers the best protection for engines running at high RPM, high temperatures and under extreme loads or endurance type conditions.
S-4SR is recommended for use in air cooled or liquid cooled snowmobile 4-cycle engines commonly found in Arctic Cat®, Polaris®, Ski-Doo®, Yamaha® and other snowmobile applications.

ENZYME FUEL TREATMENT

CURES AND PREVENTS ETHANOL FUEL PROBLEMS

Unique enzyme formula prevents phase separation and fuel gelling by breaking down water and sludge to sub-micron size particles allowing it to be safely burned away during normal engine operation, eliminating ethanol fuel problems.

- Safe for all 2 and 4 cycle engines
- Stabilizes fuel for up to 2 years
- Rejuvenates old fuel
- Removes carbon and varnish
- Improves fuel economy
- Cannot be overdosed
- 8oz bottle treats up to 48 gallons of fuel
- 16oz bottle (**highly concentrated**) treats up **256** gallons of fuel

ADHESIVES AND THREAD LOCK

ThreeBond

A
Low Strength Thread Lock #1342: Perfect for small screws and bolts with applications that require a force of only 10-20% greater than used for tightening.

B
Medium-Strength Bearing and Stud Thread Lock #1333: Retains high-strength properties for bearings and studs. Apply heat to soften for easier removal.

C
Medium-Strength Hi-Temperature Thread Lock #1360: Incorporates anaerobic locking agents, and a heat-resistant element for sealing engine and exhaust parts.

D
Hi-Strength Thread Lock #1303: For various threads, bolts and joints which must remain secure.

E
Liquid gasket #1184: Excellent padding properties make this semi-drying sealer perfect for joint surfaces with large clearance. The synthetic rubber absorbs vibrations and impacts without failure, especially when coolants are involved.

F
Silicone liquid gasket #1211: Silicone rubber. Perfect for sealing complex 3-point surfaces. 100% effective for temperature ranges of -60° to 250° C.

G
Synthetic Rubber Adhesive #1521: Rubber-based contact cement for flexible hold to bond rubber, plastic, vinyl, metal, leather, wood, ceramic etc. Sets up in 5-10 min. Waterproof.

H
Super Glue #1742-B: Attains practical use strength in seconds. No evaporative elements and no shrinkage to weaken bonding. Excellent for nonporous materials.

I
RTV Sealant (grey): For sealing against oil and coolant leaks. Highly resistant to heat and cold. OEM specified for use on Motorcycles, ATV, UTV and Snowmobiles.

J
Gasket-Maker (black): High viscosity, high performance, high heat. OEM specified, non-slumping paste highly resistant to oils, chemicals and coolant. Effective in vibrating conditions, containing strong adhesion properties.

K
Liquid Gasket (grey) Solventless silicone sag type. Use in case to case Where NO GASKET is used.

L
Formed-In-PLace (dark grey) Engine RTV, formulated as a high performance temperature vulcanized silicone.

M
Grip Lock #1501CT100: A high strength adhesive specially formulated to keep grips in place without damaging the rubber. Ideal for Snowmobile, Motorcycle, ATV and Personal Watercraft.

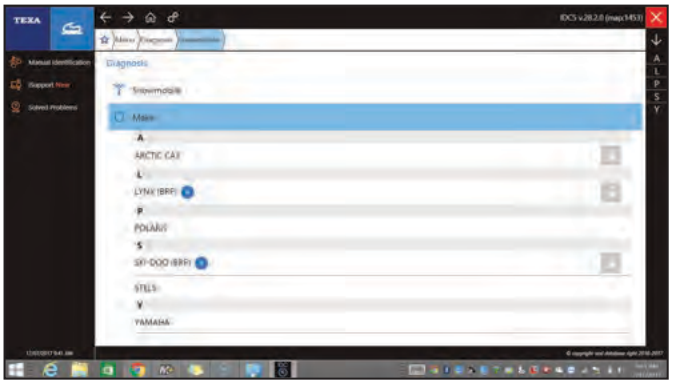
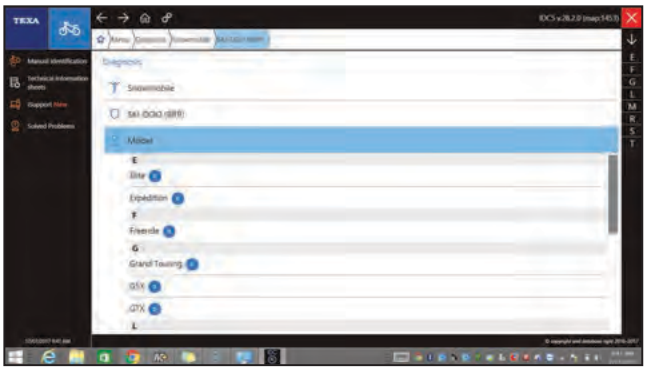
DIAGNOSTICS TOOLS

With Texa, any repair shop can now scan most brands of powersports machines. Texa is a diagnostic solutions company that specializes in scanning/ diagnostics of motorized machines. Once the machine is plugged in, you can do anything from program keys, check fuel injection, check fault/ trouble codes, ABS codes, even transfer data from old cdi to new cdi units, and more. You can either enter the specific machine, or, the scanning process can also give you vehicle data such as vin#, year, make, model. The software program scans all accessible control units on the machine. On completion of the scan, any detected errors will be displayed along with relevant error codes and descriptions. It also lets you read and reset errors with a single click! You can even run autodiagnostics on selected systems directly from the error detection screen.



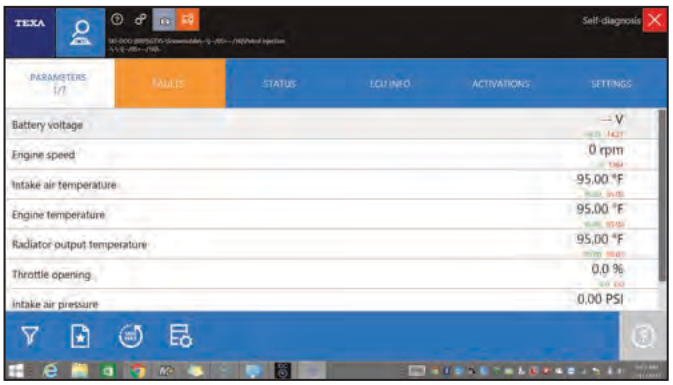
TXB Portable Tool

HOW TO SCAN THE MACHINE:



- Using the Navigator TXB tool will scan/ read the diagnostics and then transfer the data to a Windows based device via USB or Bluetooth. The TXB allows for complete and quick diagnosis and is provided with an advanced technology which allows for recording of diagnostics tests while the machine is moving, i.e. test drives/ dynamic tests. TXB includes the latest generation Bluetooth and is supplied with a user manual. Navigator TXB is required to scan diagnostics

SOFTWARE / SUPPORT PROGRAMS:



- The Navigator TXB Starter Kit will come installed with the latest powersports software program which will cover snowmobiles, most motorcycles, ATV/UTV, and pwc. This will also include the initial first year of software updates.
- After the first year of software subscription (included with TXB tool), additional software programs will be ordered through Texa directly.
- Support program is a yearly subscription service available directly through Texa. Support program will include any needed software installation, training, and tech support/ assistance. The yearly fee is $400 and will be collected at the time Texa's account rep contacts the dealer to set up delivery and training.

CruzTOOLS® SOCKET BIT SETS

Motorcycles, ATVs, snowmobiles, and personal watercraft make widespread use of set and cap screws that require hex ("Allen") and Torx® wrenches. Such fasteners are very vulnerable to damage from tools with loose tolerances and/or inferior materials.

Every rider should have a comprehensive set of socket bits for home, pit, or mobile use. Our three new sets are professional tool quality, yet priced to meet any budget. Socket bodies are polished chrome, and bits made of a heat treated chrome vanadium alloy that exceed ANSI standards. Unlike most socket bit sets found elsewhere, all sockets are 3/8" drive so you only need one ratchet or T-handle for all sizes. A reverse laser imprint provides for easy size identification. To help keep your socket drawer organized, each set ships on a rail with handle. Tools are lifetime guaranteed.

SERVICE DEPARTMENT ASSORTMENTS

The Service Department Assortments are the perfect way to keep your hardware organized. These kits stack together to save space and include easy-to-read descriptions and part numbers for each compartment, so you can re-order only the hardware you need as you need it! Each Service Department Assortment contains only hardware that is actually used on motorcycles in factory style size and finish, no filler hardware to clutter your shop. Each kit carries over 300 pieces of hardware that you will use everyday.

Allen Bolt Service Department Assortment contains 352 pcs of the socket head, button head and fairing bolts your shop needs in a clear, stackable organizer.

Flange Bolt Service Department Assortment contains 360 pcs of M6 and M8 hex flange bolts in factory style and finish in a clear, stackable organizer.

Euro Style Service Department Assortment contains 316 pcs of factory style Dacromet plated flange bolts, aluminum bushings, Brembo style brake pin clips and more that your shop needs in a clear, stackable organizer. KTM service providers will love this kit!

Nuts, Washers, Screws & Cotter Pins Service Department Assortment contains 410 pcs of metric size t-nuts, fuji-locking nuts, flange nuts, washers, screws and cotter pins in a clear, stackable organizer.

Drain Plug Washer Assortment contains 50 of each size of our crush washers in a clear organizer. OEM's recommend replacing drain plug washers at each oil or coolant change. It contains 50 each of the following items:

- M14x22.3 aluminum crush washers
- M12x20 aluminum crush washers
- M10x18 aluminum crush washers
- M10 "Banjo Bolt" aluminum crush washers
- M8x15 aluminum crush washers
- M6x11 copper crush washers

CRF Drain Plug Washer Assortment contains (3) M6x11mm soft tempered copper sealing washers and (6) M8x15mm soft tempered aluminum compression washers. Honda recommends replacing sealing washers at each oil change.

TRAILER PRODUCT CONFIGURATOR BY CALIBER

Are you looking to update your old trailer? How about accessorizing your trailer? Caliber Trailer Accessories and WPS have come up with an online trailer configuration tool to assist you. This tool is a must for rental companies with different lengths and types of trailers. First you enter the specs of your trailer, open deck or enclosed, length, and type of trailer nose. Next, you click on the different areas of your trailer and pick the different types of Caliber Trailer Accessories you would like to install. Then, Caliber will show you an image of what your trailer looks like once it's fully accessorized with everything you pick. When you have picked everything and like what the trailer will look like, print the page out and it will have the WPS part numbers and recommended quantities for the Caliber items chosen. It literally takes all the guess work and measuring out of trying to figure out what you need for your trailer. Simply go to this website and your just a few short clicks away from seeing what your fully decked out trailer will look like with all of the quality Caliber Trailer Accessories.
