ALUMINUM REAR SPROCKETS

- Computer-designed to meet your ATV needs

- Sprockets are constructed from 7075-T651 aluminum and hard-anodized black for superb strength and light weight
- Moose's non-grooved design means more aluminum stays in contact with the chain for longer sprocket life
- Made in the U.S.A.

CHROMOLY STEEL FRONT SPROCKETS

- Machined from impact- and wear-resistant chromoly steel
- Inner splines are broached to provide maximum spline-to-countershaft contact; this helps distribute driveline forces over the largest possible area
- Heat-treated, then finished with a nickel coating for corrosion resistance and lubricity
- See price list on page 545
- Made in the U.S.A.

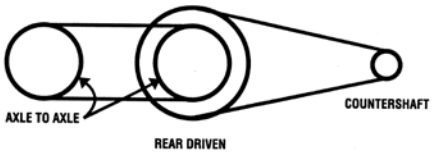
JT SPROCKETS

- Computer designed to achieve ultimate strength at minimum weight
- JT combines leading-edge technology with top materials to produce the ultimate quality sprocket range with unbeatable value
- Every sprocket meets or exceeds the highest possible quality standards
- Sprockets are heat-treated and beadblasted to reduce material surface tension
- Front sprockets are made with top-quality Japanese C45 high carbon steel and SCM415 chromoly steel alloy
- Steel rear sprockets are made with top-quality Japanese C45 high carbon steel
- Aluminum rear sprockets are made with high-strength Austrian 7075-T6 anodized aluminum
- JT aluminum sprockets are about 30% lighter than a comparable steel equivalent, which reduces un-sprung rotating weight and improves performance
- Lightweight front sprockets available for some applications

RUBBER CUSHIONED FRONT SPROCKETS (FOOTNOTED)



- Used by the major Japanese motorcycle manufacturers since early 1990's to dampen the chain impact on the teeth of the front sprocket
- These same sprockets are now available to the aftermarket for some models
- Quality, design and OEM proven technology are the same as what is supplied to the motorcycle manufacturers

NOTE: When installing sprockets which differ from the OEM size, check for proper clearances before operating.

BALL JOINT AND KING PIN KITS

- Ball joint kits are sold per A-arm and come with snap ring and cotter pin
- King pin kits (used in applications where a king pin was used rather than a ball joint) include all bushings, pins and seals needed for repair
- Ball joints feature heavy-duty steel cases with POM-M90 bearing material for long life
- Put an end to premature Honda ball joint failure by upgrading from the OEM aluminum joint to our heavy-duty steel joint
- Inexpensive replacement for those Kawasaki and Suzuki applications that otherwise require purchase of a complete A-arm or steering knuckle

UTV FOX PODIUM SHOCK UPGRADE KIT

FOR POLARIS

STAGE 1 DUAL-SPEED COMPRESSION ADJUSTER (DSC)

- The DSC allows you to fine tune your RZR to a wider range of driving styles and conditions
- Adjust the shock's high and low-speed compression damping by simply turning the external adjusters
- Allows you to maximize small bump compliance and traction, while keeping the extra damping for big hits

STAGE 2 REBOUND CONTROL WITH RACING TECHNOLOGY

- The rebound adjustment allows you the ability to fine-tune the shock's rate of return after compression, which maximizes traction
- Provides a higher level of ride comfort and control

SPRING UPGRADE KIT

- Developed for the RZR-S
- Targeted towards the aggressive dune or trail rider
- Greatly reduces body roll and bottom-out, which increases stability and control
- Installation tools available separately

SHOCK REBOUND SEPARATOR VALVES

0450-0093

- Replace the stock shaft nut with an asymmetric valve to offer different flow rates for compression and rebound
- The stock, low-speed rebound adjuster flows at the same rate during compression and rebound, which makes the lowest speed damping too mushy, causing bottoming and an unresponsive feeling during long duration hits; shock rebound separator valves correct this issue

IRON ALLOY VALVE SEATS

Kibblewhite Precision Machining — Manufacturer of Valvetrain Components

FOR STEEL VALVES

- Premium valve seats for applications using steel valves
- A specific combination of alloys allowed a creation of a high density, iron-based valve seat with uniform hardness, exceptional thermal qualities and high resistance to wear and recession caused by microwelding
- Only by using the latest developments in powdered metal technology were we able to blend these alloys to give a seat material with the qualities required for today's engines
- These seats have been tested on the track and street in high-rpm applications with leaded, unleaded, and oxygenated fuel, as well as methanol, ethanol, nitrous, and forced induction applications
- Sold each
- Made in the U.S.A.

NOTE: All applications listed use two intake and two exhaust seats unless otherwise noted.

NOTE: Verify size before ordering.

HIGH-PERFORMANCE PISTONS

- Forged from high-silicon aluminum alloy for maximum strength and dependability
- Wiseco offers a complete range of popular piston models and years for both trail and racing applications

Formula for computing cubic centimeter displacement

D = Bore Size in Inches; S = Stroke in Inches; Number = Number of Cylinders

D(2) x .7854 x S x N x 16.387 = CC Displacement

WISECO FEATURES PRO-LITE PISTONS

- Durability, longevity and increased horsepower
- Innovative forging design and piston skirt provide maximum horsepower and torque

PK PISTON AND GASKET KITS

- Contain all the necessary components for overboring or rebuilding your top end
- Feature forged pistons, rings, wrist pins, circlips and top-end gasket set
- Cylinder sleeves must be purchased separately
- See price list on pages 840-841

4-STROKE RACER'S CHOICE PISTONS

- Now you can own the same race parts as all the top race teams
- These high-tech piston designs offer maximum compression ratios, ultra-stiff strutted forgings, and titanium nitride-coated rings, which all add up to more power that is sustained longer
- When blow-by starts to increase on other pistons and power starts to fade, Wiseco Race Series parts continue sealing and performing

NOTE: Service intervals may be increased with Racer's Choice pistons over conventional Wiseco pistons, and are for expert racers and tuners only.

WISECO PISTON PRICING

- All Wiseco High-Performance Motorcycle Pistons are priced with rings and circlips; see price list on pages 840-841

VERTEX PISTON POWER

PISTON KITS, RINGS, WRIST PINS AND CIRCLIPS

- All pistons are heat-treated with a T-5 hardening and tempering cycle
- All piston skirts are coated with a high-tech Molybdenum Disulphite coating for faster break-in time and increased piston life
- Cast piston kits are gravity-cast aluminum alloy (not forged) with 18% silicone content, which produces an extremely light but very strong piston
- Forged pistons are forged from 2618 aluminum for superior strength and durability
- Forged High Compression pistons improve power and torque across entire rpm range
- Big Bore pistons increase engine's displacement, torque, and peak horsepower
- Forged Replica pistons are forged OE replacements
- Replica pistons and all rings are OEM replacements
- Kits include piston, rings, wrist pin and circlips
- Replacement two-stroke piston rings sold individually; four-stroke piston rings sold as a set

NOTE: Top End Kits include Piston Kit and a Top End Gasket Kit, top-end bearing and cam chain.

HI-PERFORMANCE ATV GASKETS AND SEALS

- Gaskets and gasket sets used by professionals in high-performance machines and as OE replacements worldwide
- Each PART # contains the proper amount of gaskets for one application
- Made in the U.S.A.

TOP AND BOTTOM END GASKET KITS

- Top end gasket kits include correct base, head gasket and cylinder O-rings as well as other top end specific O-rings or seals needed for R&R of top end
- Bottom end gasket kits include correct oil seals, O-rings, drain plug washers, water pump cover gaskets
- Materials will vary depending on what is correct and engineered for specified application
- Purchase a top and a bottom end gasket kit for a complete gasket kit when doing a total engine rebuild
- Some kits available with clutch and magneto cover gaskets made from EST material instead of fiber; see chart

EXHAUST GASKETS

- Made for extreme temperatures
- Gasket material and construction will vary by application to ensure longevity with leak-free performance under all conditions

CLUTCH AND STATOR COVER GASKETS

- Clutch and stator cover gaskets are made from an AFM material which is a chemically blown, compounded nitrile synthetic rubber bonded to an aluminum core
- Aluminum core gives the gasket strength for a superior seal and prevents the gasket from weeping or crawling out in today's engine cases with limited sealing surfaces
- No sealants required for installation
- Save service time as AFM will not stick to the engine case making replacement quick and easy, no more scraping

VALVE COVER

- Valve cover gaskets are made from application specific materials to ensure longevity and correct fitment for a leak free seal
- Provides quality, high-tech sealing solutions at a cost less than the OEMs
