CLUTCH KITS AND CLUTCH SPRINGS

CK STANDARD SERIES CLUTCH KITS

- Cork-based clutch material impregnated with aluminum particles to increase wear life and heat resistance
- Highly compressed construction avoids swell and clutch drag
- Ideal for general-purpose street/sport/touring bikes
- Kit includes complete engine set of friction plates only

CKF CLUTCH KITS

- Kits have carbon-fiber impregnated friction plates
- Tough clutch plates extend engine life, improve drive, increase the heat threshold of the clutch and improve rider feel
- Available for select applications, see chart

DRC SERIES CLUTCH KITS

- Anti-swell, alloy-impregnated heavy-duty cork-based facings for smooth clutch take-up
- Allow modulation, unlike paper clutches that tend to snatch
- Complete engine set of friction plates, HD springs and steel separator plates prevent premature driven plate wear, oil muddying and loss of stack height
- Built with swaged aluminum carriers that spread the load on the clutch basket and prevent clutch basket "dogging"

CK Series

CKF Series

CLUTCH DISCS

- Vesrah clutch discs are manufactured from top-grade materials that meet or exceed OEM standards
- Each disc set includes friction plates only

NOTE: Most disc set package quantities match OEM requirements. To simplify our line, however, we have eliminated some less popular package quantities and substituted sets with a greater number of discs. Please note package quantity when checking prices.

- Vesrah spring sets are made of heavy-duty steel and outperform originals
- Spring sets contain springs only

JET KITS

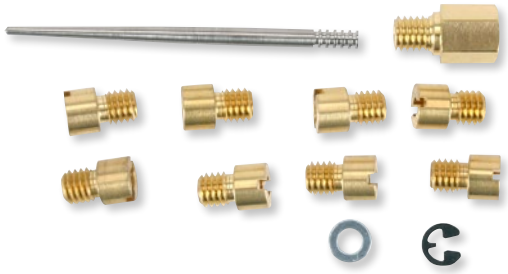
FOR UTILITY AND SPORT ATVS

STAGE 1 KITS

- Designed for ATVs with stock engines using the stock airbox, air filter and stock or aftermarket exhaust
- Fully adjustable to allow for the use of well-designed aftermarket exhausts and stock replacement air filters
- Improves throttle response and drivability
- Power increases of approximately 5% throughout the entire power range

STAGE 2 KITS

- Designed for ATVs with stock or mildly modified engines using well-designed stock or aftermarket exhausts with a modified airbox and a stock or replacement air filter
- For applications where individual air filters cannot be installed and where airbox modifications improve overall engine performance
- A power increase of 8% can be achieved in most cases



STAGE 3 KITS

- Designed for ATVs with stock or mildly modified engines using individual air filters and a stock or aftermarket exhaust
- In most cases, power increases of 10-15%; drivability may be compromised in short-stroke high-rpm motors
- On some modern engine and airbox designs, individual filters and proper jetting offer no performance improvement and compromise drivability; Stage 3 kits are not available in such cases

Deltran Battery Tender®

BMS (BATTERY MANAGEMENT SYSTEM) 12V LITHIUM BATTERIES

2113-0707

- Smarter, safer, lighter weight
- Lithium batteries provide better fuel economy, lasts four times longer, are two times lighter, 99% more efficient in charge and has a constant current versus AGM variable current
- All BMS batteries feature four terminals (two positive and two negative) that allow fitment on many powersports makes/models and also provides electrical accessory hook-ups options
- Flexible accessory blocks are also included to absorb vibration and to allow custom fitment on many different powersport models
- Includes BMS Smart battery management system that monitors, optimizes and protects the battery
- Battery management system is used to monitor battery SOC (State of Charge), optimize battery performance, protect battery from over-charge (over voltage protection), protect from over-discharge (low voltage shut-off)
- Battery Activation Wire connects Battery Activation Switch to BMS (Battery management system)
- When BMS detects possible over-charge or over-discharge (voltage below a certain threshold), the BMS will shut off the battery (cannot charge/discharge) to prevent permanent battery damage
- User can re-activate the lithium battery by pressing the Battery Activation Switch on the included Quick Disconnect Cable to allow battery to be charged again
- Quick Disconnect Cable has three terminals: one to positive, one to negative and one to Battery Activation Switch
- Fireproof coating engineered mechanism that supports high current flow during voltage discharging to provide thermal protection
- LiFePO4 Cell High performance UL1642 certified LFP cell
- IP67 bottom case engineered material with high melting point

NOTE: User is recommended to use Battery Tender Lithium Charger to recharge the lithium battery.

IRIDIUM SPARK PLUGS

BETTER METALS MEAN BETTER SPARK PLUG DESIGNS

- Six times harder than platinum, iridium doesn't melt in temperatures up to 4,000°F
- Because the iridium electrodes of these plugs can be shrunk to only 0.4mm, voltage requirements decrease while firing performance improves
- 360° laser welding of electrode provides a seal that resists wear even in the worst conditions
- Ground electrode features a tapered cut and U-groove that form a large volume area for the flame's center
- Use NGK reference chart to order and stock these plugs

E3 RESISTOR SPARK PLUGS

- Unique electrode shape maximizes the power created by the spark plug – Diamond Fire technology
- Electrode is a combination of performance and technology that results in an improved flame kernel shape
- This flame front ignites the bulk air/fuel mixture faster, moves heat into the combustion chamber faster and creates a more localized pressure front for faster pressure rise during the cylinder power stroke
- The result is more complete combustion and an improvement in engine performance
- A truly premium performance plug
- Sold each

STARTERS

- Affordable starters are constructed with longer-life bearings than OEM
- Many OEM starter motors have an unprotected output needle bearing on the outside of the output shaft's seal; moisture can and does enter the output cap of the electric motor and follows the armature shaft to the unprotected output needle bearing, which corrodes the bearing
- Rick's takes the extra step of installing a double-sealed ball bearing, with the output shaft seal on the outside of the bearing in their new aftermarket unit
- This simple application of common-sense engineering does two things: first, the outside bearing is now protected from damaging water entry, and second, the sealed ball bearing is replaceable

RELAYS

- Direct replacement relays by the original manufacturers, not reproduction units
- Each relay is the exact same voltage and amperage for a worry-free installation
- These relays are used to control functions like the fuel pump, power steering, cooling fan, EFI, etc.
- Most machines use multiple relays and are located in the fuse box

KILL SWITCH HOW TO ORDER

NOTICE TO CUSTOMERS: There are two types of stop switches: (1) Normally Open (NO) or (2) Normally Closed (NC).
Switches in this catalog are typically of the Normally Open (NO) type. They work by GROUNDING the primary ignition lead when activated.
Note that they will not work on electrical systems requiring a Normally Closed (NC) switch, which works by OPENING the circuit when activated. NC switches are typically used on battery type ignitions, which may have an ignition key as an identifier. NC switches are generally found on newer machines. If in doubt, check your machine's wiring schematic.

HIGH-PERFORMANCE HALOGEN BULBS

PIAA bulbs are engineered with XTRA Technology for greater performance per watt than any other bulb on the road. XTRA is a term coined by PIAA to designate a high-efficiency bulb that is designed to produce greater light output than its rated power consumption (i.e. 55W = 85W of light output). Greatly enhance your ability to see and be seen. A metal bond holds the heat-resistant glass tube securely to prevent cracks and leaks. A welded focus ring and one-piece filament support assure proper positioning.

XTREME WHITE/XTREME WHITE PLUS

- Xtreme White Series of bulbs have a cool white light output that gives the driver better color recognition and depth perception and better contrast than stock halogen lamps
- Blue top coat adds a slight blue tint to lamp
