GPSMAP 276Cx

If you're a jack-of-all-trades, you need a GPS navigator that's as versatile as you are. Take a look at the GPSMAP 276Cx. With a large 5-inch display, versatile cartography, connected features and flexible power options, it has the capability to function the best way for you.

The Mapping You Want

- Almost anywhere you want to go, GPSMAP 276Cx has a compatible map to take you there. It comes preloaded with worldwide basemap and includes a free 1-year BirdsEye Satellite Imagery subscription. It also supports a variety of other mapping options such as Garmin TOPO maps, Garmin HuntView™ maps, BlueChart® g2 HD marine charts, turn-by-turn directions on City Navigator® NT, Garmin Custom Maps, raster maps and vector maps.

The Connected Navigator

- In addition to GPS and GLONASS reception, GPSMAP 276Cx is ANT+® compatible for the integration of external sensors like the Tempe™ ambient temperature sensor. You can even connect it to Wi-Fi® for over-the-air updates and Garmin Connect™ database syncs. Pair with your compatible mobile device[1] for additional features like LiveTrack and smart notifications[1].

Tough and Ready

- GPSMAP 276Cx was designed for your rugged lifestyle. You'll navigate with confidence by seeing clearly on the large 5-inch sunlight-readable screen. The navigator's flexible mounting lets you keep the device exactly where you need it. Operate GPSMAP 276Cx with its reliable push-button controls that resist dirt, dust and grit, and best of all –– keep all your maps on hand with 8 GB of internal memory, expandable by a microSD™ card (sold separately).

More Power Options

- Get peace of mind knowing that the GPSMAP 276Cx GPS navigator is going to be ready when you need it, now that there are more ways to power your device. It features in-unit charging with an included lithium-ion battery pack and even has the ability to use standard AA batteries.

276Cx ALL-TERRAIN GPS NAVIGATOR

- Internal antenna with GPS and GLONASS satellite reception for tracking in more challenging environments than GPS alone; for better reception in vehicle interiors add an external antenna (sold separately) to the built-in MCX connector
- Built-in worldwide basemap and free 1-year BirdsEye Satellite Imagery subscription
- Supports Garmin TOPO maps, Garmin HuntView™ maps, BlueChart® g2 HD marine charts and more
- Supports Active Weather forecasts and animated weather tracking
- Pairs with your compatible smartphone[1] for automatic uploads, smart notifications and more

Includes:

- 1 year BirdsEye Satellite Imagery subscription[1]
- AMPS powered mounting bracket with marine bail mount
- Lithium-ion rechargeable battery pack
- USB cable
- AC charger
- Quickstart Guide

SENA FREEWIRE

Bluetooth CB AND AUDIO ADAPTER FOR HARLEY DAVIDSON & HONDA GOLDWING

With the new FREEWIRE when you connect it to your Harley-Davidson or Honda Gold Wing, you can utilize all the bike's Infotainment features WIRELESSLY! Communicate with the CB radio, hear turn-by-turn directions from the bike's GPS, rock out to your favorite radio stations and so much more – all thru our Bluetooth headset. Use an additional FREEWIRE for your passenger to talk over the motorcycle's internal intercom system. This is the item Harley & Gold Wing riders have been looking for.

***IMPORTANT:** This item is compatible with the 20S and 10S models (10R, 10C, and 10U) with current firmware update. (Firmware update coming)

***IMPORTANT:** This unit is only compatible with Harley Davidsons that have the 7 Pin Din plug on the tank console or dash. For Harley Davidsons that do not have the 7 Pin Din plug accessible on the front of the bike, a specific Harley Davidson audio/ communication cable is required. The Harley Davidson connector cable kit part number is 69200865. This part number is available online or at Harley Davidson dealerships.

*IMPORTANT: Goldwing kit includes 5 Pin Din Plug

IS COOLING CASES

Protects the smartphone's battery and maintains it at the right operating temperature up to 40°C thanks to its built-in ventilation system. During the summer, smartphones are exposed to the sun's UV rays. These rays create an accumulation of heat and gas in the smartphone's battery.
In some extreme cases, the smartphone can no longer work and displays a message, asking the user to cool his device to continue to use it...

- IS COOL allows the battery to maintain the perfect operating temperature and preserve the life of the phone
- Built-in Air ventilation system

MGP EXHAUST

Desire that aggressive look of a Grandprix Growler Exhaust System? Needing a little more mean to your lean bike? If so, you've come to the right place! Hotbodies Racing has a great solution and a price that's kind to your wallet. Our NEW MGP Growler inspired exhausts will scare the competition with its deep growl of power and performance while showing off Hotbodies' famous aerodynamic styling.

Available in carbon fiber, stainless or carbon fiber w/stainless end cap this compact MGP Growler exhaust bolts on your ride with zero modifications, giving you the look of a polished Grandprix model. Complimented by Hotbodies' sleek Undertail this MGP exhaust will give your bike a 'direct from the race track' look.

Full systems and catalytic convertor eliminating slip-ons are not legal in California on pollution controlled vehicles for highway use unless noted. May not meet local sound requirements, check local laws before installing. Race waiver available.

PowerTIP P-Series

Many municipalities and tracks have begun to implement new, tougher regulations that limit the sound output of street bikes, off-road cycles and ATVs. In the interest of health & safety and of maintaining good relationships between riders and the non-riding community, Two Brothers Racing has developed a series of highly effective sound reducing tips which can help everyone to get along.

Two Brothers Racing's unique muffler packing is a crucial performance part. When fresh, it allows your top-level exhaust system to deliver power efficiently while producing the best custom sound from your machine. New packing also ensures your custom exhaust system lasts for years. Every TBR muffler is hand-packed with our high-quality damping material at our factory, and you can have the same, new-system results every time you service your muffler. Our complete Repack Kits include everything you need to restore your Street, MX, or ATV muffler to factory-fresh performance levels. We recommend replacing the packing after every 10 hours of use.

PERFORMANCE SERIES EXHAUST

- Designed and produced by VooDoo Industries for the demanding motorcycling enthusiast!
- Mandrel bent stainless steel for a perfect fit
- Mufflers are finished in either show polish or black with a laser etched VooDoo logo
- All mufflers include a rebuildable perforated stainless steel baffle core and all clamps/brackets needed for installation
- All exhausts listed are slip-ons unless noted as a full system

Any “add-on” or “modified” emissions-related parts contained in this catalog that are subject to anti-tampering laws may or may not have been evaluated and/or exempted by CARB. As a distributor, WPS makes no representation or warranty with respect to whether the emissions-related parts in this catalog are legal for sale, installation or use in any state unless the part is installed in a vehicle used only for closed-course competition. Consult with the manufacturer as to any such exemptions before purchasing any add-on or modified emissions-related parts for non-competition use in California or elsewhere.

Full systems and catalytic convertor eliminating slip-ons are not legal in California on pollution controlled vehicles for highway use unless noted. May not meet local sound requirements, check local laws before installing. Race waiver available.

YOSHIMURA

SIGNATURE SERIES

Introducing Signature Series by Yoshimura - an offering of exhaust systems that a dealer can install with confidence. Our Signature Series lineup is the answer for today's dealer who is faced with a challenging marketplace. The applications for the Signature Series line cover the entire powersports spectrum, including many of our off-road applications. Everyone of our Championship Winning Motocross exhaust systems and nearly all of out ATV/Side-by-Side applications are all members of the Signature Series Family. All Signature Series components are tested, documented, and marked as required by federal and state regulations.

STREET SERIES

All Street Series systems are Slip-on/Bolt-on applications that do not require tampering with the vehicle's emissions control system, yet still deliver that special spirit the world has come to expect from the legendary company known as Yoshimura. Street Series applications cover all of the iconic profiles that Yoshimura has become famous for. From the legendary tri-oval profiles to the refined carbon fiber R-77 mufflers, and even our R-55 angular masterpieces. Our Street Series exhaust offer street-legal options for almost everything on two wheels.

ENDURO SERIES

In the Mid 90's Yoshimura didn't go to the dirt; the dirt came to Yoshimura. Enduro Series systems are an evolution of Yoshimura's early off road efforts crafting off-road exhaust systems. The Enduro Series are all equipped with USFS-approved spark arrestor, forest-friendly noise levels, and are tailpipe emissions compliant.

RACE SERIES

FOR CLOSED COURSE COMPETITION ONLY; NOT INTENDED FOR STREET USE
If you're looking for that competitive edge, look no further than our Race Series. These exhaust systems are designed with nothing but power in mind. Each Race Series system is developed in accordance with noise compliance regulations imposed by most racing sanctioning bodies worldwide.

YOSHIMURA

MUFFLER GUIDE: ROAD

The full systems are designed with nothing but power in mind. Our knowledgeable R&D technicians use their years of experience and expertise to make truly remarkable pipes. In addition, we have more pipe-bending tooling than any company in the business, allowing us to create the best systems available – period. Slip-Ons are designed to utilize the stock OEM header. Depending on applications slip-ons are available as a bolt-on directly to the flange of the OE tail pipe, or with a Yoshimura tail pipe to mount the collector of the OE header. Our list of innovations is long and growing, highlighting the fact that some companies are just discovering certain manufacturing techniques and technology we've been perfecting for 40 years, such as our duplex systems. Compare Yoshimura exhaust systems to the competition and you'll see there's simply no match for their quality and attention to detail, which gives you confidence that you're going to get a perfect fit and outstanding performance.

MUFFLER BRACKETS

Dropping weight is one of the most efficient ways of improving lap times on the track. If you have a Yoshimura exhaust system, why not take weight savings to max with this lightweight aluminum muffler bracket?

- Aluminum muffler bracket kit is designed for use with Yoshimura exhaust systems only
- Replaces heavy, bulky stock units and provides a secure mount for your Yoshimura exhaust system
- Laser cut from high-grade aluminum
- Powdercoat finish

DUAL SPORT/ENDURO EXHAUST

POWERCORE 4

- Contructed of stainless steel with a lightweight alloy can
- Space Age internal packing for maximum packing life
- Hi-Flo modular end cap
- Internal shape of core uses Hi-Flo technology
- Enhanced sonic evacuation provides for higher flow and increased power
- Includes removable spark arrestor

POWERCORE 4 HEX

- Overall increase in power and torque.
- Durable stainless steel and aluminum construction.
- Space Age internal packing material for maximum longevity.
- Internal shape of core uses Hi-Flo technology.
- Enhanced sonic evacuation provides for higher flow and increased power.
- Includes removable spark arrestor.
- Can be used with FMF or Stock OEM Header

"Q4" AND Q4 HEX 4-STROKE EXHAUST

- Incorporates internal baffles, chambers and Space Age soiund-absorbing materials to accelerate exhaust flow with less noise and minimal power loss
- Well under the 96db sound output on most machines to satisfy strict sound requirements
- U.S. Forestry Approved spark arrestor with maintenance free, stainless steel spark arrestor screen
- Q4 Hex exhaust is only available for “Current Models” listed

Some offroad models may contain emission control devices. Some aftermarket parts may remove these devices. Removal or modification of such devices is illegal in the State of California unless used exclusively for closed course competition use ONLY, never to be used on public lands or highways.

DUAL SPORT/ENDURO MEGABOMB & POWERBOMB HEADERS

MEGABOMB HEADERS

- Megabomb is the next evolution in powerbomb technology
- Substantial power increases everywhere
- Constructed of extremely lightweight materials

POWERBOMB HEADERS

- Tuned for bottom to mid performance
- Powerbomb headers are the front runner in performance headers
- Designed for full service access to oil filter

Some offroad models may contain emission control devices. Some aftermarket parts may remove these devices. Removal or modification of such devices is illegal in the State of California unless used exclusively for closed course competition use ONLY, never to be used on public lands or highways.

BMW SPROCKET COVER

BMW S1000R AND S1000RR ALL YEARS

This lightweight Front Sprocket Cover is a great alternative to plastic OEM covers. It not only adds a noticeable amount of race class to your motorcycle, but functions exceptionally well. The CNC machined aluminum cover with carbon fiber backing, mounts closely to the sprocket and surrounding area, which eliminates virtually all chain grime from being flung out from the sprocket.

- Lightweight full-coverage design helps eliminate flying chain grime
- Carbon fiber backing plate and splash guard
- Provisions to route Kickstand Sensor Cable securely around the perimeter of cover
- 6061-T6 Aluminum CNC Machined Billet Construction
- Hard Anodized for lasting finish
- Laser-etched logo

PA2 & STANDARD FRAME SLIDERS

- Each frame slider is manufactured from a proprietary blend of composite materials to maximize the absorption of kinetic energy and minimize friction
- Shogun Frame Sliders use the latest CAD/CAM technology and are specifically designed for each model to ensure the best fitment and highest level of protection
- UV resistant frame slider material, corrosion resistant bolts, and high quality material selection keep parts looking new for thousands of miles and are proudly manufactured in the USA!
- Tested by AMA Pros, track day junkies, and weekend warriors for over a decade, Shogun Frame Sliders have a proven track record
- Shogun Frame Sliders are also available in a 3 piece kit for a convenient all-in-one package
- Replacement parts available direct from Shogun

PA2 frame sliders have all of the same features of the standard frame sliders, but include press fit black anodized inserts which helps to hold the slider in place during an impact. Replacement inserts are available in a variety of colors to match the motorcycle.

Shogun Motorsports, known for quality American made products is offering a one year free replacement parts promotion eligible on white and black frame sliders (including black bar end and swingarm spools when purchased in the full kit-one free slider replacement puck). The first frame slider manufacturer in the industry to do so! Go to www.shogunmotorsportspromo.com for details

VORTEX® V3 2.0 FRAME SLIDERS

- Vortex V3 2.0 Frame sliders are equipped with CONTROLLED FLEXION AREAS® and intelligent protections system designed to ensure that the sliders bend in certain areas to increase bike preservation by redistributing impact force away from the motorcycle frame and engine body
- Strong aluminum elements (alloy class 2017) ensure that the whole protection system will stand up to the toughest race conditions
- V3 2.0 Frame sliders are anodized matte black to avoid corrosion
- Molded impact pucks are made from special proprietary energy-absorbing material
- V3 2.0 Frame sliders are precision-made with CNC machines, each frame slider kit is made to fit specific bike models. No extra parts are needed to assemble this product when purchased properly
- Detailed assembly instructions are included, Vortex recommends that its V3 2.0 frame sliders be installed by a certified motorcycle mechanic

CASE GUARDS

- CNC-machined from solid billet
- Highest level of crash protection available
- Increasingly mandated by race organizations, Vortex case covers are not only tough, but add increased safety as well; keeping vital engine oil from spilling in a crash
- Anodized black for corrosion resistance and an attractive appearance

YOSHIMURA

CHASSIS PROTECTION

Yoshimura chassis protectors help minimize damage from sliding type falls. The plastic construction is soft enough to slow slides and will wear down slowly, but it's tough enough to keep the track away from your motorcycle in most cases.

- 2012-2013 models require cutting of the right fairing
- 6061-T6 Aluminum CNC Machined Billet Construction
- Billet components are Hard Anodized for increased durability and appearance
- Inner Sleeve features Laser-etched Yoshimura logo
- Stainless steel hardware included
- Sold as a Pair

CASE SAVERS

Yoshimura case savers are designed to minimize damage from light crashes and scrapes, and give you enough time to get back to the pits (or home) without worrying about losing oil.

- Typically install in minutes without removing the factory engine case covers, gaskets, or fairing
- 6061-T6 Aluminum CNC Machined Billet Construction
- CNC Machined Yoshimura logo
- Hard Anodized for lasting finish
- Stainless steel hardware included

YOSHIMURA

RACE STAND STOPPERS

Yoshimura is known worldwide for our attention to detail. Our 6mm Works Edition stand stoppers are a product that not only looks like a work of art, is functional too. These spools are designed to spin when engaging with the stand and make it easier to get the bike up on a stand. Made in the USA from 6061 T-6 billet of aluminum, then undergoes a special recipe of anodizing. This special process creates a diamond like surface treatment, that unlike regular anodizing, stands up to UV, and light surface scratches. Works Edition only from Yoshimura!

NEW REAR FENDER FILLER

Closes the gaps that the rear fender misses on the GL1800. It reduces flying road debris missed by the fender, reducing dust and dirt on your bike or trailer, keeping them cleaner. The flat surface created by this rear fender filler allows mounting of accessories and lights to a flat surface.

WIND DEFLECTOR KITS

NEW

A true wind deflector will deflect as much weather away from the rider pocket as possible while still allowing the ability to bring air into the riding pocket at various angles for comfort. These Show Chrome Accessories® upper and lower wind deflectors do all of this very well. The 3¾" x 9¾" upper deflector panel mounts below the mirror with a custom pivot bracket allowing 125° of rotation and allows the mirror to fully fold without interfering with the wind deflector. The lower deflector is a functional 4½" x 16½" tall panel providing great adjustability by the rider with 110° of rotation, unlike the fixed OEM version. Both are dark smoke and easy to install with only 2 mounting holes per panel.

DASH SCREEN PROTECTOR

NEW

Eliminate annoying scratches and keep your dash looking new for years to come. Easy installation, requiring only a good cleaning of your dash and applying the dash screen protection kit. Should your protector fulfill its purpose and save your dash from harmful scratches, the protector can be removed without leaving residue, allowing you to install a fresh protective layer. The clear low reflection gloss film will not obstruct your view of your instrument panel, and will keep your dash pristine.

CYLINDER HEAD COVER NEW

These engine cylinder covers close up the unsightly gap on the GL1800 Goldwing engine, hiding tubes and various exposed frame and bolts. They also cover the many recesses on the top of the engine, which are notorious for collecting sand, gravel and other road debris while riding. The satin black finish makes these engine cylinder covers virtually disappear, and will help keep your engine looking clean no matter where you ride. Mounts using existing bolts, comes with custom washers to ensure secure fit.

BELLY PAN NEW

This belly pan streamlines the undercarriage providing smoother air flow along with less wind drag and buffeting at highway speeds. It also protects softer undercarriage parts like your coolant tank. A custom engineered perforation pattern is incorporated to increase ventilation for better airflow. Made from aircraft quality aluminum and designed in 2 pieces for easier oil filter access. Edges are softened to minimize sharp edges. Made in the USA.

GT TOUR RACK

NEW

The GT Tour Rack gracefully complements the natural lines of the Goldwing trunk. Its generous 22½" x 15" overall size will easily accommodate your favorite luggage tour bag as well as allow it to be securely fastened with its no slip corner tie-down points. As with all Show Chrome Accessories® drill through racks it comes with custom recessed spacers that are tapered to allow easy matching to the trunk contour to alleviate stress cracking to the trunk lid. Large rubber washers under all spacers, inside and out protect your bikes finish as well as creating a water tight fit.

TRUNK LUGGAGE RACK

NEW

This large luggage rack was designed with the Honda Valkyrie Interstate in mind but fits perfectly on the Honda GL1800 Goldwing as well as the GL1500 Goldwing. The manufacturer's trunk specs. should be referenced for loading limits. Dimension are 24" L x 13" W x 7½" H. The hardware comes with tapered stainless steel spacers that allow the rack to easily conform to the curve of almost any trunk. These specially designed washers are recessed to allow the rack feet to sit into the spacer spreading the load over the trunk lid more equally. Rubber washers assure a water tight fit to the trunk lid. Works with OEM spoiler.

FAIRING BRA

Hopnel™ expands its popular Can-Am Spyder RT Trunk Bra Set to include 2010-2013 models. This attractive, finish saving accessory is designed to reduce the nicks, chips, and bugs that pummel the front cowl and front trunk of the Can-Am RT. This two piece Front Cowl and Trunk Bra Set has a tailored bra for the front trunk and another tailored sewn wrap for the front lower intake cowl. The Front Cowl and Trunk Bra Set greatly reduces the road rash the Can-Am RT takes, and provides a clean blacked-out look to the front cowl without covering the chrome. Both the upper and the lower bras wrap into the front trunk lip and are held securely in place with special adhesive backed hook and stitched loop. Available in black only and made in the USA.

TRAILER HITCH

Big Bike Parts® creates another invaluable accessory for the Can-Am with their new Trailer Hitch assembly for the Spyder. It has a durable black powder coat finish and mounts without removal of the rear tire or its axle. Once installed removal is easy with only six bolts to pull if you want the hitch assembly off for a special trip or occasion. Includes all hardware and instructions. A mud flap can be easily mounted with included brace brackets and mounting holes. Mud flap not included. The receiver mount has a ¾" hole for your choice of ball type. This hitch fits Spyder RT, RS, ST and GS.

Wiring Harness. Plug 'N Go electronic trailer wire harnesses and the protection they afford. Their newest Electronically Isolated Trailer Wire Harness for the Can-Am Spyder RT is no different. This harness isolates the load between the motorcycle and trailer through the use of four fully automatic circuit breakers to prevent electrical feedback. The heavy duty circuit board can handle a continuous 16 amp steady load, with further protection provided with a separate 15 amp inline fuse from the power source. Easily plugs into the OEM Can-Am RT wire harness with no on bike splicing required. Works with 5-pin trailer connectors, not included

HARD LUGGAGE

MONOKEY® OUTBACK SERIES

The Trekker Outback are cases studied especially for the off-road use. For supporting all the demands that are subject in off road, they need fitting systems and side-case holders stronger than the Monokey®. For this reason it has been studied that the new Monokey® Cam-Side system, fixes the case in four different points maintaining at the same time the possibility to release from the rack quickly. The specific side-case holders are manufactured using steeltubular with an 18 mm diameter, and are fixed to the bike in different points, in order to strengthen the structure. Besides the panel of the frame where the case is linked, it is better if the rubber supports points are moved in the perimetric zones of the case.

HARD LUGGAGE

GIVI has ventured into the adventure touring market with the new Trekker series. These aluminum/polypropylene cases utilize the patented GIVI MONOKEY® system giving a lockable, waterproof and easily removable case option. The 33 and 46 liter GIVI TREKKER series are their newest adventure touring cases utilizing a unique full and partial lid opening system. The spacious 52 liter top case does not sport the dual opening system but does allow the storage for two modular helmets where the other sizes do not. Made from a combination of polypropylene and aluminum panels, the TREKKER series with its patented MONOKEY® latching system now offer the convenience of GIVI hard cases in a more rugged style for the adventure touring motorcycle rider.

TANKLOCK BAGS

ST602

The TANKLOCK system now offers the ultimate tank bag securing system alleviating the concerns of magnetic and strap down tank bags being applied to your fuel tank. The TANKLOCK bag when combined with the appropriate make/model mounting hardware (which is a tank ring) latches directly to the fuel filler housing quickly and efficiently. Most of the TANKLOCK bags lower mechanism can be adjusted forward and backwards to enable the TANKLOCK bag to mount easily and conveniently to most motorcycle models.

SEAT CUSHIONS

AIR HAWK COMFORT SEATING SYSTEM

Developed by a pioneer in the medical industry, the technology used in the Airhawk seat cushion was originally developed to prevent pressure injuries of patients who were bed-ridden or confined to a wheelchair. By using interconnected cells, the Airhawk cushion can adapt to the individual contours of the rider, and distribute weight in a way regular seats and pads can't. The non-slip surface on the underside of the pad sits securely on the top of the seat, and also comes with attachment loops for semipermanent mounting and security.

The last mile will feel like the first!!

- Stress Relief design features reduced pressure points on the tail bone, scrotum and prostate areas
- Cell heights on front lowered for better leg passage
- Ergonomically form fitting design allows better conformity to a multitude of seat shapes and sizes
- The cover is a breathable spacer mesh cloth material w/red vinyl accent, non-skid bottom material
- The inner bladder is manufactured out of Polyurethane
- Airhawk seat cushions have a 2 year warranty

Available in six sizes:

- Cruiser R Small will fit Sport Touring, Sport Bikes, Dual Sports, Standards, and non-Touring Harleys
- Cruiser R Large Big Cruisers, H-D Touring models and non-H-D Touring models.
- Medium cruiser fits Big Cruisers, Sport Touring, Standards, and Non-Touring Harleys
- Cruiser pillion fits passenger seats of Sport touring, Dual Sport, Standards and Non-Touring Harleys.
- DualSport fits dual sport bikes as well as hard-to-fit seats where the Cruiser and Medium Cruiser are too wide and the Small Cruiser is too long

Butty Buddy

REAR SEAT PADS

Nothing will ever provide long distance riding comfort for the motorcycle passenger like a full size seat. The posterior support of a large 13" wide seating area is complemented by an ergonomically correct shape that eliminates pressure on the tail bone!

The ButtyBuddy motorcycle seat provides passengers on-demand comfort when riding on bikes with small pillions or bare fenders. The portable 3 piece seat comes with its own tote and snaps together in seconds, providing correct shape and width necessary for enjoying those long road trips. Thousands have been freed from serious numb-bun pain, and ButtyBuddy will work for you too. This isn't just another motorcycle seat pad, it's a ButtyBuddy!

- WIDTH - Butty Buddy is a huge 13.5 inches wide. That's wider than 86% of the pillions on expensive aftermarket seats. Gel pads and Air cushions cannot increase seating width
- SHAPE - Butty Buddy's ergonomic shape minimizes pressure at the tail bone. 90% of all aftermarket seat pillions are shaped wrong. Pads and cushions cannot modify seat shape
- WARRANTY - ButtyBuddy is unconditionally warranted for a lifetime. Very few expensive aftermarket seats, gel pads or air cushions dare to offer a warranty like ours

THE PREMIUM QUICK RELEASE WINDSHIELD

3-YEAR WARRANTY

Every National Cycle polycarbonate windshield, including the SwitchBlade® line, is covered by an unprecedented 3-Year Warranty against breakage!

EXCLUSIVE QUANTUM® HARDCOAT

Quantum® hardcoated

Developed for windshield use by National Cycle, Quantum® hard coat takes motorcycle windshields a "quantum leap" forward in abrasion resistance and outdoor life. National Cycle applies this crystal clear hard coating to polycarbonate material. The combined result is the strongest, most scratch resistant windshield material available worldwide.

POLYCARBONATE STRENGTH

SwitchBlade® Windshields are made from durable 4.0mm thick polycarbonate for 20X more impact resistance than acrylic. This is tough material that you can trust!

SUPERIOR SCRATCH RESISTANCE

30X more scratch resistance than typical acrylic windshields is saying a lot! Think of it as 30X more miles per windshield. Even compared to FMR coated polycarbonate, Quantum® has 10X better scratch resistance.

Award-Winning Quantum® hardcoating is used in many tough applications. It has withstood over one million windshield wipes in tests for the fully enclosed Benelli Adiva Scooter.

GLARE-FREE OPTICS

Think about riding into the sun or at oncoming headlights and not having to look through the glare of fine scratches that eventually show up on your screens. Quantum® hard coating gives your windshield much better optical definition and clarity, and your windshield will stay that way a lot longer.

SwitchBlade® national cycle since 1937

SWITCHBLADE® CHOPPED™

- A cut-down version of the popular 2-Up
- Recontoured top is 4-5" shorter (depending on model) and the trimmed bottom profile is narrower
- Excellent protection for shorter riders/low saddle heights
- High quality chromed steel and stainless steel hardware
- 4.0mm polycarbonate with exclusive Quantum® hardcoating

SELECTING THE CORRECT SWITCHBLADE® WINDSHIELD AND MOUNT KIT FOR YOUR BIKE

1. Determine your motorcycle's make, model and year.

2. Choose the appropriate SwitchBlade® Mount Kit (see application chart on page 271).

3. Determine what style windshield best fits you.
- Consider your height and saddle position.
- Determine your riding habits: Daily commutes? Long trips? Weekend rides?
- Do you want maximum protection? A sporty look? Or a combination?

4. Pick the appropriate SwitchBlade® 2-Up, Chopped, Shorty, or Deflector windshield.

Still can't decide? Get two or more SwitchBlade®s. With the Quick Release SwitchBlade® Mount Kit, you can change your windshield as quickly as you change your mind!

SWITCHBLADE® WINDSHIELD DIMENSIONS

All windshield measurements are based on this system. Sizes vary by model to afford a customized specific fit with proper clearances.
Each SwitchBlade® Windshield and Mount Kit is model-specific. These are not "universal" fitments that work fine on some models and work poorly on others. When you order the Mount Kit and any SwitchBlade® Windshield for your model bike, you can be sure it will fit like it was custom made for your motorcycle – because it was!

MOHAWK™ WINDSHIELDS

Continuing the minimalist, sporty tradition of our famous Flyscreen®, the Mohawk™ features a taller and wider size with a special 'V' profile for added wind management.

- Manufactured from FMR hardcoated polycarbonate for unbeatable strength and impact resistance
- Linking Arm fork mount system (available in chrome or black) with countersunk screws offers a custom fit for almost any motorcycle with open front forks
- All Mohawk™ windshields are dark gray tinted, 9.25" tall x 11.75" wide and include all hardware needed

If your bike is not listed in the application chart, order by mounting bracket type (universal applications).

VStream®

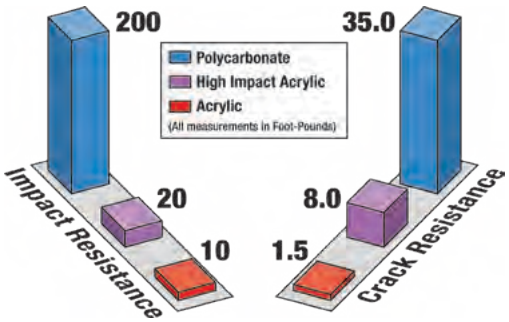
Quantum® hardcoated

Quantum® is an exclusive product of National Cycle Inc.

All VStream Windscreens are covered by National Cycle's 3-Year Warranty against breakage.

VSTREAM® WINDSCREENS

QUIET • COMFORT • OPTICS • STRENGTH



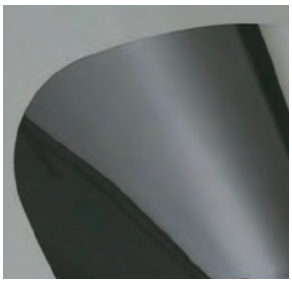
The VStream® gets its name from the unique shape and dimensional contours designed and engineered into the windscreen. The patented "V" profile helps push the turbulent wind out and away from the side of the rider's head, producing a quieter and more comfortable riding experience. This improvement also reduces wind noise and buffeting for the passenger.

- Constructed from thick, durable hardcoated Lexan® polycarbonate material
- Coated with National Cycle's exclusive scratch-resistant Quantum® hardcoating or FMR hardcoating (depending on windscreen shape and size)
- Replaces the stock windscreen on most models; for models without fairings, a mounting bracket system is included with the windscreen
- All VStream Windscreens are made in the U.S.A. and are covered by National Cycle's exclusive 3-Year Warranty against breakage

WHAT ARE THE BENEFITS OF LEXAN® POLYCARBONATE?

Outstanding impact strength! No other thermoplastic comes close to matching the impact strength of polycarbonate, making it the ideal material for motorcycle windshields. It is 20X more impact resistant than acrylic plastic (Lucite®).

So whether it's birds, bugs, rocks or road debris, for the serious rider, a strong polycarbonate windshield is very important.



REAL WORLD PERFORMANCE

Watch National Cycle's "Polycarbonate vs. Acrylic" video on YouTube™ to see the entire gamut of impact tests.

QUALITY MANUFACTURING

National Cycle engineers and manufactures the plastic and the mount systems of all their windshields. Replacement parts are readily available for years to come.

National Cycle windscreens are precision formed with smooth radiused edges.

Mount Systems are engineered for light weight, strength and an integrated OEM appearance.

VStream Windscreens are offered in Clear, Light Tint, and Dark Tint hardcoated polycarbonate. See application charts for details.

VStream®

VSTREAM® SPECIAL EDITION FOR GL1800

- Extra-large windscreen made from 6mm thick Quantum® hardcoated polycarbonate

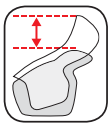
VStream® VSTREAM+® WINDSCREENS



national cycle since 1937

VStream+ Windscreens include specially designed and engineered mounting brackets that are a custom fit for each model bike. They're easy to install, require no modifications to existing components and add strength and rigidity to the windscreen mounting points. VStream+ mount brackets are polished, plated or powdercoated to match or compliment the finish of each model bike.

(2) Measured from bottom center of screen to top of screen

(3) Measured vertically from top of stock headlight shroud to top of screen

DEFLECTOR SCREEN™

Quantum hardcoated

DEFLECTOR SCREEN™

The original 2-point QuickSet™ mount Deflector Screen™ was first introduced in 1980 and became an instant hit with riders everywhere. It defined the term "universal windshield." It was then followed up with the Street Shield™, a larger screen with a 4-point QuickSet mounting system. Now there's a better reason to stock these popular windshields for your customers: They've been upgraded from High Impact Acrylic to National Cycle's exclusive Quantum® hardcoated polycarbonate – the state-of-the-art in scratch resistance – but with no price increase!

- Clear polycarbonate with Quantum® Hardcoating
- 2-point QuickSet™ or U-Clamp mount with RakeAdjust
- Height: 14.00", an excellent compact screen

SHOW CHROME ACCESSORIES

CAN-AM F3 TOURING WINDSCREEN

The Can-Am F3 gets a true touring windshield from Show Chrome Accessories®. Being touring riders, Show Chrome Accessories® knows what it takes to deliver a comfortable touring pocket and they have done just that with their touring windshield for the Can-Am F3. With this clear windshield an overall 9 ½" wider than the stock windshield and 12 ½" longer in total height, the F3 Tour/LTD gets an improved riding pocket behind the handlebars. For 2016 and newer Can-Am F3T and Limited. Made in the USA.

CAN-AM SPYDER RT TOURING WINDSCREEN

Big Bike Parts® offers the ideal replacement windshield for the Can-Am Spyder RT. After analyzing the riders air envelope, it was determined that a windshield 4 ½" wider than OEM provided the rider with the best comfort zone. To improve the known turbulence behind the windshield Big Bike Parts® designed unique anti-buffet vents to smooth out the turbulence and noise. Made from clear 5/32" DOT acrylic, this replacement windshield is an affordable improvement over OEM stock.

DUAL SPORT/ADVENTURE TOURING HANDLEBAR RISERS

The combination of off-road and on-road riding skills demand that your handlebars are at the proper level and position. Rox Risers are the premier handlebar riser for Adventure Motorcycling, on road and off. Its pivot puts your bars at your preferred position relieving wrist, elbow and shoulder stress. As you relieve these stresses, and increase control of your motorcycle so you can spend more time on your bike and enjoy the ride more.

Rox Risers are...

- Adjustable
  Dual rotation points makes Rox Riser selectively adjustable forward and back, allowing you to fit your handlebars to your preferred riding position. Rox Risers allow you to raise your stock bars or use a motocross style bar
- Universal
  With its two piece design, Rox Riser will install on virtually any Street/Mini/Off Road Bike that has clamps to hold the handlebars, making it incredibly universal
- Engineered and tested for maximum strength and durability, CNC machined from billet 6061 T6 aluminum
- Rox 1 1/8" clamping riser doubles as your conversion kit for using larger style bars on your Street/Mini/Off Road Bike with the bonus of getting the ability to adjust your bars forward and back as well as raise them up to the proper height
- Patent # US 6,920,806

2" RISE, 7/8" STEM CLAMP, 7/8" AND/OR 1-1/8" ANTI-VIBRATION RISERS

These versatile Risers allow you to clamp a 7/8" diameter handlebar or you can remove the 7/8" reducers and then clamp an 1- 1/8" aluminum "fatbar". If you are thinking of going to a fatbar after you bend your stock set or just want the versatility and option to run any bar, this is the riser to go with. Reducers lock into risers to insure no slippage between components. Anti-Vibe Risers may interfere with aftermarket large capacity fuel tanks, and some steering stem clamp configurations (use standard pivoting risers). These risers use 8mm bolts. Always check and confirm that your bike has adequate cable and brake line length before installing any handlebar risers.

2” RISE PIVOTING HANDLEBAR RISERS

A great bar position solution and common choice for the XR650L, Suzuki V-Strom, BMW GS 1150 & 1100, KLR, DR-Z and many more. Also a popular riser for anyone growing out of their current trail bike, from Honda CRF70's to Yamaha TTR125's and everything in between. Always check and confirm that your bike has adequate cable and brake line length before installing any handlebar risers.

DELUXE 2" RISE X 7/8" STEM CLAMP X 7/8" HANDLEBAR PIVOTING RISERS

This Rox Riser will fit in any application with 7/8" bars. KLR650, XR650L, V-Strom, BMW 1100 & 1150, Triumph, even the Buell's. In order to properly clamp into the Buell's triangular handlebar clamps the 7/8" diameter post was lengthened as well as the offset of the top clamps to clamp over the knurling on the original handlebar. Other changes were made to this riser to make it easier to reach your original handlebar clamp bolts. Machined from 6061 T6 aluminum. Always check and confirm that your bike has adequate cable and brake line length before installing any handlebar risers.

DUAL SPORT/ADVENTURE TOURING HANDLEBAR RISERS

PIVOTING HANDLEBAR RISERS

Rox unique patented riser design allows you to pivot the riser in the original clamps and pivot the bar orientation in the top clamps of the riser. This provides an incredible amount of bar positions for you to find the right height and pull-back for your riding position and stature. Rox Risers are incredibly universal with their 2 piece design; clamped into virtually any 1" diameter clamps and then reclamping the bar directly above that, on its original clamping area.

- Machined from 6061-T6 billet aluminum, made for 1" diameter handlebars
- Available in chrome or anodized black
- Universal (2-piece) design attaches to nearly any bar or clamping area with a 1" diameter
- Chrome risers come standard with chrome bolt head buttons
- Re-routing of stock lines and cables or longer lines and cables may be necessary on certain bikes
- 2" center to center height, sold in pairs
- Made in the U.S.A.

LOW PRO 1 3/4"RISE X 1 1/8" STEM CLAMP X 1 1/8" PIVOTING RISERS

Low Pro 1¾" center to center rise for BMW F800GS and KTM's. This riser was developed around the F800GS ABS model. Riser barely clears the stock F800GS handlebar clamps and can be pivoted to your desired fore and aft location. Note; we moved our front brake perch inboard on the handlebar 3/8" as well to relieve even more brake line and to insure proper function. When installing these risers pivoted up and back on the F800GS, spin the OEM caps 180 degrees to make the final tightening bolt the forward bolt. Low Pro Riser clears KTM clamps as well, a recommended riser for the 990 Adventure with stock lines. Low Pro Riser also has (1) 8mm tap hole in the end of the posts to mount what ever you desire. Always check and confirm that your bike has adequate cable and brake line length before installing any handlebar risers.

REV2 THROTTLE KITS

- The most advanced variable rate throttle in the world
- Innovative reel changing system lets you tailor the throttle rate to riding conditions and rider preference
- Ultra-compact housing with snap-together elbows make it easy to install and change reels
- Sleek design requires less handlebar space for lever clearance and throttle position
- Use smaller reels for slower throttle rate and larger reels for faster throttle rate
- Included cam reel provides progressive throttle response preferred by some riders
- Unique reel design allows fast reel changes
- Cable boot keeps dirt and dust out for reliable and smooth operation
- Billet aluminum inline cable adjusters for easy installation and adjustment
- Lower section of cables use 5 mm housing with PTFE liner for reduced friction, increased routing flexibility and lighter weight
- Upper section of cables use 6 mm housing to provide solid support of adjusters

Kit includes:

- Rev2™ throttle assembly with throttle tube
- Motion Pro Rev2™ black vinyl cables specifically designed for your bike, replacement cables listed are not intended for use with stock throttle assemblies
- Street/Road Race kits include Motion Pro RoadControl™ grips
- Includes 35mm, 40mm, 45mm and 50mm reels

WARNING: Improper installation could result in injury or death, it is recommended to have the Rev2 throttle kits installed by a qualified professional mechanic.

NOTES

* Closed course race application only, must use 7/8" handlebars.

** For use with stock throttle bodies/carburetors. Does not include starter/kill switch assembly or wiring, ignition/starter switch required (not included). Order 70-11980 switch assembly unless specific switch is listed for the application.

For use with stock throttle bodies, stock reel is 33.4mm. The stock throttle housing has an on/off switch, mode switch and starter button. The 70-11980 acc. switch only has an on/off switch and starter button. Contact Motion Pro for a complete list of modifications needed.

† For use with stock throttle bodies, fits BMW S1000RR produced from 09/08 thru 03/12. The Rev2 kit may not be a direct bolt on, contact Motion Pro for a complete list of modifications needed.

‡ Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer after market handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation.

§ 70-22765 Rev2 throttle kit features throttle cable set 70-21270 that is 3 inches longer than throttle cable 70-21269 included in Rev2 throttle kit 70-21764.

ACCESSORIES								
On/off/starter switch, universal							70-11980	$72.99

NOTES

* Closed course race application only, must use 7/8" handlebars.

** For use with stock throttle bodies/carburetors. Does not include starter/kill switch assembly or wiring, ignition/starter switch required (not included). Order 70-11980 switch assembly unless specific switch is listed for the application.

For use with stock throttle bodies, stock reel is 33.4mm. The stock throttle housing has an on/off switch, mode switch and starter button. The 70-11980 acc. switch only has an on/off switch and starter button. Contact Motion Pro for a complete list of modifications needed.

† For use with stock throttle bodies, fits BMW S1000RR produced from 09/08 thru 03/12. The Rev2 kit may not be a direct bolt on, contact Motion Pro for a complete list of modifications needed.

‡ Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer after market handlebars, or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation.

§ 70-22765 Rev2 throttle kit features throttle cable set 70-21270 that is 3 inches longer than throttle cable 70-21269 included in Rev2 throttle kit 70-21764.

HI-TECH EXTENDABLE / FOLDING LEVERS

- CNC machined high-grade aluminum
- All parts are "Hard Anodized" for durability and fade resistance
- All Stainless 316 hardware
- Ergonomic design for comfort feel
- Folding lever for breakage prevention
- Hollowed to lighten (100g) and maintain performance in case of partial breakage
- 6-point position adjuster
- 20mm length adjustment

RECOMMENDATIONS:
The mounting instructions process of the levers must be done by a mechanic specialist. As a consequence of possible variations of the brake pump models, before driving with the motorcycle pull up the front wheel with a stand and verify it runs well. If the wheel stops or slows too fast, it might get the brakes blocked.

STEP #1: Choose lever color and function "Brake or Clutch"

Fitment	Blue	Black	Gold	Silver	Red	Green	Orange	List

MAGURA

HYMEC CLUTCH CONVERSION KITS

The legendary MAGURA hydraulic clutch conversion which built its' reputation in the off-road/MX world is now available for many street and adventure motorcycles.

How do you make a good bike better? – Simply improve the controllability. MAGURA now offers a HYMEC clutch conversion kit for many street and adventure models. The system is compatible with most cable operated clutch systems and is easy to install.

The advantages of the Hymec are well documented in the press and rider forums worldwide and offers a clear and stable pressure point, reduces clutch pull, and is self-adjusting meaning no maintenance required. Regardless of on-road or off-road, city riding or long haul trips the HYMEC rider always has the advantage. Any rider with small hands who has difficulty reaching and pulling the clutch lever, and world champion sport riders who require accuracy and single or 2 finger operation will immediately notice the benefits. Off-Road and track riders benefit from the stable pressure point due to smooth hydraulic operation and compensation as the clutch heat expands.

Magura "Plug and Play" kits come pre-filled with fluid, pre-assembled and are ready to install for the following street & adventure models:

MAGURA

HC1 RADIAL MASTER CYLINDERS

TECHNICAL DETAILS

- 70° RADIAL DESIGN Pushrod and cylinder at 70° angle to handlebar results in decreased friction and more direct brake feeling for improved control.
- FULL ABS COMPATIBILITY MAGURA “HCT” is approved for continuous use with all ABS systems without loss of performance due to pressure compensation (ABS-Kickback)
- ADVANCED SECONDARY SEAL TECHNOLOGY The rear piston seal has been specially designed to prevent the introduction of air through secondary seal ingress. The advanced X-Ring seal design will reduce or eliminate this problem common on racing motorcycles at higher RPM.
- RESERVOIR MOUNT The master cylinder is supplied with an external reservoir and mounting bracket designed to use minimum space and with smoked glass to optically determine the level and condition of the brake fluid at all times.

CLUTCH MASTER

- Piston diameter 16 mm (for DOT), long lever blade
- Piston diameter 13 mm (for DOT), long lever blade
- Piston diameter 12 mm (for DOT), long lever blade

BIG BIKE PARTS®

CAN-AM SPYDER BRAKE PEDAL

Big Bike Parts improves safety with another must have accessory for the Can-Am Spyder. Big Bike Parts new Full Size Brake Pedal replaces the OEM brake pedal cover with a larger 4 ½" long by 2" wide pedal cover. It mounts the same as the existing OEM brake pedal cover, with a rust proof steel channel reinforcing the high density rubber pad. This larger brake pedal cover allows a more comfortable use of the brake pedal without your foot constantly falling off, and the unique design complements the Spyder styling. Fits all Can-Am Spyders.

EJK ELECTRONIC JET KIT

ELECTRONIC JET KIT

"INSTALL AND RIDE, EFI MADE EASY."

The EJK (Electronic Jet Kit) evolved out of the need to address the ever-increasing complexity of factory fuel injection. For the newcomer to the market or professionals wanting an easier method for tuning fuel injection, the EJK is a customizable solution for the shop that wants to take control of their tuning needs.

- No computer needed
- No dyno required
- Quick "plug and play" installation, initial settings are all preset based on make/model
- Full range tunability, does not interfere with stock ECU
- Simple push button adjustment interface
- 2 year warranty

The GEN 3 is a piggy-back EFI controller because it does not replace the stock ECU, but rather monitors the signals to the injectors and makes fuel adjustments based on the mode settings. The GEN 3 has a push button interface allowing access up to 6 different modes to allow for quick fine tuning by the end user without needing a computer. The GEN 3 also is nitrous oxide compatible, and allows the user to add fuel thru the stock fuel injection when using nitrous oxide.

The GEN 3.5 EFI controller is an extension to the GEN 3 controller. The GEN 3.5 controller has the ability to add or pull fuel within each available fueling zone. The GEN 3.5 is NOT compatible with nitrous oxide systems.

Not legal for use in California on pollution controlled vehicles, race use only in California - waiver available

DOBECK PERFORMANCE

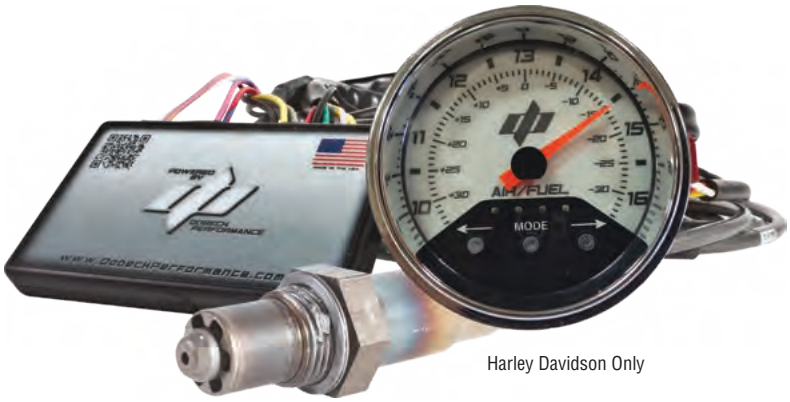
AFR+ GEN 4 TECHNOLOGY



FUEL TUNER

MADE IN THE USA

The AFR+ brings together two technologies within one system to make it the most powerful, user-friendly tuning device on the market. AFR+ combines an EFI controller with a wideband O2 sensor and AFR gauge to provide a user instant fuel trimming ability and feedback about their vehicle's state of tune.

The AFR+ can handle all of your fueling needs or compliment ECU downloads and already installed EFI controllers. The AFR gauge allows you to know exactly how well your tune-up is performing. The EFI fueling allows you to control any necessary fine tuning without spending more money or valuable time.

G

A. THROTTLE BODY

- 34mm Throttle body for increased performance compared to stock 30.5mm throttle body
- Intake manifold port is larger than stock and is size matched to use with the Koso throttle body
- Includes all gaskets needed and instructions

B. & C. HIGH-FLOW FUEL INJECTOR

- Highly recommended for use with the Koso Big Bore Kit and 4 valve cylinder head
- Adapter kit is required for installation of the Koso High-Flow injector (sold separately), includes all parts needed for easy installation of the Koso fuel injector

D. INTAKE MANIFOLD

- Intake manifold port is larger than stock and is size matched to use with the Koso throttle body
- Include all gaskets needed and instructions

E. & F. AIRBOX TUBES

- Connecting tube is designed to connect the stock Grom airbox to the Koso 34mm throttle body
- Intake tube allows for higher air volume to enter the stock Grom airbox

G. HURRICANE AIR FILTER

- Increases airflow and offers improved filtering compared to the stock air filter
- Removable foam filter media can be cleaned repeatedly
- Replaces the stock Grom air filter

RS SERIES CARBS

Designed for in-line four cylinder performance motorcycle applications, the Mikuni RS Series Radial Flat Slide Carburetors offer superior horsepower gains with their maximum flowing smoothbore induction tract and radial flat slide design. An adjustable accelerator pump system helps to provide instant throttle response particularly in the lower RPM range. The RS Series carburetors feature a compact design which is lighter than other performance carburetors and uses readily available Mikuni jets.

- Available in 34, 36, 38 and 40mm bore sizes
- Application chart is for reference only, actual bore size needed will need to be determined by the installer
- Tuning specs. noted are subject to change without notice and are guidelines only
- Throttle assembly with push/pull cables available separately, fits all RS series carburetors

TM SERIES FLAT SLIDE SMOOTHBORE CARBURETORS

This FLAT SLIDE SMOOTHBORE design cuts down the turbulence in the bore-throat to increase air flow efficiency by eliminating various orifices and obstacles in the carb throat.

- Increases velocity and horsepower
- Uses standard VM pilot, main and air jets
- Instantaneous response
- Comes with built-in location for power jet

POWER JET KIT

The power jet meters a measured amount of fuel from the float bowl and delivers it to the venturi at 1/3 throttle and up. Provides optimum fuel mixture at partial throttle openings. This allows you to run leaner jetting at lower RPM's, while supplying more fuel at higher RPM's for maximum performance and less chance of high RPM engine seizure.

ALLOWS MORE ACCURATE TUNING OF THE MID-RANGE

- OEM or better performance
- Polished corrosion-resistant case to help minimize seizing during non-operation
- Specifically designed for quiet operation
- Drop-in replacement, applications for carbureted and fuel injected motorcycles
- Gradient density fuel strainer for superior contaminant filtration (in-tank pumps only)
- Patented check valve technology
- Compatible with modern ethanol-infused pump gasoline
- Some Quantum fuel pumps fit multiple makes and models and therefore may not be an exact match to the OEM pump. Slight modifications may be required.

THERMOPLASTIC IN-LINE FUEL SHUT-OFF VALVE

FEATURES:

- Economical
- Small, lightweight
- Easy one hand operation
- Use dual shut-off for fuel tanks equipped with a cross-over line
- For fuel supply (fuel tank to carburetor), use the single shut-off valve

A unique shut-off valve that provides quick, positive on-off control of flow through flexible plastic tubing. the small size of the valve makes it ideal for use in compact space. When the valve is in the closed position, an orange band is clearly visible, eliminating operator error. The same shut-off valve can be used for either pressure or vacuum applications.

CUSTOM AIR FILTER APPLICATIONS

K&N Custom Air Filters can increase horsepower up to 12%. They are available in a wide range of sizes, designs and shapes for virtually every application. K&N Custom Clamp On Air Filters are usually not used with OEM air boxes because of their larger than OEM size. They allow considerably more air flow than a stock air box set-up. Generally up to 25% increase in jet sizes will be required because of K&N filters increased air flow. **K&N Clamp on Filters are not street legal.**

K&N PERFORMANCE FILTERS

UNIVERSAL AIR FILTER SPECIFICATIONS

K&N Universal Air Filters are designed and manufactured for a wide variety of applications. Regardless of the angle, offset, or diameter of the air intake, there is a **K&N** Universal Air Filter available for your equipment. All filters are constructed with ultra-strong molded pliable rubber flanges which absorb vibration and allow for secure attachment, and can also be stretched up to 1/8" (3mm) to fit in-between sizes. **K&N** Universal Air Filters are available in round, straight, tapered, and oval designs.

RECHARGER FILTER CARE SERVICE KIT

Recharge your K&N Air Filter with genuine K&N Cleaning Accessories. Cleaning and re-oiling your K&N filters is very simple with the use of K&N's four-step maintenance system designed to recharge your K&N Air Filter. The use of K&N cleaner and filter oil completely restores airflow efficiency so your air filter performs virtually like new.

K&N POWER KLEEN™
Air filter cleaner/degreaser dissolves dirt build-up and old filter oil
K&N AIR FILTER OIL
Penetrates into the pleated cotton media to provide outstanding air filtration

NOTE: Use of other cleaning or oiling methods, cleaners or oils could damage the filter and void K&N Warranty

AIR FILTER OIL

K&N Air Filter Oil is the only oil specially formulated to work in combination with the cotton fabric in K&N Air Filter elements providing outstanding air filtration. When used as directed, it quickly penetrates the filter pleats, where it remains suspended in the cotton fabric until the element is cleaned with K&N Air Filter Cleaner.

AIR FILTER CLEANER AND DEGREASER

K&N Power Kleen™ is the only cleaner recommended to clean K&N Air Filter elements. The use of any other cleaning solution can void the filter's warranty, and quite possibly could damage your engine and the filter's cotton material. K&N Power Kleen™ works to dissolve dirt build up and old filter oil and can be washed away with water. It is now formulated to clean jobs around your garage as well. It is environmentally friendly and specially formulated to remove oil, lubricants, grease, grime, and other deposits from most surfaces including cotton air filters, painted surfaces, chrome, plastic and more!

K&N PERFORMANCE FILTERS

CRANKCASE VENT AIR FILTERS

REMOTE MOUNT
Designed for racing engines where crankcase breathing is essential. Prevents dirt from entering engine on deceleration. Comes in two styles: Remote Mount with rubber top uses tubing to connect filter and vent. Remote Mount with chrome top has 1/4" stud and nut to mount in convenient place.

DIRECT MOUNT
UNIVERSAL CLAMP-ON STYLE CRANKCASE FILTERS
Filters clamp directly to vent tubes on valve cover or crankcase. Ideal for all engines transmissions, oil and gas tanks.

Quality oil filters manufactured by one of the largest manufacturers and suppliers of motorcycle oil filters.

Today's motorcycles require a high performance oil filter with a high oil flow capacity in order to withstand high heat and pressures. EMGO oil filters meet or exceed these requirements. Microglass filter uses a synthetic microglass media that traps particles down to 10 microns in size, compared to 20 microns for regular filter media.

PREMIUM OIL FILTERS

HIFLOFILTRO PREMIUM FILTERS

- Provides unbeatable performance and exceptional value, Hiflo filters are the best-selling brand of aftermarket filters for motorcycles worldwide
- To achieve our high quality and to ensure the consistency of our products, we use only premium raw materials from well known manufacturers
- Every oil filter goes through 16 individual quality control checks before it is ready to leave the factory. The whole manufacturing process, including the checking of raw materials and individual filter testing, is regularly audited and verified independently
- Race filters have a welded-on 5/8"/17mm nut with safety wire provisions to make installation and removal easier

* Race Filter

Built to withstand racing conditions, K&N delivers a high-quality oil filter which is built with a synthetic media specifically designed to withstand the high concentrates of synthetic racing oils. A large filter media provides high-flow rates and outstanding oil filtration to keep your motor running clean and smooth. K&N oil filters deliver performance and confidence!

K&N PERFORMANCE FILTERS

- 17mm hex nut allows easy-on, easy wrench-off (spin-on filters only)
- High-flow synthetic media allows for high-flow rates associated with synthetic and synthetic blended oils
- Uniform pleated synthetic filter media provides high capacity and outstanding filtration
- Protected by a heavy-duty canister and base plate with a double-rolled seal offering high burst-strength
- Pressure relief valve & anti-drain back valve (where applicable)
- TUV production monitored and endorsed ensures the highest quality filters available
- Pre-lubed base gasket for optimum seal
- Available in chrome or black depending on application
- K&N Limited Warranty®

FLO® REUSABLE OIL FILTERS

- Reusable filters made from type 304 stainless steel micronic filter cloth
- Rare earth magnet is attached to the top of the element for pre-filtering the oil
- Sophisticated bypass system is engineered for greater oil filtration and proper bypass pressures
- Anodized aluminum housing looks great and helps dissipate heat

PIAA POWERSPORTS

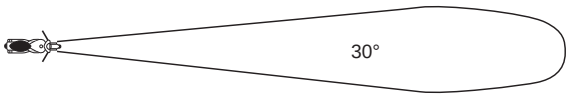
LP270 SERIES LED DRIVING LIGHT KIT



The PIAA LP270 LED Driving light kit offers the beam control of a halogen light with the low power consumption and durability of an LED light. As a light source LED's offer several advantages over their halogen counterparts including very low power consumption, compact size and durability. Unlike most LED lights currently on the market that position the LED aimed straight out forward the LP270 lights aim the LEDs at the reflector. This new orientation of the light source allows for far better beam control and output than the conventional layout.

- 2 3/8" LED light assembly (two 3W LED bulbs per light) in a black PPS housing
- White 6000 K beam color
- Computer designed multi-surface reflector gives a true high performance driving pattern
- Includes two lamps and wiring harness, mounting brackets sold separately, see application chart

Description	WPS#	List

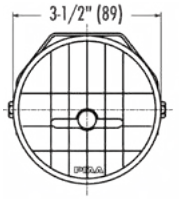
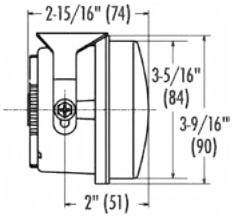
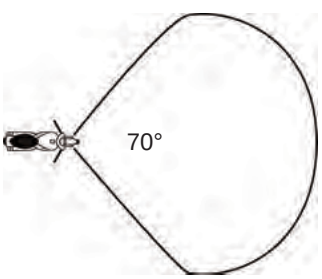
530 LED FOG LIGHT KIT





PIAA's 530 LED fog lamp has the precise beam pattern of a halogen, the color of an H.I.D. with the low power consumption and durability of an LED. This lamp kit aims two high output LED's at a computer designed reflector resulting in the highest output, lowest draw and most effective fog light on the road.



Bulb type: Two 3W LED bulbs, 6000 Kelvin
Description: Black PPS housing, ultra light weight and compact
Kit Includes: Two lamps, wiring harness, relay and switch

LED BULBS

NEW

- Elite series bulbs feature "C4" LED technology which reduces the physical size of the LED light source to closely resemble a halogen filament, resulting in a 90% accurate light pattern
- Standard series bulbs feature COB LED chips which have a smaller size and higher output power compared to most LED bulbs
- All bulbs have an active heat management system which is specifically designed for use in confined spaces, this system monitors and maintains the bulb at the proper temperature, preventing overheating and greatly extending the bulb life

LED SPOILER / TRUNK LIGHT KIT FOR HONDA GL1800

These enhanced LED spoiler / trunk lights were designed with the rider in mind. Designed with high visibility features such as Dynamic Brake light and Dynamic Sequential turn indicators. When brakes are applied, the Ultra Bright Dynamic LED's activate in a rapid fire sequence which instantly alerts drivers behind you to respond quicker than they normally would. When the turn signals are activated, the sequential LED's have a dynamic swoosh effect which resembles that of modern vehicles and increases your visibility. Dynamic brake lights pulsates 4 times before going solid to notify a trailing driver your vehicle is slowing or stopping. With the built in Dynamic Brake Light feature it eliminates the need to purchase and install a 3rd party modulator for your spoiler / trunk LED lights.

Fits GL1800's with OEM trunk mounted spoiler or trunk rack (depending on year), replaces the stock LED spoiler light (`01-17). Includes plug and play wiring harness (`01-17), order accessory light wiring harness separately for `18-up models. Installation video for `01-17 models available at: https://youtu.be/l5kYuUQLltc

GREATER PERFORMANCE: PIAA bulbs are engineered with XTRA Technology for greater performance per watt than any other bulb on the road. (XTRA is a term coined by PIAA to designate a high-efficiency bulb that is designed to produce greater light output than its rated power consumption, i.e. 55W = 85W of light output.) Greatly enhance your ability to see and be seen. A metal bond holds the heat-resistant glass tube securely to prevent cracks and leaks. A welded focus ring and one-piece filament support assures proper positioning.

BRILLIANT COLOR: Beam color affects visibility and eye strain over long periods. The brilliant white/blue light allows comfortable night driving over extended periods of time. PIAA bulbs are both a performance upgrade and an aesthetic enhancement. You will see the difference even in the daytime.

WARRANTY AND SUPPORT: PIAA is so confident in the durability and reliability of our products that we offer a no questions asked, replacement of any halogen bulb that fails within one year of purchase. PIAA bulbs are an investment in safety and peace of mind.

Super Plasma GT-X - The Super Plasma GT-X bulbs offer an unmatched combination of fashion and performance with a bluish-purple color very similar to H.I.D. and the closest yet to sunlight.

Xtreme White / Xtreme White Plus / Xtreme Plus Hybrid - The Xtreme White Series of bulbs have a cool white light output that gives the driver better color recognition on depth perception and better contrast than stock halogen lamps. The blue top coat on this series of bulbs adds a slight blue tint to a lamp with no loss of performance.

RED LED MARKER LIGHTS

Big Bike Parts® puts LEDs on the Can-Am Spyder saddlebags, once again enhancing rider safety. This all new Red LED Marker Light replaces the side red saddlebag reflector on select Spyder models. Big Bike Parts® custom designed the light to match the natural lines of the Spyder RT and provide better visibility by using a more convex lens. With 16 LEDs per side, safety is markedly improved by making the Spyder RT more visible. These LED Marker Lights can be wired as running, turn signal or both. Fits on Spyder RT, RT-S, RT-LTD, F3, F3-S, F3-T, F3-LTD 2010-Current. Sold as a Pair.

TRUNK BRAKE AND TURN SIGNAL

Big Bike Parts® introduces an exceptional quality Multi-Function LED Trunk Light for the Can-Am RT. This new trunk light offers running light, brake light and turn signal functionality in a single compact unit. It uses small ultra-efficient high intensity LED's, offering superb brightness with low power usage. The LED assemblies are enclosed in weather resistant pods that are sealed to provide all-weather protection and maintenance free lighting. Superior functionality combined with a stylish contoured chrome housing that mounts low enough to allow fitment of luggage racks. Attaches with double sided tape for a secure installation. Requires drilling to run the wire lead which mounts to existing LED wiring with T-Taps, no additional components are needed. Fits all Can-Am RT's from 2010

DMP DYNAMICMOTOPOWER

POWERGRID TAILLIGHTS

- The DMP Power Grid Integrated LED Taillight provides the perfect solution for streamlining the appearance of your motorcycle by eliminating bulky turn signal housings without sacrificing function
- Each lens is formed to perfectly replicated OEM dimensions and is constructed with high quality polycarbonate for correct optical clarity
- Each LED board hosts a matrix of super high intensity LEDs that provide intense luminescence and excellent visibility in a variety of conditions. The interior of the tail light housing contains a topographically designed reflective surface to further amplify the intensity of the LEDs and increase overall visibility
- Each taillight unit comes with a factory type harness to make installation fast and simple

Not DOT approved, intended for off road use only

INTEGRATED TAILLIGHTS

- Integrated turn signals include internal resistors in most models for proper flash rate (some model may require led flasher relay)
- Built-in LED security light that stays lit hours after bike is turned off, adds visibility and discourages thieves (most models)
- OEM connectors - no cutting, splicing, soldering, crimping or ruining stock lights
- Super bright LED's
- DOT compliant stop/taillight (turn signals are not DOT approved)
- Clear = Chrome reflector/Clear lens
- Shadow = Black reflector/Clear lens
- Smoke = Black reflector/Smoke lens
- Red = Chrome reflector/Red lens
- Blackout = Black reflector/Smoke lens w/diffuser

TRI-STAR TAILIGHT MODULE

The Tri-Star module converts the rear turn signal lights to function as brake and turn signal lights. When the brakes are applied, the turn signal lights illuminate. If a turn signal is applied, it has priority over the brake light function on the side that is selected. If the turn signal is canceled and the brakes are still applied, the brake light function of the turn signal lights illuminate steady on.

- Adds brake light function to existing turn signals
- Weather proof solid-state electronic components.
- Dimension: 2 1/4" L x 1 5/8" W x 5/8" H
- Mounting: Secure to flat surface with double sided VHB tape (included).
- NOTE: If your bike does not have a variable load turn signal flasher, a Dual Load Equalizer will be needed for this installation.

HEADS UP VOLTAGE MONITOR

- This module is a micro-processor that monitors the output of the charging system and is accurate to within 200 milli-volts. The Heads-Up Voltage Monitor's™ onboard microprocessor performs a self-test each time voltage is applied.. Additionally, you will be notified of serious fault conditions by an attention-getting flash of the LED.
- The single, multi-color LED (red-amber-green) visually indicates the state of your motorcycle's battery / charging system. At a glance, you will instantly know whether the voltage is normal or abnormal, Auto-dimming - after 8 seconds at a single voltage, the LED intensity is lowered to 50%
- Voltage Range: 6 to 17 VDC, Accuracy: within 200 millivolts, Amp Draw: 20–85 milli-amps.
- Dimension: 2 1/4" L x 1 5/8" W x 5/8" H

LED LICENSE PLATE FRAMES

- These dual intensity LED License Plate Frames have been designed to give greater visibility and conspicuity to your motorcycle
- Engineered to function in both high and low intensity brightness for a multitude of applications
- Because many motorcycles have only one brake/running light bulb, these units can easily be used as back-up brake, and running lights, providing you a greater degree of safety and added visibility
- Some models feature 3 amber LEDs on both sides of the light bars that function as auxiliary turning signals
- Mount and install this beautifully crafted license plate frame and give your bike an excellent finished appearance compared to an otherwise obtrusive license plate

- Most compact of lithium motorsports batteries available
- Ultra-lightweight and high-power
- Can hold a charge up to a year provided there are no "parasitic drains" (accessories that draw power when bike is off (i.e. alarms, ECUs, GPS, heated grips, etc)
- Large all-brass terminal design
- Can be installed in any orientation

Antigravity batteries include a 3 year pro-rated, non-transferable warranty (registration of the battery with the manufacturer is required within 30 days of purchase by the retail customer). All warranties are to go back through Antigravity.

Not for use with internally modified V-Twin engines, watercraft or passenger cars/race cars, warranty will be void if used in these applications.

RESTART LITHIUM ION BATTERIES

- The Antigravity Restart lithium battery is the first battery manufactured with built-in jump-starting technology, so you won't ever get stranded with a dead battery again! This compact, lightweight lithium-ion battery directly replaces many OEM powersport batteries and can also be used in custom applications
- The Restart batteries features include a BMS (battery management system) with over and under voltage and thermal protection along with real time lithium ion cell balancing
- For custom/high performance applications, make sure to match the cranking amps needed for the application to the appropriate battery
- Antigravity only recommends the use of a powersports specific lithium battery charger.

Restart batteries include a 3 year pro-rated, non-transferable warranty (registration of the battery with the manufacturer is required within 30 days of purchase by the retail customer). All warranties are to go back through Antigravity.

Restart batteries are not for use with internally modified V-Twin engines or V-Twin engines 103 cubic inches (1680cc) or larger, warranty will be void if used in these applications. Not for use in watercraft applications.

* Heavy duty/increased cranking amp rating

FIRE POWER

1yr Warranty On All Fire Power Brand Batteries!

CONVENTIONAL 6 AND 12 VOLT BATTERY KITS

- Meets or exceeds OEM specifications
- Extremely strong polypropylene cases to withstand impacts and vibration
- 1 year warranty on all batteries if properly pre-serviced and charged
- Anti-Sulfate treated for longer life
- Shelf-life almost infinite due to dry-charged plates
- Designed for higher cold cranking AMP capacity
- Comes with pre-measured acid pack

For replacement electrolyte packs, see page 636-637

MAINTENANCE FREE 12 VOLT BATTERIES

- Absorbed glass mat (AGM) technology
- Sealed impact resistant polypropylene case
- A must for motorcycles and ATVs that require a sealed battery
- 1/2 the price of an OEM sealed battery
- Must be mounted in upright position
- Comes with pre-measured acid pack

SEALED FACTORY ACTIVATED BATTERIES

- Advanced absorbed glass mat technology
- Sealed maintenance free design
- 1 Year free replacement warranty
- Battery comes filled and pre-charged from the manufacturer (freshening charge recommended before installation)

HardDrive
AMERICAN V-TWIN PRODUCTS

PREMIUM FACTORY ACTIVATED BATTERIES

- Higher CCA rating compared to same series standard factory activated batteries
- Non-spillable design
- AGM separators
- Heavy duty terminals
- Made in the USA!
- 1 Year warranty

FACTORY ACTIVATED SEALED BATTERIES

- Designed for American V-Twin motorcycles
- Heavy duty brass terminals
- Activated and sealed at the factory (freshening charge is recommended prior to installation)
- Calcium alloy technology: Improves cranking power and helps give the battery longer life
- Valve regulated lead acid design: Sealed non-spillable design eliminates leakage
- Safety valve flame arrestor: Safely regulates internal pressure
- Tight-pack absorbed glass mat separators: Absorbs acid & reduces damage due to vibration
- Spill-proof sealed battery: Sonically sealed cover allows for angled battery mounting if needed for more mounting options
- Freshening charge is recommended prior to installation.
- One Year Warranty

YUASA BATTERY

GYZ SERIES AGM

- AGM separators with superior grid designs for extreme vibration resistance
- More active material surface area for enhanced performance and power
- Supplied “Factory Activated” (non-spillable)
- Highest CCA motorcycle battery (500 CCA on GYZ32HL)
- Large heavy-duty flush terminals with multiple connections (GYZ32HL, GYZ20HL, GYZ20H)
- Built in brass nuts (GYZ32HL, GYZ20H, GYZ20HL)
- 1 Year warranty

HIGH PERFORMANCE AGM

- All the features of a standard AGM battery plus increased power
- H Series: Increased power-up to 30% more cranking amps
- YTZ Series: Small size, lightweight, huge power
- 1 Year warranty

AGM MAINTENANCE FREE

- Maintenance Free – no need to add water, but periodic charging required when not in use
- Absorbed Glass Mat (AGM) Separators – an advanced battery technology that eliminates the need to ever add water
- Advanced lead-calcium technology – holds its specific gravity more than 3 times longer than conventional lead antimony batteries
- 1 Year warranty

YUMICRON/CONVENTIONAL

- Special thin separators – allow two extra plates per cell to be installed, for a 30% improvement in cranking performance
- Engineered to protect against corrosion, withstand vibration, and deliver high cranking power
- 6 volt and 12 volt varieties available
- 1 Year warranty
- Must purchase acid pack separately

For replacement electrolyte packs, see page 636-637
