## Custom Flat Track Bike

Can one bike pull double duty for two brands? When it is as wild as the Drag Specialties/Parts Unlimited Indian FTR 1200 flat track racer cover bike, yes! This stunning custom build captures powersports excitement and showcases the strong support Drag Specialties and Parts Unlimited have for the industry.

A lot of the credit for conceiving the concept of a dual-branded cover bike belongs to the folks at Drag Specialties! "They came up with the general idea and S&S drew up an initial rendering and between the two the overall design really came together nicely, filling everyone's needs!" says S&S VP of marketing David Zemla.

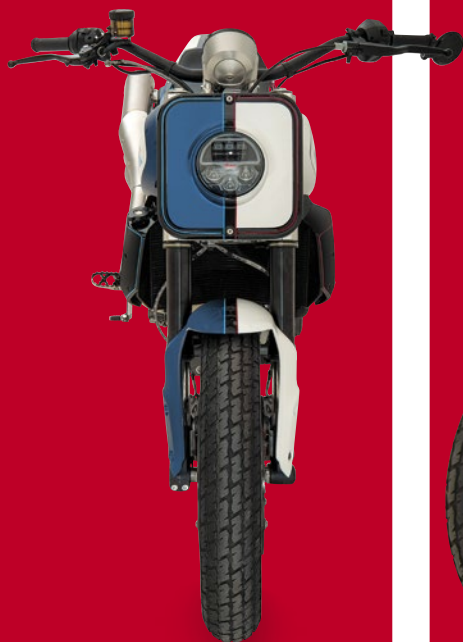

The style of the FTR 1200 lends itself to being a dual-brand marketing platform. It has the American V-Twin engine and Indian name and heritage, combined with the hooligan/flat track look, style and performance that speak to Drag Specialties and Parts Unlimited powersports enthusiasts. They all like torquey, fast and sleek race machines.

The build was done in-house by S&S Cycles in Viola, Wisconsin. The bike has been modified in the "hooligan" or flat track style with a number of very special parts. Take a

close look: the triple clamps, gauge mount, gas tank, rear seat unit and swingarm are all S&S one-off pieces. "We were asked to do a very small batch of FTR 1200 bikes as hooligan racers," Zemla says. "This bike has a lot of those pieces, making it one of a very few in the world."

One of the biggest changes is the side plates. "In order to get the foot controls positioned right for hooligan/flat track racing, you have to move them. Well, the footpeg and foot control mounts on the stocker are built into the side plates, so we machined new mounts in-house so we could get the pegs and controls set to the right positions. Each of those mounts takes something like two days to machine," Zemla says with a chuckle.

The split paint theme highlights the two brands. "When we first created the renderings for the paint, we knew the finished bike would look pretty wild." The final paint was done by Artistimo Custom Design in Waukesha, Wisconsin. Their work really fine-tuned the original renderings into a stunning work of mechanical art. "The final paint work made it even more impressive," Zemla says. "It is a really unique and beautiful bike."

# IMPORTANT INFORMATION:

## EMISSIONS AND NOISE REGULATIONS

**NOTE:** The California Air Resources Board (“CARB”) and/or the Environmental Protection Agency (“EPA”) do not permit the use of aftermarket emissions-related part(s) that alter the performance of OEM emissions-related devices unless CARB has issued an Executive Order, other than on racing vehicles on closed courses. Check your local laws and manufacturer’s information. More California exhaust information is available at [www.arb.ca.gov/](http://www.arb.ca.gov/).

**NOTE:** Aftermarket products, including but not limited to exhausts, catalytic converters, oxygen sensors, fuel/air controller modules, air filter kits, camshafts, O<sub>2</sub> eliminators, and carburetors and jet kits which alter, modify, or replace emission control devices or systems of an originally compliant highway motorcycle, are not legal for sale or street use in California unless they have been issued a CARB Executive Order. Aftermarket emissions-related products which have not been issued an Executive Order or which are not aftermarket Replacement Parts, as defined in Title 13, California Code of Regulations, Section 1900(b) (2), are authorized for closed circuit race use only. Products shown may be designed, manufactured, intended and sold for closed circuit race use only, and use of the same on public roads or lands may be a violation of local, state and/or federal laws. See manufacturer’s information and state and local laws to determine what is authorized for your use on your vehicle.

**The following emissions-related defined terms are used in this catalog (PARTS WITH THE FOLLOWING DESIGNATIONS IN THIS CATALOG ARE NOT ILLEGAL FOR SALE IN CALIFORNIA UNDER CARB REGULATIONS):**

- **“CARB E.O.”** means the specified Executive Order issued by CARB. An Executive Order constitutes an exemption by CARB from CA Vehicle Code 27156 and 38391, for sale of the part number for the make/model/year fitment(s) specified in the Executive Order.
- **“Replacement Part”** means any aftermarket part intended to replace an original equipment emissions-related part and which is functionally identical to the original equipment part in all respects which in any way affect emissions (including durability), or a consolidated part.
- **“Qualified Manufacturer Declared Replacement Part”** means any aftermarket part intended to replace an original equipment emissions-related part and which is functionally identical to the original equipment part in all respects which in any way affect emissions (including durability), or a consolidated part that has been evaluated and declared by the manufacturer to meet this definition and carry this categorization and designation label. This manufacturer has declared in writing that it has documentation, based upon sound engineering judgment, indicating the replacement part does not reduce the effectiveness of any required emission control device and it does not cause the modified vehicle/engine/equipment to exceed applicable emissions standards for that make/model/year fitment(s) advertised.

**NOTE:** Products shown may not conform to federal, state or local emissions and/or noise regulations.

## WARRANTY

There is no warranty on exhaust pipes and mufflers with regard to any discoloration. Discoloration (blueing) is caused by tuning characteristics, i.e., cam timing, carburetor, etc., and is not caused by defective manufacturing. See the Chemicals and Lubes section for products that will help prevent or remove blueing.

Check your applicable laws and manufacturer’s publication(s) and/or website(s) for manufacturer’s warranty, maintenance, safety, mounting and any regulatory compliance/non-compliance information.

## SIDE WINGS

- Expand comfort pocket, channeling air outward while "cleaning" the flow
- Adjust to suit rider preference
- Can be installed/removed with windshield intact – Santoprene pads grip the windshield but do not mar the surface
- "Ghost" shade – a neutral tint with 85% light transmission; barely noticeable, with just enough tint to make the edges disappear
- Side Wings fit all Memphis Fats windshields or similar windshields that measure either 3mm or 4.5mm thick (includes inserts for both sizes); feature injection-molded glass-filled nylon clamps in place of the billet aluminum; can be mounted along with Hot Wing
- Made in the U.S.A.

## HOT WING

- Boosts airstream upward – Venturi action speeds up the airstream while smoothing the flow – without buffeting
- Allows the use of a shorter shield; now you can easily look over your shield
- Made with "Ghost" shade – a neutral tint with 85% light transmission; barely noticeable, with just enough tint to make the edges disappear
- Uses lightweight, economical injection-molded glass-filled nylon clamps; fits Memphis Fats windshields or similar windshields that measure 3mm or 4.5mm thick (includes inserts for both sizes)

**MEMPHIS SHADES BULLET FAIRING**

- Strong, one-piece fairings constructed of high-impact aircraft-grade Lucite®
- Bold aerodynamic shape with a hint of outlaw styling designed to streamline today's low-slung cruisers
- Provide full torso coverage to virtually eliminate wind fatigue while allowing an unobstructed view of the countryside; your head is in clean air
- A machined groove outlines the smoke windshield section
- The lower section features an opaque glare-free matte coating on the inside that gives the outside a high-gloss black "factory" finish for a clean two-piece look; looks great as is, or can be easily painted to really achieve the next level of custom
- Custom fit, model-specific mounting kits feature Memphis Shades exclusive Trigger-Lock mounting system – on and off without tools, or swap out with Memphis Fats/Slim windshields, Sportshields or Batwing Fairing
- Made in the U.S.A.

### DOMINATOR SOLO SEAT

- Combines SaddleGel™ interior, progressive-density foam and a Gel Channel™-design cover to provide riders with unparalleled comfort, control and modern style
- Seats using Saddlemen's Gel Channel (GC) technology have a center channel that relieves seating pressure on the perineal area, increasing blood flow, thus keeping the rider comfortable in the saddle for longer time
- In addition to pressure relief, the GC-style center of the seat provides an airflow passage
- The rugged carbon fiber weave and smooth vinyl cover holds up to hard use and still retains its good looks
- Using a very large gel pad for additional foam support and vibration damping, this GC-style seat offers the comfort levels normally found in larger touring seats

### POWER MAX MAINTENANCE-FREE BATTERIES

- Completely sealed black case can be mounted in almost any position
- Can be recharged over 90% in less than one hour on a regulated charger
- Advanced technology allows very high-power discharge
- Batteries MUST BE CHARGED in the same manner as any lead acid battery
- Accepts a high rate of recharge without damage to the battery

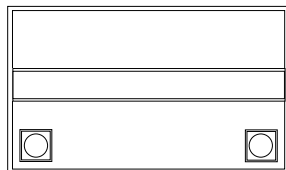

NOTE: When not in service, battery should be charged once a month.

## BMS (BATTERY MANAGEMENT SYSTEM) 12V LITHIUM BATTERIES

- Smarter, safer, lighter weight
- Lithium batteries provide better fuel economy, last four times longer, are two times lighter, are 99% more efficient in charge and have a constant current versus AGM variable current
- All BMS batteries feature four terminals (two positive and two negative) that allow fitment on many powersports makes/models and also provides electrical accessory hook-up options
- Flexible accessory blocks are also included to absorb vibration and to allow custom fitment on many different powersport models
- Includes BMS Smart battery management system that monitors, optimizes and protects the battery
- Battery management system is used to monitor battery SOC (State of Charge), optimize battery performance, protect battery from over-charge (over voltage protection), protect from over-discharge (low voltage shut-off)
- Battery Activation Wire connects Battery Activation Switch to BMS (Battery management system)

- When BMS detects possible over-charge or over-discharge (voltage below a certain threshold), the BMS will shut off the battery (cannot charge/discharge) to prevent permanent battery damage
- User can re-activate the lithium battery by pressing the Battery Activation Switch on the included Quick Disconnect Cable to allow battery to be charged again
- Quick Disconnect Cable has three terminals: one to positive, one to negative and one to Battery Activation Switch
- Fireproof coating engineered mechanism that supports high current flow during voltage discharging to provide thermal protection
- LiFePO4 cell high performance UL1642 certified LFP cell
- IP67 bottom case engineered material with high melting point

**NOTE:** User is recommended to use Battery Tender Lithium Charger to recharge the lithium battery.

## FACTORY-ACTIVATED AGM BATTERIES

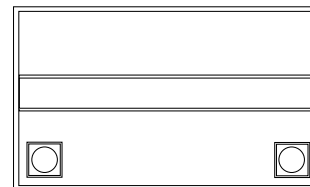

- Experience High Performance
- Battery Tender's sealed AGM batteries are constructed with lead calcium alloy and absorbed glass mat technology that allows for a completely maintenance-free and high-performance operation

- All Battery Tender AGM batteries are manufactured with the highest quality materials and rigorously tested to ensure safety, OEM compatibility, effectiveness and optimal performance

**NOTE:** Factory-activated batteries should be charged once a month when not in service.

### 14" OFFSET FRONT BRAKE ROTOR

- Add braking performance and style
- 14" front rotor is drastically larger than stock, resulting in improved braking performance
- Billet brake caliper adapter included to relocate factory brake caliper
- Great way to improve the look of your bike; adds a race-style upgrade to the front wheel
- Bolt-on installation; requires no fabrication or bleeding of the front brakes

**NOTE:** Will not fit Scout models equipped with ABS when relocating the caliper. The ABS sensor is attached and will not read the ABS timing ring.

**BRAKE PADS**

- Sintered metal brake pads are the OEM-type replacement pads for most bikes from the late 1970s to the present
- Sintered metal brake pads are proudly made in the U.S.A.; second-to-none in their stopping abilities and wear characteristics, while still providing excellent reduction in noise and dust
- Organic pads are OEM-type replacement brake pads for 1970s and earlier models
- Organic pads with aramid high-performance fibers are the perfect choice for polished or chromed rotors and billet steel rotors

- Both compounds of Drag Specialties brake pads are asbestos-, nickel- and lead-free

NOTE: If you are using aftermarket billet steel rotors, it is recommended you use our Organic pads with aramid high-performance fiber brake pads to avoid damage to them. Sintered pads are not recommended for billet steel rotors as the pad material is too aggressive for those rotors.

**DP BRAKES****THE ORIGINAL SINTERED BRAKES**

- DP Brakes brake pads are designed with sintered metal compounds to give your bike high-tech performance in all conditions
- Pads have a quick break-in period so you get maximum performance fast
- DP Brakes design and materials ensure consistent hard stops and fade-free performance
- Sintered metal compounds outlast more conventional organic or aramid fiber pads

**STANDARD SINTERED METAL BRAKE PADS**

- GG friction-rated and made with DP Brakes' proven sintered metal material
- Gray-colored aluminum oxide-based ceramic material on rear of backing plate keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Pad compound gives equal performance in wet or dry conditions
- Ideal replacement for street and touring machines where durability is the prime requirement
- No brake fade

## BRAKE PADS

- SBS brake pads feature asbestos-free brakes using patented Unified Composite Technology (UCT)
- UCT technology completely blends all brake pad materials into a balanced, unified pad
- This balance ensures no hot spots, glazing, premature fading or excessive rotor wear
- The result is powerful, fade-free braking performance, even in extreme conditions

## STREET EXCEL SINTERED METAL PADS

- The best in sintered replacement pads for high-performance front (HS) and rear (LS) street applications
- Use advanced sintering process technology; perfect for sport riding
- The highest coefficient of friction in the lineup to provide maximum stopping power
- Formulation also offers high fade-resistance and quick cool-down under severe braking
- When you need to replace your worn sintered metal pads, choose STREET excel; the sinter compounds with the power to stop you

Organic pads

Double-H sintered pads

Semi-sintered "V" pads

**EBC**  
BRAKES

## BRAKE PADS AND SHOES

### ORGANIC BRAKE PADS

- The world's #1 selling organic disc brake pads
- EBC Organic brake pads contain Aramid fibers; these are man-made high-performance fibers used widely for their light weight, high strength, abrasion resistance and thermal stability
- Aramid fibers have high strength-to-weight, thermal stability and abrasion resistance to provide advantages over cheaper steel fiber-based products
- Provide excellent stopping power without noise and rotor galling, even on polished rotors
- Fingertip control and strong, predictable brake response

### DOUBLE-H SINTERED METAL PADS

- Feature the HH friction rating – the highest in the industry
- Provide maximum brake effect and last twice as long as organic pads
- Sintered pads are made in the U.S.A.

### SEMI-SINTERED "V" PADS

- All-new semi-sintered construction containing 30% copper by weight within an organic matrix
- This design has the long life of a sintered pad with the great feel and are more rotor friendly than the more aggressive sintered pads
- Can be used to replace organic or sintered metal compound pads

### BRAKE PADS

- Galfer has more than 60 years of experience in brake pad friction material construction
- Multiple compounds available for all types of riding styles

#### SEMI-METALLIC CARBON (1054)

- Great feel and modulation; ideal choice when replacing OEM compound pads
- Long-lasting pad compound with minimal rotor wear
- Good performance in wet/dry conditions
- GG friction rated

#### HH SINTERED (1380)

- For aggressive street riding/sport use
- Excellent feel at the lever and power modulation
- Advanced ceramic composites are ready to withstand higher temperatures than regular semi-metallic carbon brake pads
- Great heat recovery and easy on brake rotors
- HH friction rated

#### HH SINTERED CERAMIC (1375)

- For aggressive street riding/sport use
- Excellent feel at the lever and power modulation
- Advanced ceramic composites are ready to withstand higher temperatures than regular semi-metallic carbon brake pads
- Ceramic-coated backing plate assists with brake temperature management and heat dissipation
- HH friction rated

## FLO STAINLESS STEEL, REUSABLE "SPIN-ON" OIL FILTER

- Made from laser-cut, medical-grade, 304 stainless steel micronic filter cloth, this filter provides 200% more filter area in many cases
- Stainless filter catches items down to 35 microns, which is about three times better than most good paper or brass filters
- Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 600°F
- Filter maintains consistent flow under all conditions including extreme heat, the presence of water, and cold start-ups where paper filters can flow so poorly that they often cause the bypass valve to open and allow unfiltered oil to enter your engine

- Should be the last filter an owner ever needs; this high tech filter technology is widely used in all types of auto racing including NASCAR, Indy type cars, Formula 1 and in the aerospace industry where filtration is of the utmost importance
- FLO reference # PCS1

### FRONT FORK SPRINGS

- Progressive springs offer a soft initial spring rate for a plush ride
- Progressively wound design provides increased resistance to bottoming as spring compresses
- Improve handling while retaining OEM geometry
- Sold in pairs
- Made in the U.S.A.

PART #	DESCRIPTION	SUG. RETAIL
0405-0528	For 15-16 Scout models	\$97.00

### FORK LOWERING KITS

- Give Cruiser bike front ends that custom lowered look by lowering the forks
- Your choice of 1" or 2" lowering height is available at time of installation
- To maintain proper balanced geometry, it is recommended lowering the rear of the bike the same amount as the front (Progressive Suspension Series shocks available for lowering the rear); see page 122
- Installing a lowering kit will decrease initial ground clearance; motorcycle will be lower to the ground, and care should be taken to avoid bottoming, especially over bumps or in turns

PART #	DESCRIPTION	SUG. RETAIL
0416-0095	For 15-16 Scout models	\$124.95

### LEGEND REVO-A COIL SUSPENSION

- Provides improved plush ride quality, control and resistance to bottoming out
- Extended coil length has larger "sweet spot" without increasing overall shock length
- Unique spring rate offers the ability to soften preload, reducing ride height and maintaining a smooth ride
- Allows minimal preload adjustments when changing between riders' weights or loads
- Adjusts by hand, no tools needed
- Easy installation

PART #	DESCRIPTION	SUG. RETAIL
1310-1739	For 15-20 Scout/Scout Sixty, 18-20 Scout Bobber	\$924.95

- Suspension alignment is provided by spherical bearings on both top and bottom
- External knob has six adjustments to allow fine-tuning of rebound
- Provides optimum rebound performance for any given rider weight, personal ride quality preference or personal riding style
- Light to heavy riders can fine-tune ride preference
- Black finish
- Made in the U.S.A.

NOTE: For solo rider only, with total weight of 250 lb. or less.

### FORGED BILLET RIMS

- Choose from Procross and 7-Valve style forged billet rims
- All rims are CNC machined from radial forged 6061-T6 aluminum for maximum road durability and strength-to-weight ratio
- Features a rolled rim lip for the custom look and detailed CNC machine work from the center of the hub to the edge of the rim
- Each rim can be used on both front and/or rear of the motorcycle when correct hub kit is installed

- Rims accept Arlen Ness hub kits, which allows full wheels to be assembled in minutes with basic tools
- Structurally tested to meet or exceed DOT, JAS and TUV international load ratings

NOTE: Rims do not include hubs. Hubs are purchased separately.
