WISECO CLUTCH COMPONENTS

CLUTCH PACK KITS

Clutch Pack Kits contain everything you need to upgrade your worn out clutch plates and springs - each kit comes with new frictions, steels, and clutch springs, all made from premium grade materials.
The frictions and steels are made to exact OEM tolerances and specifications, and produce the same feel and wear resistance of OEM plates.
Wiseco clutch springs are 8-10% stiffer than stock to ensure a positive clutch lockup every time.
Clutch pack kits are an easy solution to worn or slipping clutch packs.

PERFORMANCE CLUTCH KITS

Performance Clutch Kits take the clutch pack kits one step further by including a Wiseco forged clutch basket and new rubber cushions
Wiseco forged baskets are tougher and stronger than stock, and achieve higher fatigue properties than any other clutch on the market
The hard coat anodizing wears like iron, and greatly extends the life of the basket against notching. Also included is a full set of frictions, steels, and clutch springs made from premium grade materials.
Refresh your worn out clutch and notched basket with the ultimate in high quality Wiseco clutch components

CLUTCH BASKETS, INNER HUBS, & PRESSURE PLATES

FORGED CLUTCH ADVANTAGE

Wiseco leads the clutch aftermarket with high performance FORGED clutch baskets, inner hubs, and pressure plates. OEM clutch components are made from inexpensive die-castings that quickly wear out and become easily notched. Wiseco offers the only forged clutch components in the aftermarket for off-bike and ATV applications. The feature aligned grain flow in the aluminum adds strength and toughness to the parts that are unparalleled through other manufacturing processes.

Each Wiseco clutch basket, inner hub, and pressure plate start as dedicated forgings built specifically to take advantage of features that can only be made through the precision forging process. Variable fillet blends and complex surfaces can be forged into the part that would otherwise be extremely difficult to produce. The raw forgings are then precision machined to very close tolerances, producing the same high quality parts as Wiseco pistons.

The finished parts are hard coat anodized and Teflon coated to offer superb wear resistance, and a long life of smooth clutch operation. Every new clutch basket is supplied with new components used during assembly, including new fasteners with pre-applied thread locker.

FEATURES & BENEFITS

Built on dedicated precision forgings
Made from Aerospace grade aluminum alloy
Hard coat anodized
Teflon coated
Supplied with high-quality fasteners with pre-applied thread-locker
Designed to maximize strength through “feature aligned grain flow”, and utilizes as-forged features that can only be produced using Wiseco’s precision forging process. Produces higher mechanical properties and resistance to impact and fatigue.
Certified raw materials produce the highest quality finish products.
Produces an ultra tough abrasive resistant surface, and ensures a long life of smooth clutch operation through the elimination of wear on the sides of the clutch basket tabs.
Seals the coating to create a near frictionless surface for the clutch plate tabs to glide upon.
New fasteners are high strength and come with the thread-locker pre-applied.

G-FORCE™ REDLINE CVT BELT

RACE-PROVEN INNOVATION

The NEW Gates G-Force Redline CVT belt was developed in collaboration with championship winning racers using the most advanced materials and construction, then trested on top platforms in the most extreme Southwest desert race events.

Extensively lab and field-tested, G-Force Redline CVT belts are engineered to handle the wildest rides in the dunes, deserts, mountains, and on race tracks.

YOUR RIDE ISN'T CONVENTIONAL.
YOUR BELT SHOULDN'T BE EITHER.

OFF-ROAD PERFORMANCE ENGINEERED

WHY G-FORCE™ REDLINE™?

- Greater heat resistance and recovery, even under severe duty cycles.
- Optimized, patented EE compound maximizes axial stiffness enabling belts to run at higher continuous torques or loads.
- Innovative design results in better acceleration, higher top speed ration and energy loss in extreme off-road environments.
- Improved durability, crack and wear-resistance means a longer-lasting, high-performance power transmission belt for the most demanding applications.
- Reduced Environment Risk - made without harmful chlorinated compounds.

GATES ATV/UTV G-FORCE DRIVE BELTS

Continuous Evolution in CVT Belt Technology.

Gates new G-Force™ belts are Continuously Variable Transmission (CVT) belts. Gates has brought this technology to both the Original Equipment Manufacturer (OEM) and aftermarket CVT belt markets. G-Force drive belts are designed for superior fit, performance and durability for today's recreational and utility all-terrain equipment, and are constructed with double or single cog designs to match the OEM belt. Extreme real-world testing has proven the G-Force belt to be high performing and durable, with no clutching adjustments necessary at installation. Whether trail riding, farming, ranching or extreme riding, G-Force belts are engineered for demanding off-road conditions. Just drop in a G-Force belt and be on your way for work or play.

Carbon Cord belts are engineered for drop-in performance utilizing the strongest material on earth for tensile cord. Combined with a specially formulated adhesion gum, edge cord pullout is virtually non-existent.
Carbon Tensile Cord ensures the belt maintains its designed length and geometry
Superior resistance to edge cord pull out
Unique attributes of the Carbon cord decreases the chance of edge cord pull out
Less likely to damage clutches during belt failure
Enhanced long term performance
Improved durability over G-Force Aramid
Minimal to no stretch under load creates optimal power transmission
Improved response during acceleration
Consistent shift characteristics over time and through complete shift ratio
Un-paralleled response during high load acceleration

This simple tool allows you to change the spring and weights in your Polaris primary clutch without removing it from the motor! HIGHLIFTER AXLE BAR LIFT KITS

The High Lifter Axle Bar Kit replaces OEM axle bars which bind up with a lift kit installed. This kit only replaces the axle bars - riders will reuse factory axle cups and boots. After installation, you can add your Signature Series High Lifter Lift Kit and hit the trails with ease of mind.

The kit includes 2 new OEM grade custom length front axle bars and 8 new CV boot bands.

Note: A special, heavy duty banding tool is required for installation of the 3/8" wide bands included with this kit. **This kit only replaces the axle bars; these are not complete axles.** You must reuse your factory axle cups and boots Check your CV joints and all components for wear or damage and to make sure you have the proper amount of grease in the cup before re-installing the bar.

O-RING CHAIN

- Features include high carbon alloy pins, solid bushings, shot-peened plates and rollers.
- All O-ring chains are submitted to performance enhancing pre-stretching.
- "Gold" outer plates.
- The O-ring series chains provide a huge improvement in wear against standard type chains.
- All chains undergo pre-loading to increase fatigue and wear resistance.

Z-RING CHAIN

- The Z-ring flexes when assembled, creating a spring effect that guarantees the seal will not diminish over time.
- The lubricant trapped between the plates and the lobes of the Z-ring keeps the ring lubricated and increases its life.
- ZR chains are the best choice for the most severe and demanding applications. Among other characteristics, the ZR chains feature high alloy steel plates and pins, solid bushings and rollers, shot-peening of plates, pins and rollers, performance-enhancing pre-stretching and "gold" outer plates.

MASTER RIVET LINK
This is the safest link to join a chain; the only one that could guarantee the same resistance to fatigue as all the other links of the chain.

SPRING CLIP LINK TYPE 42
This link is a good compromise of installation and the safety level, as it is much more resistant to fatigue than the slip fit connecting link type 26. It should be used only for low power applications on motorcycles having low displacement (max 400 cc) or for short distances at moderate speed.

- **Connecting Link Reference** - SL: Spring/Clip Link, RL: Rivet Link, DL: Dual Link (contains both link types)
- **Pin Riveting** - Pressed four times for an extra strong rivet that resists powerful lateral forces on the outer plate
- **Solid Bush** - Solid bushes provide enhanced resistance to distortion from repetitive shock loading
- **Riveted Bush** - All 520 HDR/HDS/X1R/X1R2 have riveted bushes that resist powerful lateral forces on the inner plate
- **X-Ring Seal** - X-Ring seals offer better sealing than the conventional O-Ring and produce far less friction. All sealed JT chains are equipped with X-Rings

MVXZ Series

OUR SUPREME QUADRA-X RING CHAINS, THE IDEAL OE REPLACEMENT.

EK's MVXZ Quadra-X Ring chain is the ideal replacement chain for any 600 to 1000cc street bike. Features like lightening holes in the sideplates,large-diameter pins, and friction-reducing Quadra-X Rings help ensure high-performance and from 1 1/2 to 2 times increased wear life when compared to a standard O-Ring chain.

SEALED (O-RING) DRIVE CHAIN

Specifically designed with sealed-in lubrication, makes KMC sealed chain work to its optimum life. Superior alloy steel is used and heat-treated to provide best performance in strength. In addition, specially formulated grease contained by using a durable ring in between solid bushing and hardened pin, keeps constant lubrication and eliminates friction during operation. Least wear results in least chain stretch and prolongs its service life.

PRESS-FIT CHAIN LINK TOOLS

Since about 1990, most new chains use press-fit type side plates on the connecting links. On this type of link, the side plate can not be installed properly without the aid of a special tool. The chain manufacturers have decided the press fit adds strength to the connecting link and should always be used. The Motion Pro chain press tools below are designed to install the press-fit connecting links on 520-530 standard and O-ring chains.

- Versatile enough to be used on cam chains or drive chains
- Will break chains from #35 to #630

SPOOL LOCKER

The High Lifter Spool Locker is an ATV Locker that converts a limited-slip differential to full locked true 4WD so that your ATV can deliver full power and unbelievable traction all the time! With a traditional limited-slip differential, frequently you get more of a 3WD pull. Installation of the ATV Locker is comparable to the installation of a new clutch pack in the front differential and requires no welding, cutting, or other permanent modification of existing parts on your ATV. The kit includes complete instructions.

- An excellent, economical choice for replacing OEM sintered metal brake pads
- Pad consists of 50-60 percent copper combined with carbon, ceramic, tin and abrasives
- Iron backing plate is plated with copper to make it a stronger bond with the pad friction material
- Powerful stopping power in wet or dry conditions
- Excellent initial pad bite, lower lever effort and minimal pad bed-in time required
- Can be used with stainless steel rotors
- Pad material is aramid fiber, metals, abrasives and lubricants mixed with Phenol Resin
- Metal powder components exceed 50 percent of pad material
- Excellent pad life
- Can be used with stainless steel rotors
- Give superior stopping power with no fade
- Excellent initial brake pad bite
- Good feel at the lever
- No bedding-in is required
- Hard brake pad backing plate will not warp, even under extreme use
- Superior stopping power with no fade
- Excellent initial brake pad bite that is not as aggressive as the RJL compound
- Slightly more progressive feel at the lever

CERAMIC SEMI-METALLIC PADS

- Many fibers, natural and man-made have been researched and combinations of several fibers like Aramid fiber, Ceramic fiber, Carbon fiber and Metal (copper and brass powder) fiber etc.

WILD BOAR ATV BRAKE PADS & SHOES

- When looking for brake pads, the thing to remember is the 2 letter coefficient of friction rating.
- The grade/ratings of brake pads available range from E,F,G through H. Each grade being a 20% step up in friction delivery. The different ratings offer a pad for all types of riders.
- Semi-metallic pads and shoes are composed of a non-asbestos, semi-metallic carbon kevlar aramid fiber from Dupont. These have a dot coefficient of friction (c.F.) Rating of "FF" at 250° and 600°: 0.44-0.45 both temps.
- These provide riders with long pad life, low dust and brake disk wear, great stopping power and fade resistance at an economical price.
- Full metal are the best selling pads we offer. This is a high-density material consisting of copper, carbon, tin, and lead. These have a coefficient of friction rating of "FG". More specifically they rate 0.44-0.45 At 250° fand 0.45-0.50 At 600°f. These will provide a longer life than semi-metallic and wil outlast most competitors compounds. They have excellent performance and stability at all temperatures as well as reduced corrosion. Most importantly they perform equally well in wet and dry conditions. We recommended them for utility, mud, and sand applications.

RATING	COEFFICIENT OF FRICTION (C.F.) AT 250°F AND 600°F	COMMENTS	GENERAL APPLICATIONS
EE	0.25-0.35 Both Temps	0.25% Fade Possible At 600°F	Not recommended for performance applications as it shows poor c.F. In hot & cold temps.
FE	0.35-0.45 At 250°F 0.25-0.35 At 600°F	2-44% Fade Possible At 600°F	Not recommended for performance applications. Though it shows better cf. In cold temps, and has a high possibility of brake fade at warm temps.
FF	0.44-0.45 Both Temps	0-22% Fade Possible At 600°F	This pad is well suited for most conditions. It has minimal fade at high temps and is good for performance applications.
FG	0.44-0.45 At 250°F 0.45-0.50 At 600°F	Fading Very Rare	This pad is great for most conditions, as it is softer than hh rated pad and will bed quicker on worn disks. This rating is good for performance applications.
GG	0.45-0.50 Both Temps	Fading Very Rare	This pad is great for most conditions, as it is softer than hh rated pad and will bed quicker on worn disks. This rating is good for performance applications.
