POLARIS SPRING HELPER

High Lifter Tender Springs are designed to maintain load on the main spring at full travel. These are sometimes referred to as Helper Springs. High Lifter Helper/Tender Springs eliminate suspension sag and add up to 2" of lift to any lift kit.

These only fit the 2017 High Lifter Edition.
These springs also substantially improve the ride of any lift that currently uses solid spacers.

POLARIS 1" SPACERS

Give your Polaris an extra boost with High Lifter's 1" Spring Spacers. High Lifter's 1" Spring Spacers are made from alumnium and ready to give your springs the additional lift needed for ground clearance. One set of spacers will lift either the front or rear springs.

Installation notes: The spring spacers are more difficult to install on the Polaris Sportsman 550/850 XP because the springs are more difficult to compress.

HIGH LIFTER ATV LIFT KITS

GET UP TO 2 MORE INCHES OF GROUND CLEARANCE!

For every model, the lift kit is a simple bolt-on system that comes with all of the necessary brackets, bolts and complete instructions. The lift kit design lowers the front A-arms. In addition to the increased ground clearance, the space between the fenders and tires is also increased. The lift also allows larger tires to be installed by reducing tires rubbing fenders and mud flaps. As with any lift kit, C.V. joints will operate at a slightly increased angle, which will increase maintenance requirements and wear.

59	Estimated install time for experienced mechanic: 2hr fitment note # 1: be sure to always check cv boot clearance at strut housing during installation as you may have to grind aluminum strut housing to create sufficient clearance for cv boots (even if you are running stock cv axles) we had to clearance the strut housing on the 2011 model sportsman we tested with factory axles. If you are running a heavy duty aftermarket axle you will have to clearance the strut housing. Fitment note # 2 for all 2011-2016 models: heavy duty aftermarket rear axles are required to properly install this kit on any 2011-2016 sportsman models/applications listed above. On 2011-2016 models with a lift kit installed the rear axles bind when the suspension is at full extension /droop and are subject to break. If you are running wide tires a 1.5" Or wider spacer may be required depending on the width of the tire for tire to shock clearance at full lock steering. NOTE: if you have upgraded or plan to upgrade to our pro series tie rod/rack end kit you will need our part# (psak-1) alignment cone kit for 1/2" diameter bolts. Our psak-1 alignment kit comes with 2- alignment cones and all of the hardware required to upgrade both sides of your ranger and is used to help correct your tie rod angles. NOTE: be sure to ask if the customer has our high lifter forward a-arm kit that now includes our psak-1 alignment cone kit for 1/2" bolts. If they do they can install our hd ranger tie rod kit with no additional purchases. NOTE: new aftermarket heavy duty cv axles are recommended for the 2011-2014 ranger before installing any brand of lift kit. The 2011-2014 model rangers have lighter duty rear axles than previous year models and are more prone to breakage. All customers should be aware of these risks before installing a lift kit on a 2011-2014 ranger, as high lifter will not warranty or replace any broken cv axles. NOTE: 1.5" Spacers are recommended, but a minimum of a 1" wheel spacer is required on the front if you are running 12" diameter factory or aftermarket wheels for the wheel to clear the tie rod with the alignment cones installed. If you are running wide tires a 1.5" Or wider spacer may be required depending on the width of the tire for tire to shock clearance at full lock steering.

66	5" Signature series "adjustable" lift kit (semi-gloss black) NOTE: if you want to install this lift kit on any RZR 900 xp 4 (4 seater) or walker evans edition RZR 900 xp (2 seater or 4 seater) that also has our bumper-RZR 9 or emp RZR 900 winch bumper installed...You must buy our "optional" bumper mounting bracket part# (bumper-brkt-1). See part# bumper-brkt-1 for additional notes. NOTE: this lift kit fits fine if the customer does not have a front winch bumper installed on their RZR 900 xp (2seater or 4 seater) that has walker evans shocks. NOTE: this new kit gives you the option of running your standard RZR 900 xp 2 seater models (non walker evans editions) in the 5" lifted position for optimal ground clearance or you can change back to the stock height location on the lift brackets for hardcore trail riding without having to remove your lift kit from your 900 xp. Please note this kit is not adjustable on 2012-2014 xp "4" or any 2 seater walker evans editon RZR900 xp due to the larger shock body on the walker evans edtions!!! See our instructions for full details on the install and 5" lift/stock height options. NOTE: some grinding on rear trailing arm is requred for factory cv boot clearance. This is detailed and shown in our instructions. If you add a heavy duty aftermarket axle you will have to grind a larger portion due to the larger diameter outer cup/cv boot. NOTE: this kit is only adjustable on the 2011-2014 RZR 900 xp standard cab 2 seat model. NOTE: this kit is not adjustable on the 2012-2014 RZR 900 xp "4" 4 seat model or any 2 seater walker evans editon RZR 900 xp due to the larger shock body on the walker evans edtions!!! NOTE: our new plk900RZR-51 "adjustable" kit does allow you to install the high lifter or emp RZR 900 xp front winch bumper without clearance issues on the bumper brackets on the standard RZR900 xp 2 seater models (non walker evans editons). You must rotate the shock reservoir 180 degrees for proper installation and clearances on all of the standard RZR 900 xp 2 seater models. See our lift kit instructions for details on rotating shock reservoir. NOTE: you cannot install bumper-RZR9 on any walker evans edition models (2 or 4 seaters) with this lift kit installed...Unless you purchase our optional bumper bracket...See part# (bumper-brkt-1) NOTE: we recommend a set of our max clearance radius bars...They offer major upgrades in quality and a significant gain in ground clearance...They are a must for every 900 xp. See part# psra-RZR9 (also see our matching top hd radius bars...Part# psra-RZR9-1) NOTE: the new 2011-2014 pol. 900 RZR xp is a very powerful machine and is subject to break axles (front and rear) with or without a lift kit and big aggressive tires. HOW TO CLEAN WHEELS

- **Probably the single biggest mistake when cleaning wheels is to use industrial cleaners, which can contain harsh abrasives. Mild soap and warm water is sufficient for routine cleaning.**
- **After cleaning chrome-plated wheels, you can apply a non-abrasive wax or cream to prevent surface corrosion. If you have clear-coated wheels, skip this step.**
- **Don't let tire cleaners come in contact with your wheels, and try not to spray cold water on hot wheels.**
- **If you go to the car wash, don't use steam cleaners or strong chemicals on your wheels.**
- **To brighten up your polished wheels (wheels without a clear coat finish) use a polishing cleaner.**
- **To sustain this great look, apply some wax to keep the weather out.**

IMPORTANT NOTICE After installing Ride-On TPS Motorcycle Formula sealant into your tires you may notice a slight vibration until the sealant has warmed up and distributed evenly in your tires. This process usually takes 2 to 5 miles. Please DO NOT attempt to rebalance tires after the installation of Ride-On TPS Motorcycle Formula. Ride-On TPS is a balancing compound. Ride-On TPS will act as a balancer and will result in erroneous readings from a dynamic spin balancer that does not compensate for tire deflection, weight of the bike, brakes, or other suspension components. Ride-On is TPMS friendly, however it is not recommended for use in 2009, 2010, and 2012 Honda Gold Wings as their TPMS Sensors are not hermetically sealed.

BALANCE With one installation of Ride-On, lead weights become a thing of the past. While Ride-On works in conjunction with traditional weights, you won't need them anymore. Ride-On is specially formulated to hydrodynamically balance high-speed tires and dampen road noise and vibrations that cause a rough ride. The great thing is Ride-On will continue to adjust and literally rebalance your tires as you ride for the legal life of the tires. So go ahead, pop off those wheel weights, shine your wheels, and enjoy the smoothest ride you have ever experienced on your bike.

SAFETY FIRST With Ride-On TPS tire sealant, your tire literally fixes itself! If your tire is punctured, the centrifugal force of the rotating tire and the internal air pressure force Ride-On into the hole, sealing it virtually instantly. Since it helps eliminate porosity leaks that cause tires to deflate over time, your tires stay properly inflated, last longer, your bike handles better and gets more miles per gallon.

WORKS IN TUBE AND TUBELESS TIRES Ride-On TPS eliminates 85-95% of flats in tubeless tires from objects up to 1/4" (1/8" for tube tires) that penetrate the contact patch of the tire. Since puncturing objects often tear tubes, Ride-On's efficiency in tube tires is reduced to 55-65%. If the puncturing object remains in the tire, it is vital to remove it as soon as possible to prevent further injury to the tire or tube. Our company takes the position that any repair in a motorcycle tire should be treated as temporary.

HIGH VOLUME FLUID DISPENSING WITH COMPLETE CONTROL

Stroker Industries manufactures and assembles each Trigger in the United States with only the highest quality materials. The Trigger is designed to allow variable fliud delivery over 3 gallons per minutes. Once the Trigger is installed on your utility jug the days of spilling on your expensive graphics or machine will be over. Because the Trigger is self-venting, you will no longer need to open a separate vent on your utility jug to increase your fluid flow. Leave your vent closed. Simply press the Trigger button and fluid flow. Your desired rate of flow will be determined by how far you press the button. Once you have reached your desired fill level, release the button and fluid flow will stop. The result is a clean, completely controlled delivery of fluid.

GRUNGE BRUSH™

Chain and gear cleaning has never been faster or easier! Scrub the chain with the horseshoe shaped bristles at one end of The Grunge Brush™ to clean all four sides of the chain. Use the long bristles on the other end of the brush to clean components like sprockets, derailleurs, cranksets, brakes and pedals.

Regular component cleaning prevents premature wear and tear on chain and sprockets, eliminates chain skipping caused by dirt and grunge, and assures smooth operation of drivetrain and brakes.

The Grunge Brush™ can be used dry or for deep cleaning action, use it with Citrus Bike Chain Degreaser or Multi Bike Degreaser, by simply spraying degreaser onto the chain or directly onto bristles. Grunge Brush™ scrubbing action, coupled with a Finish Line bike degreaser, will leave your drivetrain looking like new
