## Single, Double, or Electric... What Shield should I choose?

Single

Used for:

Description:

The Single Shield is recommended for both Offroad and Street use, but is not recommended for Snowmobile use.

Double

Used for:

Description:

The Double Shield is the choice for many Snowmobilers as the double pane helps to reduce or eliminate fogging for the rider, allowing for better visibility.

Includes:

Snow  
Breath Guard

Electric

Used for:

Description:

The Electric Shield is a Great Choice for the Snowmobile Enthusiast where harsh temperatures and inclement weather play a factor. In most cases, fogging is eliminated, giving the rider maximum visibility.

Includes:

Snow  
Breath Guard

### PLEXUS PLASTIC CLEANER PROTECTOR & POLISH

DESC.	QTY/CS	PART #	MFG #	
7 oz	12	PL20207	20207	18.95
13 oz	12	PL20214	20214	25.95

Originally developed for use in aviation, Plexus is quite simply the most effective product you can buy for cleaning, protecting and polishing clear and colored plastics. Plexus actually seals the pores of the plastic. It makes small scratches less visible, leaving a surface that is fresh, lustrous and protected. Plexus dries perfectly, no smears, no scratches, no smudges and no oily, tacky or sticky residue. It's anti static and can be applied in seconds.

Around your house try using Plexus on your counter tops and appliances. Keep your refrigerator, dishwasher, ovens, even your microwave shinier and cleaner. Anyplace that might contain plastic, use Plexus!

Use Plexus on your computer screen to keep it clean and fingerprint-free. Or use it on your eyeglasses to keep them clean. (Don't forget about your sunglasses too!)

*The most effective product for cleaning, protecting and polishing clear & colored plastics.*

### NOVUS PLASTIC POLISH

# NOVUS

#### RECOMMENDED FOR USE ON:

Plexiglass • Lexan • Lucite • Uvex • Acrylite

#### #1 : PLASTIC CLEAN AND SHINE

Gently cleans all plastics without scratching. Leaves a lustrous shine that resists fogging, repels dust, and eliminates static. Resists finger marking. Contains no abrasives or harsh chemicals. Leaves a smooth, clean, greaseless shine.

DESCRIPTION	PART #	MFG #	
2 oz	NO7026	7026	2.62
8 oz	NO7020	7020	4.96

#### #2 : FINE SCRATCH REMOVER

Removes fine scratches, haziness and abrasions from most plastics. With repeated use, NOVUS No. 2 restores faded and discolored plastics. Removes the damage instead of filling it in. Buffs out quickly. After restoring, seals with a coat of polish.

DESCRIPTION	PART #	MFG #	
2 oz	NO7033	7033	3.85
8 oz	NO7030	7030	7.15

#### #3 : HEAVY SCRATCH REMOVER

Removes heavy scratches and abrasions from most acrylic surfaces. Use when damage is too severe to be restored with NOVUS No. 2 polish. Requires use of NOVUS No. 2 for final finishing. Not recommended for use on coated plastics.

## KLEER-VU ANTI FOG CLEANER

Kleeer-Vu cleans, prevents fogging and reduces dust build up on all types of lenses. It can be used safely on plastic or glass lenses, coated or otherwise.

Easy to use, just spray directly onto the surface or onto a cloth then wipe lens clean with a soft cloth. It becomes more effective with repeated use. Kleeer-Vu is long lasting whether applied directly and then wiped, or sprayed onto a cloth before wiping.

## HELMET CARE PRODUCTS

### S100 SPECIAL SURFACES CLEANER

S100 Special Surfaces Cleaner is a waterless spray-on, wipe off cleaner that cleans up helmets, visors, instruments and windshields in seconds. Bugs, rain spots and road film disappear instantly leaving nothing but a nice clear surface! Here's what some users said: "...used on my helmet visor... it appears so clear it seemed like I didn't have my visor down". "I was amazed how it gave back life to the cover on the speed and tach gauges." Safe for use on polycarbonate and acrylics such as Lexan®, Lucite®, Plexiglas®, fiberglass, etc. Perfect to take along in the saddlebag.

FOAM

ADJUSTABLE STRAP

Whether on a motorbike, skiing, snowboarding or freefalling, one can expect superior functionality, comfort and durability from Bobster® goggles. Specifically designed to conform to various shapes of faces, the goggle frame creates a close seal and significantly reduces wind blasts and vibrations. The adjustable head strap provides maximum retention and security while the foam allows ultimate airflow to prevent lenses from fogging.

### HOW LONG DO FILTERS LAST?

The life expectancy of the RZ Filter depends on many variables, such as; particulate exposure density, particulate exposure duration and user breathing rate. With that said, below are our general guidelines – as the user will have the final call given your exposure.

- 20-30 hours of continuous use in heavy dust exposure to things such as; grain bins, off-roading, construction/demolition etc.
- 30-40 hours of continuous use in light dust exposure to things such as; grain bins, off-roading, construction/demolition etc.
- 50-60 hours of continuous use when protecting against allergens, pollutants, odors etc.

## EXTREME GEAR

### KATAHDIN EXTREME GEAR

is designed and developed in Maine, right next door to a rugged mountain range known as Mount Katahdin [kuh-ta-din] - and just as our namesake has come to represent the domination of the greatest mountain in the Northern Maine woods, our products are designed to reflect that rugged and versatile image and prove to stand up to extreme off-road conditions. We demand the best from our gear and we strive to provide snowmobilers with clothing that functions without compromising comfort.

Our goal was to create snowmobile apparel and gear that would be lightweight, breathable, flexible, stylish and comfortable: yet rugged enough to make the sport of snowmobiling as relaxing and enjoyable as it always should be.

We take pride in offering a line of apparel and gear that combines sharp designs, quality workmanship and superior functionality at a manageable cost - in fact we stand behind the Katahdin Gear name with a **ONE YEAR GUARANTEE.**

## TECHNICAL FEATURES

### WATERPROOF, WINDPROOF AND BREATHABLE

#### MEMBRANE

<b>HiPORV</b>	Moisture permeable, water resistant and breathable glove insert.
<b>REISSA</b>	Polyurethane resin membrane. Waterproof, breathable and lightweight.

#### COATINGS

<b>HITENA</b>	Super durable, long lasting, and breathable coating.
<b>HUMAX</b>	Waterproof, windproof, & breathable polyurethane coating

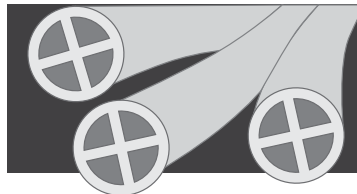

**HITENA**® Hi-Technology innovation for protective sports apparel and high grade material. Highly resistant to abrasion. Available with breathable coating for comfort and dry in extreme weather conditions.

**Humax**® is a polyurethane microporous membrane (1.4 billion pores per cm<sup>2</sup>) which prevent the large drops of rain from entering, but allow the small water vapor molecules to escape. **Humax**® is waterproof, windproof and breathable.

### WARMTH

#### INSULATION

<b>DUPONT Hollofil II</b>	Compact and soft, yet resilient and refluflable. Greater warmth without added weight.
<b>DUPONT THERMOLITE</b>	Polyester glove insulation with maximum warmth for minimum bulk.

**HOLLOFIL II**® is soft and resilient. Conforms easily to body shape, greatly reducing heat loss. The insulation of 4 hole fibers traps more air for greater warmth.

**THERMOLITE**® built-in warmth without weight. Lightweight polyester fabric made with hollow-core which combines insulation with moisture wicking properties. It is designed by DuPont Company.

### ADDITIONAL DURABILITY

#### FABRIC

<b>Bemberg</b>	Breathable, light, durable and with a silky touch.
<b>DuPont Teflon</b>	Prevents water from absorbing into fabric. Dirt & spots easily wash away.

**Bemberg**™ is the brand name for Cupro, the regenerated cellulose fiber derived from cotton. Smooth texture surface with moisture control feature keeps clothes cool and dry, ensuring fresh comfort.

**Teflon**™ is Water Repellent treatment made by Dupont. Repels water and water based stains. We use this material on our fabric surfaces. Dries quicker while dirt and spots can easily be washed away.

## HEAVY DUTY

The MaxxDry™ Heavy-Duty uses "Forced Air" technology to gently dry 4 garments in about 1 hour! Dry and warm boots and gloves together!

The Heavy-Duty works quickly to remove moisture and perspiration, thereby reducing the growth of bacteria and mold - the primary causes of odor.

It includes everything to dry any 2 pair combination of tall and short boots, gloves, or shoes. With an option for mild heat or no heat at all, the Heavy-Duty will not harm breathable Hypalon®, or other linings, Neoprene, Polyester Microfiber materials, woven nylon, expensive leather, canvas, vinyl, rubber, plastics, or, other man-made materials.

**Enjoy warm, dry, comfortable boots and gloves with no stiffness, no shrinkage and no damage whatsoever.**

## HEAVY DUTY SP

Anyone who works and plays outdoors knows that conditions are always prime for soggy feet. Whether you're caught in a sudden downpour or the hot sun has you working up a sweat, excess moisture often finds a home in your footwear where it can linger for days. This in turn leads to major discomfort, funky smells, and rapid deterioration of your gear.

The MaxxDry Heavy Duty SP uses gently heated airflow to safely dry out damp footwear in about an hour; helping to eliminate odors and restore comfort.

- Gently heated forced air eliminates unwanted moisture in about an hour
- Helps keep odor causing bacteria, fungus, and molds from forming
- Durable, compact design
- Safe for all types of footwear and gloves

## HOW BAFFIN DEVELOPS BOOTS THAT ARE POLAR PROVEN

Over a decade ago Baffin started out by revolutionizing the waterproof boot market as one of the first companies to use injection moulding of easily recyclable synthetic polymers in place of traditional vulcanized rubber. More than a decade of constant R&D and in-field testing has led Baffin to produce the leading edge, technical footwear that we have available today.

### THE SOLE OF A BAFFIN BOOT

Every aspect of a Baffin out sole has been meticulously thought out and developed to be the most functional possible. From the tread patterns, designed for maximum grip in their specific applications, to the materials used to strike the perfect balance between traction, flexibility, light weight and durability, the construction of the contact point between a Baffin boot and the terrain is second to none.

### THE BAFFIN INNER BOOT SYSTEM IS UNIQUE

Our multi-layer inner boot system creates a warm boot because body moisture is wicked away. A Hydromax II layer, similar to the material used in babies' diapers, combined with a B-Tek four channel hollow fibre layer acts as a moisture control system keeping the foam dry and funneling water vapor out of the boot as opposed to felt packs used in other boots that compress over time and retain water.

We've updated our innermost layer to an improved 'Thermaplush'. It's a chamois leather-like material that feels remarkably soft and smooth. A vaporized aluminum membrane has a silver surface which reflects energy back towards the foot. In our boots that are rated for very low temperatures, we use two of these.

### FASTENING SYSTEMS FOR FUNCTION AND CONVENIENCE

Unlike footwear for average settings, under harsh conditions it is essential that boots can be taken on and off easily with gloved hands. All our buckles are made exclusively for Baffin out of the best cold crack resistant materials available. Our boots can be secured with either a single or double buckle.

## MARSH SERIES

The Marsh Series keeps you warm and dry, is super comfortable and wears like iron while looking great. Comfort that lasts, 7 mm of cushiony warm neoprene and vulcanized rubber over the ankle give the Marsh Series all day, all season wearability. Early fall through late spring, this does it all.

## POLAR SERIES

Baffin's Polar Proven specialized boots are rated to perform at -100°C/-148°F. It's hard to find anywhere on the planet that truly gets that cold but there are plenty of days when it feels that way. On those days you need the comfort and warmth that our Polar Expedition Series delivers.

Tested at both the North and South Poles, these boots perform flawlessly even under the most demanding conditions. Our unique eight-layer Thermaplus liner, double heat reflecting core, and cold-resistant polyurethane mid sole bonded directly to the shell and then attached to a premium polar compound rubber out sole delivers all-day satisfaction. Lightweight and featuring easy-to-use fastening buckles, this premier line of boots is the template on which our other lines of footwear are made. Constructed for comfort and designed to deliver the ultimate in performance no matter where you go, no matter how severe the weather. We've thought about all the technical features to make the Polar Expedition Series the perfect choice for extreme conditions - so that you don't have to when you venture out.

- **LINER:** 8-layer inner boot system with Thermaplush
- **UPPERS:** Carbon fiber leathers and rip-stop nylon

These boots defined a category of footwear for winter motor sports and they still lead the field. They were inspired by snowboard and motocross boots. While snowboard boots are warm and stable they do not provide the right stance. And motocross boots provide good protection but are not well enough insulated. Powersport Series boots are warm and comfortable even on long winter sled and ATV rides. They use our unique 8-layer inner boot system with Thermaplush to provide lightweight, thermal insulation and moisture management. They are rated to -70°C/-94°F. At the same time the carbon fiber leathers help protect the lower extremities from impact and penetration injuries.

The MaxxDry™ Heavy-Duty uses "Forced Air" technology to gently dry 4 garments in about 1 hour! Dry and warm boots and gloves together!

The Heavy-Duty works quickly to remove moisture and perspiration, thereby reducing the growth of bacteria and mold - the primary causes of odor.

It includes everything to dry any 2 pair combination of tall and short boots, gloves, or shoes. With an option for mild heat or no heat at all, the Heavy-Duty will not harm breathable Hypalon®, or other linings, Neoprene, Polyester Microfiber materials, woven nylon, expensive leather, canvas, vinyl, rubber, plastics, or other man-made materials.

**Enjoy warm, dry, comfortable boots and gloves with no stiffness, no shrinkage and no damage whatsoever.**

# PROTECTION

## FEATURES COMMON TO ALL TEKVEST MODELS:

- Tough, hi-tenacity, vented mesh and rip-stop nylon shell with soft-armor configuration.
- Closed-cell foam & UHMW plastic laminate armor.
- A level of all-round protection currently not available in the off-road market.
- UHMW (Ultra High Molecular Weight) plastic - 8 times more cut resistance than HDPE.
- More flexible than poly carb MX gear.
- Race-proven armor configuration similar to ProLite SnoX TekVest.
- Excellent back support and "electric blanket" type warmth for the lower back and kidney areas for cold weather riding.

## TRAIL PRO

- Our top of the line trail TekVest model incorporates a blend of Pro Lite and Super Sport features.
- An attractive, quick on and off design that eliminates the need for a front zipper.
- This is the ultimate upper body protector for any aggressive trail rider who would like more frontal protection and ventilation than currently offered by the popular Super Sport model.
- Built-in cargo clips enable the rider to add one of our optional packs at any time.
- Extensive use of high-tenacity mesh panels for enhanced ventilation.
- Reverse entry front pockets with waterproof zippers and built-in car key clip.

## FLAK JAK™ LT IMS

### Flak Jak Technology:

- Nyltolyte padding
- Suspended netted shoulders
- Crystal clear polycarbonate anatomical plates
- HRP's exclusive Impact Management System (IMS) - utilizes the management of air to disperse the energy of impact
- Full range of sizes to assure a proper fit

The world's first chest protector designed to be worn with the Leatt-Brace™. The current chest protectors on the market just don't work with the Leatt-Brace™. Extending straps, cutting and hacking up existing protectors is ridiculous and flat out unsafe. We designed the new Flak Jak™ LT to work with the Leatt-Brace™. The shoulders are designed to fit around the brace and not interfere with the brace or the rider's mobility and comfort, while still maintaining the protection expected from the HRP Flak Jak™. We have utilized all the Flak Jak™ technology and added a latch system called the E-Leat Latch System (patented), which allows the chest protector to be placed on the rider after the Leatt-Brace™ has been correctly positioned on the rider.

## K-RIB WRAP

Our completely new kidney rib belt design is like no other. Designed to be used with suspenders as a mid back/rib guard, or remove the suspenders and use as a lower back and side protective kidney belt. Kidney belt designs have been stagnant since AXO introduced the hard back belts in the late 1980s, until now. The K-Rib Wrap is a completely new concept that takes protection to a new level.

### Features:

- Bio foam & plastic molded parts
- Venting
- Rib panels
- Removable suspenders
- 3 strap attachment system
- Internal molded bio foam increases air circulation

## FLAK WRAP

The Flak Wrap is the most comfortable and lightest high performance torso support system available. We designed the Flak Wrap to be unbinding by cutting the belt correctly and offering a broad size range so it fits over the hips. By not locking in the hips, we allow the rider the free pivoting action needed when going through whoop sections and dropping into turns without compromising the support needed for the lower front abdomens and kidneys.

## IMPACT WRAP

Maximum protection with minimum restriction. A combination of molded bio-foam, plastic and our classic Flak Wrap design make this kidney belt as protective as it is unrestrictive.

### Features:

- Anatomically cut
- Bio-foam & plastic molded parts
- Easy pull & release tabs
- Full size range
- Top quality knit elastics
- Double pull design
